PERNYATAAN

Dengan ini saya

Nama : Murtadha

NPM : 2004300109

Menyatakan dengan sebenarnya bahwa skripsi dengan judul "Calon Konsumen Dan Potensi UMOT (Produk Turunan Mengkudu)" adalah berdasarkan hasil penelitian, pemikiran dan juga pemaparan dari saya sendiri. Jika terdapat karya orang lain, saya akan mencatukannya sebagai sumber yang jelas.

Demikian pernyataan ini saya buat dengan sesungguhnya dan apabila dikemudian hari ternyata ditemukan adanya penjiplakan (plagiarisme), maka saya bersedia menerima sanksi akademik berupa pencabutan gelar yang telah diperoleh.

Demikian penyataan ini saya buat dalam keadaan sadar dan tanpa paksaan apapun dari pihak manapun.

Medan, 05 Februari 2025

RINGKASAN

Pembangunan wilayah berbasis integrasi komoditas pertanian dan sosial budaya dapat meningkatkan kesejahteraan petani dan masyarakat. Kabupaten Karo di Sumatera Utara telah membuktikan hal ini melalui pengembangan Usaha Mikro Obat Tradisional (UMOT) berbasis komoditas hortikultura, yang berkontribusi positif terhadap pertumbuhan ekonomi daerah. Sebaliknya, Kabupaten Asahan, meskipun memiliki potensi tanaman obat seperti mengkudu (*Morinda citrifolia*), menunjukkan pertumbuhan UMOT yang rendah dalam lima tahun terakhir. Mengkudu di Kabupaten Asahan mengalami peningkatan produksi dari tahun 2019 hingga 2022, menunjukkan peluang besar untuk pengembangan UMOT. Tanaman ini kaya akan metabolit sekunder seperti flavonoid, glikosida, fenol, alkaloid, dan triterpenoid yang terbukti efektif untuk pencegahan dan pengobatan penyakit kronis seperti tuberkulosis dan diabetes, dua penyakit dengan prevalensi tinggi di Kabupaten Asahan. Potensi pengembangan UMOT di Asahan didukung oleh beberapa faktor, seperti kondisi geografis yang mendukung budidaya tanaman obat, ekonomi lokal berbasis agraris, populasi tenaga kerja yang besar, pertumbuhan ekonomi yang positif, dan ketersediaan bahan baku mengkudu. Produk turunan mengkudu, seperti jus, kapsul, teh herbal, dan minyak esensial, berpotensi menjadi solusi kesehatan alternatif sekaligus mendorong diversifikasi ekonomi, peningkatan kesejahteraan, dan pengembangan ekonomi lokal di Kabupaten Asahan. Dengan pendekatan yang terencana dan berbasis potensi lokal, pengembangan UMOT berbahan baku mengkudu di Kabupaten Asahan dapat menjadi model baru dalam mengoptimalkan sumber daya daerah sekaligus meningkatkan taraf hidup masyarakat.

RIWAYAT HIDUP

Penulis yang Bernama Murtadha lahir pada 12 Mei 2002 di Labuhan Bilik Kabupaten Labuhan Batu Provinsi Sumatera Utara. Penulis merupakan anak keempat dari lima bersaudara dari kedua orang tua bapak Baharudin dan ibu Trisnawati.

Pendidikan formal yang pernah di tempuh antara lain:

1. Tahun 2014, menyelesaikan Pendidikan Sekolah Dasar di SDN Panai Tengah.
2. Tahun 2017, menyelesaikan Pendidikan MTsN 3 Labuhan Batu Kecamatan Panai Tengah.
3. Tahun 2020, menyelesaikan Pendidikan Sekolah Menengah Atas di SMAN 1 Panai Tengah.
4. Tahun 2020, diterima di Fakultas Pertanian Universitas Muhammadiyah Sumatera Utara Program Studi Agribisnis.

Prestasi dan kegiatan akademik yang pernah diraih dan diikuti selama menjadi mahasiswa Fakultas Pertanian Universitas Muhammadiyah Sumatera Utara antara lain yaitu:

1. Tahun 2020, mengikuti Perkenalan Kehidupan Kampus Mahasiswa/i Baru (PKKMB)Fakultas Pertanian Universitas Muhammadiyah Sumatera Utara.
2. Tahun 2020, mengikuti Masa Ta’aruf (MASTA) Ikatan Mahasiswa Muhammadiyah (IMM) Fakultas Pertanian Universitas Muhammadiyah Sumatera Utara.
3. Tahun 2021, mengikuti Manajemen Kepemimpinan Dasar (MAKASAR) ke 6 Himpunan Mahasiswa Agribisnis (HIMAGRI) Fakultas Pertanian

Universitas Muhammadiyah Sumatera Utara.

4. Tahun 2022, menjadi Badan Pengurus Harian (BPH) sebagai departmen bidang Pengabdian Masyarakat Himpunan Mahasiswa Agribisnis (HIMAGRI) Fakultas Pertanian Universitas Muhammadiyah Sumatera Utara.
5. Tahun 2022, menjadi Ketua Humas Bakti Tani 7 Himpunan Mahasiswa Agribisnis (HIMAGRI) Fakultas Pertanian Universitas Muhammadiyah Sumatera Utara.
6. Tahun 2023, menjadi Badan Pengurus Harian (BPH) sebagai ketua bidang Pengabdian Masyarakat Himpunan Mahasiswa Agribisnis (HIMAGRI) Fakultas Pertanian Universitas Muhammadiyah Sumatera Utara.
7. Tahun 2023, mengikuti program Magang dan Studi Independen Bersertifikat (MSIB) di PT. Japfa Comfeed Indonesia Tbk. melalui Yayasan Edufarmers International di Kabupaten Cianjur, Jawa Barat.
8. Tahun 2023, menjadi Ketua Panitia pada kegiatan Training of Administration ke 8 yang diadakan oleh Himpunan Mahasiswa Agribisnis (HIMAGRI) Fakultas Pertanian Universitas Muhammadiyah Sumatera Utara.

KATA PENGANTAR

Alhamdulillah, puji dan syukur penulis ucapkan kehadirat Allah SWT. yang telah memberikan rahmat, karunia dan hidayah-Nya, sehingga penulis dapat menyelesaikan penulisan skripsi ini. Tidak lupa penulis haturkan shalawat dan salam kepada Nabi Muhammad SAW. Adapun judul skripsi ini adalah “**Calon Konsumen Dan Potensi UMOT (Produk Turunan Mengkudu”**

Pada kesempatan ini penulis mengucapkan terima kasih kepada :

1. Terkhusus kepada kedua orang tua saya tercinta bapak Baharudin dan ibu Trisnawati yang telah memberikan dukungan, semangat serta motivasi baik itu secara moral, material dan doa kepada penulis sehingga penulis dapat menyelesaikan skripsi ini.
2. Ibu Assoc. Prof. Dr. Dafni Mawar Tarigan, S.P., M.Si. selaku Dekan Fakultas Pertanian Universitas Muhammadiyah Sumatera Utara.
3. Ibu Prof. Dr. Ir. Wan Arfiani Barus, M.P., selaku Wakil Dekan I Fakultas Pertanian Universitas Muhammadiyah Sumatera Utara.
4. Bapak Akbar Habib, S.P., M.P., selaku Wakil Dekan III Fakultas Pertanian Universitas Muhammadiyah Sumatera Utara.
5. Ibu Mailina Harahap, S.P., M.Si. selaku Ketua Program Studi Agribisnis Fakultas Pertanian Universitas Muhammadiyah Sumatera Utara.
6. Ibu Juita Rahmadani Manik, S.P., M.Si. selaku Sekretaris Program Agribisnis Fakultas Pertanian Universitas Muhammadiyah Sumatera Utara.
7. Bapak Ir. Rahmad Syukur Siregar, S.P., M.P. selaku Dosen Pembimbing yang telah membimbing penulis dalam penulisan skripsi.

8. Seluruh Dosen Fakultas Pertanian Universitas Muhammadiyah Sumatera Utara.
9. Biro Administrasi yang telah banyak membantu penulis dalam urusan administrasi.
10. Keluarga besar Himagri FP UMSU yang telah banyak membantu dan memberikan motivasi.
11. Seluruh teman-teman seperjuangan Kontnex, kos pak Mur dan teman-teman kelas Agribisnis 3 stambuk 2020.

Akhir kata penulis mengharapkan saran dan masukan dari semua pihak lain demi kesempurnaan skripsi penelitian ini.

PENDAHULUAN

Latar Belakang

Pembangunan wilayah yang mengintegrasikan antara ketersedian komoditas pertanian pada suatu daerah dengan sosial budaya akan meningkatkan kesejahteraan petani dan masyarakat (Roldan et al., 2023). Kabupaten Karo sebagai basis subsektor hortikultura Sumatera Utara telah mampu menghasilkan produk turunan dari komoditas subsector hortikultura melalui Usaha Mikro Obat Tradisional (UMOT). Kabupaten Karo menunjukkan peningkatan UMOT dengan jumlah 4 pada tahun 2018, 4 pada tahun 2019, 9 pada tahun 2020, 14 pada tahun 2021 dan 17 pada tahun 2022 (Dinas Kesehatan Provinsi Sumatera Utara). keberadaan UMOT telah menunjukkan peningkatan pertumbuhan ekonomi sebesar 0,80% pada tahun 2020, 2,25% pada tahun 2021, dan 5,06% pada tahun 2022 (Badan Pusat Statistik Provinsi Sumatera Utara). Ini membuktikan bahwa dalam pembangunan wilayah, petani dan masyarakat mendapatkan manfaat besar dari integrasi sosial, budaya, dan ekonomi (Visca et al., 2020).

PDRB pada Kabupaten Asahan memiliki kontribusi paling rendah dari subsektor hortikultura (Badan Pusat Statistik Provinsi Sumatera Utara). Salah satu penyebabnya adalah UMOT di Kabupaten Asahan memiliki pertumbuhan yang rendah pada lima tahun terakhir, yaitu 0 pada tahun 2018, 0 pada tahun 2019, pada tahun 2020, 1 pada tahun 2021 dan 1 pada tahun 2022 (Dinas Kesehatan Provinsi Sumatera Utara). Pertumbuhan UMOT di kabupaten Asahan berbanding terbalik dengan kabupaten Karo.

Pemanfaatan tanaman obat oleh etnis Melayu, Jawa dan Batak di

gunakan untuk ritual kebudayaan, keagamaan, peningkatan imunitas dan pengobatan (Nasution et al., 2016). Etnis Melayu, jawa dan batak dalam menghasilkan obat tradisional memiliki keunikan dalam cita rasa nya yang bersifat pahit. Peningkatan produksi mengkudu di Kabupaten Asahan menunjukkan tren positif, dengan jumlah produksi 237 kg pada tahun 2019, 994 kg pada tahun 2020, 1.725 kg pada tahun 2021, dan 1.556 kg pada tahun 2022 (Badan Pusat Statistik Provinsi Sumatera Utara). Mengkudu adalah komoditas tanaman obat yang paling potensial produk turunannya berdasarkan pertumbuhan produksi trend positif (Djauhariya et al., 2006).

Pemetaan langkah utama untuk pengembangan Usaha Mikro Obat Tradisional melakukan pemetaan masyarakat yang menjadi calon pembeli dari produk turunan tanaman obat yang di hasilkan (Ozkan and Deniz, 2023). Masyarakat yang tertarik untuk menggunakan produk turunan secara berlanjut akan menjadi konsumen potensial (Smith-Hall et al., 2012). Penelitian ini akan melakukan pemetaan analisis terhadap jenis dan jumlah penderita penyakit serta mengkaji calon konsumen dan potensi penggunaan produk turunan mengkudu oleh Usaha Mikro Obat Tradisional.

Rumusan Masalah

1. Bagaimana manfaat tanaman mengkudu (*Morinda Citrifolia*)
2. Bagaimana kesesuaian manfaat tanaman mengkudu (*Morinda Citrifolia*) untuk mencegah atau mengobati penyakit di kabupaten Asahan
3. Bagaimana potensi produk turunan dari tanaman mengkudu pada Usaha Mikro Obat Tradisional (UMOT) di kabupaten Asahan

Tujuan Penelitian

1. Untuk mengetahui bagaimana manfaat tanaman mengkudu (*Morinda Citrifolia*)
2. Untuk mengetahui bagaimana kesesuaian manfaat tanaman mengkudu (*Morinda Citrifolia*) untuk mencegah atau mengobati penyakit di kabupaten Asahan
3. Untuk mengetahui bagaimana potensi produk turunan dari tanaman mengkudu pada Usaha Mikro Obat Tradisional (UMOT) di kabupaten Asahan

Manfaat Penelitian

Hasil dari penelitian ini diharapkan dapat memberikan manfaat, antara lain:

1. Bagi peneliti, penelitian ini merupakan salah satu syarat untuk menyelesaikan program Strata 1 (S1) di Fakultas Pertanian, Universitas Muhammadiyah Sumatera Utara.
2. Bagi institusi pendidikan, penelitian ini dapat memberikan manfaat bagi dunia pendidikan, perpustakaan, serta menjadi referensi untuk penelitian selanjutnya.
3. Bagi masyarakat umum, penelitian ini menyajikan informasi tentang potensi Usaha Mikro Obat Tradisional (UMOT) dengan fokus pada produk turunan mengkudu.

TINJAUAN PUSTAKA

Sejarah Tanaman Obat

Sejak ribuan tahun yang lalu, nenek moyang bangsa Indonesia telah menggunakan ramuan dari berbagai tanaman obat dan hewan untuk mencegah dan mengobati beragam penyakit. Indonesia juga dikenal sebagai negara yang memiliki jumlah tanaman obat yang sangat banyak. Penggunaan ramuan dari tanaman obat telah menjadi bagian dari kehidupan sehari-hari masyarakat Indonesia. Tradisi ini diwariskan dari generasi ke generasi. Pengobatan herbal ini secara empiris diyakini keampuhan dan khasiatnya. Banyak masyarakat yang masih memanfaatkan ramuan tradisional hingga saat ini. Tanaman obat tidak hanya digunakan untuk kesehatan, tetapi juga sebagai bagian dari budaya. Warisan ini terus dijaga dan dilestarikan oleh masyarakat Indonesia. Tradisi lisan berperan penting dalam menyebarkan pengetahuan tentang pengobatan herbal (Ong Peter Leonardo et al., 2023).

Sejarah tanaman obat atau herbal di Indonesia berdasarkan fakta sejarah adalah obat asli Indonesia. Catatan sejarah menunjukkan bahwa di wilayah nusantara dari abad ke 5-19, tanaman obat merupakan sarana paling utama bagi masyarakat tradisional kita untuk pengobatan penyakit dan pemeliharaan kesehatan. Banyak jenis tanaman yang digunakan secara tunggal maupun ramuan terbukti sebagai bahan pemelihara kesehatan. Tetapi dengan masuknya pengobatan modern di Indonesia, dengan didirikannya sekolah dokter jawa di Jakarta pada

tahun 1904, maka secara bertahap dan sistematis penggunaan tanaman obat sebagai obat telah ditinggalkan. Dan telah menggantungkan diri pada obat kimia modern, penggunaan tanaman obat dianggap kuno, berbahaya dan terbelakang (Marwati & Amidi 2018).

Pengertian Tanaman Obat

Tanaman obat adalah tanaman atau bagian dari tumbuhan yang dimanfaatkan sebagai bahan dalam obat tradisional atau obat herbal. Tanaman ini, yang juga dikenal sebagai biofarmaka, digunakan untuk menyembuhkan atau mencegah berbagai penyakit. Obat yang efektif mengandung zat aktif yang dapat menyembuhkan penyakit tertentu, atau berbagai zat yang bekerja secara sinergis untuk memberikan efek penyembuhan. Penggunaan tanaman obat sebagai obat dapat dilakukan melalui konsumsi, aplikasi topikal pada kulit, atau penghirupan. Proses ini melibatkan reseptor sel yang berfungsi menerima senyawa kimia dari tanaman obat, baik yang ditanam secara sengaja maupun yang tumbuh secara alami (Sarno, 2019).

Menurut Siregar dkk (2020) Tanaman obat merupakan tanaman yang sangat popular yang dapat dimanfaatkan sebagai bahan baku obat tradisional dan jamu, yang bila dikonsumsi akan meningkatkan kekebalan tubuh (immune system). Kementerian Pertanian dalam hal ini Direktorat Jenderal Hortikultura sebagai institusi pemerintah yang menangani produksi tanaman obat menyatakan bahwa yang dimaksud tanaman obat adalah tanaman yang bermanfaat untuk obat-obatan, kosmetik dan kesehatan yang dikonsumsi atau digunakan dari bagian-

bagian tanaman seperti daun, batang, buah, umbi (rimpang) ataupun akar.

Sedangkan pada penelitian Hedi R. Dewoto (2007) menjelaskan bahwa Definisi obat tradisional adalah bahan atau ramuan yang berasal dari tumbuhan, hewan, mineral, sediaan galenik, atau campuran dari bahan-bahan tersebut, yang telah digunakan secara turun-temurun untuk pengobatan berdasarkan pengalaman. Obat tradisional Indonesia, yang lebih dikenal dengan nama jamu, umumnya merupakan campuran dari berbagai bahan herbal yang berasal dari tanaman. Bagian tanaman yang digunakan dapat meliputi akar, batang, daun, umbi, atau bahkan seluruh bagian tanaman.

Bagian Tanaman Berkhasiat Obat

Pengelompokan famili tanaman obat berdasarkan bagian tanaman yang memiliki khasiat obat (Yowa Mariana et al., 2019) dapat dilihat pada tabel berikut ini:

Tabel 1. Bagian tanaman berkhasiat obat

NO	Organ Tanaman	Famili
1	Umbi	<i>Zingiberaceae, Araceae</i>
2	Akar	<i>Myricaceae, Solanaceae</i>
3	Rimpang	<i>Zingiberaceae, Myricaceae</i>
4	Batang	<i>Rutacea, Moraceae</i>
5	Kulit Batang	<i>Lauraceae, Myrtaceae</i>
6	Daun	<i>Sterculiaceae, Myrtaceae, Asteraceae, Caricaceae, Ericaceae, Annonaceae, Amaranthaceae, Basellaceae, Solanaceae, Myrtaceae, Malvaceae, Lamiaceae, Fabaceae, Apiaceae, Annonacea</i>

7	Buah	<i>Caricaceae, Bromeliaceae, Annonaceae, Rutaceae, Guttiferae, Cucurbitaceae</i>
8	Biji	<i>Solanaceae</i>

Sumber: United States Department of Agriculture

Tidak semua bagian tumbuhan dapat digunakan sebagai obat tradisional, namun hanya bagian-bagian tertentu saja seperti: umbi 3,22%, akar 12,90%, rimpang 12,90%, batang 6,45%, kulit batang 6,45% daun 32,25%, buah 19,35% dan biji 6,45%. Hal ini disesuaikan dengan jenis penyakit yang akan diobati dan terkadang hanya satu organ tumbuhan yang digunakan dan ada pula beberapa organ tumbuhan yang diracik bersama-sama (Yowa Mariana et al., 2019).

Kandungan Senyawa Aktif Metabolit Sekunder Pada Tumbuhan Obat

Tumbuhan memiliki senyawa metabolit sekunder yang terdiri dari molekul- molekul kecil spesifik dan memiliki struktur bervariasi dengan fungsi dan peran berbeda pada tiap jenisnya. Metabolit sekunder pada tumbuhan memiliki peran sebagai senyawa penuntun dalam penemuan dan pengembangan obat baru, serta melindungi tumbuhan itu sendiri dari ancaman lingkungan. Beberapa senyawa metabolit sekunder memiliki khasiat obat, seperti flavonoid, saponin, alkaloid, steroid, triterpenoid dan tannin (Ergina dan Pursitasari, 2014) dalam (Khafid et al., 2023).

a. Flavonoid

Flavonoid adalah kelompok produk alami yang sangat penting. Secara khusus, flavonoid termasuk dalam kelompok metabolit sekunder

tumbuhan yang memiliki struktur polifenol, yang banyak ditemukan dalam buah-buahan, sayuran, dan minuman tertentu. Flavonoid memiliki berbagai manfaat biokimia dan antioksidan, yang berhubungan dengan berbagai penyakit seperti kanker, penyakit Alzheimer (AD), aterosklerosis, dan lainnya (Panche et al, 2016).

b. Saponin

Saponin adalah glikosida yang memiliki aglikon berupa sapogenin. Saponin mampu menurunkan tegangan permukaan air, yang menyebabkan terbentuknya buih pada permukaan air setelah dikocok. Sifat ini mirip dengan surfaktan. Penurunan tegangan permukaan terjadi karena adanya senyawa mirip sabun yang dapat merusak ikatan hidrogen pada air (Nurzaman et al., 2018).

c. Alkaloid

Alkaloid adalah salah satu senyawa metabolisme sekunder yang dihasilkan oleh tumbuhan. Senyawa ini banyak ditemukan pada organ tumbuhan seperti pada daun, kulit batang, ranting dan biji. Alkaloid memiliki manfaat dalam bidang kesehatan antara lain mampu meningkatkan tekanan darah, sebagai pemicu sistem saraf, mengurangi rasa sakit, senyawa antimikroba, sebagai obat penenang, obat penyakit jantung serta berbagai manfaat lainnya (Aksara et al, 2013) dalam (Khafid et al., 2023).

d. Steroid

Steroid adalah salah satu senyawa metabolit sekunder pada tumbuhan. Senyawa ini dapat dikategorikan sebagai kelas utama

fitokimia tanaman. Selain steroid, kelas utama fitokimia tanaman meliputi fenolik, terpenoid, minyak esensial, alkaloid, dan polipeptida. Setiap kelas fitokimia memiliki fungsi dan peran spesifik dalam tumbuhan. Steroid, misalnya, berperan penting dalam berbagai proses fisiologis (Bialangi, et al., 2018).

e. Triterpenoid

Triterpenoid adalah senyawa metabolit sekunder turunan terpenoid yang kerangka karbonnya berasal dari enam satuan isoprena (2-metilbuta-1,3-diene) yaitu kerangka karbon yang dibangun oleh enam satuan C5 dan diturunkan dari hidrokarbon C₃₀ asiklik , yaitu skualena. Senyawa ini berbentuk siklik atau asiklik dan sering memiliki gugus alkohol, aldehida, atau asam karboksilat (Widiyati, 2006) dalam (Balafif et al., 2013).

f. Tannin

Tanin merupakan senyawa aktif metabolit sekunder golongan polifenol yang terdiri dari gugus hidroksi dan beberapa gugus terkait seperti karboksil yang dihasilkan oleh tanaman. Senyawa tanin memiliki aktivitas antifungi sehingga dapat memperkecil dinding sel jamur karena permeabilitasnya akan terganggu sehingga dinding sel jamur tersebut tidak dapat melakukan proses metabolisme sel (Hersila et al., 2023).

Kondisi Tanaman Obat di Indonesia

Tumbuhan obat tradisional di Indonesia mempunyai peran yang sangat penting terutama bagi masyarakat di daerah pedesaan yang

fasilitas kesehatannya masih sangat terbatas. Nenek moyang kita mengenal obat-obatan tradisional yang berasal dari tumbuhan di sekitar pekarangan rumah maupun yang tumbuh liar di semak belukar dan hutan-hutan. Masyarakat sekitar kawasan hutan memanfaatkan tumbuhan obat yang ada sebagai bahan baku obat-obatan berdasarkan pengetahuan tentang pemanfaatan tumbuhan obat yang diwariskan secara turun-temurun (Hidayat & Hardiansyah 2012).

Di Indonesia terdapat 20.000 jenis tumbuhan obat. Yang terdata sekitar 1.000 jenis, dan yang sudah dimanfaatkan untuk pengobatan tradisional baru sekitar 300 jenis (Susilo Yulianto 2017). Pengetahuan tentang tumbuhan obat dan pengembangannya yang bersumber dari hutan dan pekarangan seharusnya mendapat perhatian besar. Untuk menunjang kelestarian lingkungan hidup dan menjaga agar tumbuhan obat tetap ada maka perlu dikembangkan kegiatan budidaya tumbuhan obat (Abdi, Murdiono, & Sitompul, 2015) dalam (Dewantari et al., 2018).

Obat Tradisional Lebih Sesuai Untuk Penyakit Metabolit Sekunder

Metabolit sekunder adalah senyawa kimia yang diproduksi oleh tanaman. Senyawa ini bervariasi antara spesies yang satu dengan yang lainnya. Produksi metabolit sekunder tidak seragam dan spesifik untuk setiap spesies. Perbedaan ini menunjukkan keanekaragaman fungsi dan peran dalam tanaman (Hersila et al., 2023). Obat tradisional lebih sesuai untuk mengatasi penyakit yang melibatkan metabolit sekunder karena banyak tanaman obat mengandung senyawa metabolit sekunder seperti

flavonoid, alkaloid, terpenoid, dan polifenol yang memiliki aktivitas biologis seperti anti-inflamasi, antimikroba, dan antioksidan. Selain itu, obat tradisional biasanya lebih aman dan memiliki efek samping yang lebih rendah dibandingkan obat sintetis, serta lebih mudah diakses dan lebih ekonomis, terutama di daerah pedesaan atau negara berkembang. Pendekatan holistik dalam pengobatan tradisional juga mempertimbangkan keseimbangan tubuh secara keseluruhan, yang seringkali lebih efektif dalam mengelola penyakit kompleks. Banyak dari tanaman obat ini telah digunakan selama berabad-abad dalam berbagai budaya, menunjukkan keamanan dan efektivitasnya yang berkelanjutan(Zeeshan Bhatti et al., 2022).

UMOT (Usaha Mikro Obat Tradisional)

UMOT merupakan bagian dari UMKM sesuai dengan Pasal 1 butir 6 Peraturan Menteri Kesehatan Nomor 006 Tahun 2012, yang mendefinisikan UMOT sebagai usaha yang menghasilkan sediaan obat tradisional dalam bentuk param, tapel, pilis, cairan obat luar, dan rajangan. Usaha Mikro Obat Tradisional (UMOT) merujuk pada usaha kecil yang bergerak dalam produksi, pengolahan, dan/atau distribusi obat tradisional. Obat tradisional adalah produk yang berasal dari bahan-bahan alami, seperti tumbuhan, hewan, atau mineral. Produk ini digunakan untuk tujuan kesehatan, pencegahan, dan pengobatan penyakit.

a. Potensi Ekonomi

Usaha mikro obat tradisional memiliki potensi ekonomi yang signifikan. Permintaan pasar yang tinggi terhadap produk alami dan

tradisional, baik di dalam negeri maupun di pasar internasional, menjadikan usaha ini berpotensi besar. Selain itu, penggunaan bahan baku lokal yang mudah ditemukan mengurangi biaya produksi dan mendukung pertumbuhan ekonomi lokal. Inovasi dalam pengembangan produk baru juga menciptakan nilai tambah dan membuka pasar baru. Usaha ini juga membuka lapangan kerja baru bagi masyarakat dalam proses produksi, distribusi, dan pemasaran. Agribisnis tanaman obat memiliki nilai rantai yang memberikan sumber penghasilan bagi setiap pelakunya. Tanaman herbal (obat) memiliki potensi bisnis untuk dapat dikembangkan dan sebagai upaya diversifikasi usaha pertanian yang berkelanjutan (Hidayat and Supartoko., 2017).

b. Pemerataan Kesejahteraan

Pemerataan kesejahteraan dapat dicapai melalui pengembangan usaha mikro obat tradisional, yang memanfaatkan kekayaan alam dan pengetahuan lokal. Dengan mendukung usaha kecil ini, masyarakat di berbagai daerah dapat meningkatkan pendapatan dan taraf hidup mereka. Usaha mikro obat tradisional juga membantu melestarikan budaya dan warisan leluhur, sambil memberikan alternatif pengobatan yang terjangkau dan alami bagi masyarakat. Selain itu, usaha ini dapat membuka lapangan pekerjaan baru dan mengurangi kesenjangan ekonomi antara daerah perkotaan dan pedesaan, sehingga menciptakan keseimbangan ekonomi yang lebih merata dan berkelanjutan.

c. Pertumbuhan Ekomomi

Pertumbuhan ekonomi dapat didorong secara signifikan melalui

usaha mikro obat tradisional, yang menggabungkan kearifan lokal dengan inovasi dalam pengolahan bahan alam. Usaha mikro ini tidak hanya meningkatkan pendapatan individu dan keluarga, tetapi juga memperluas pasar domestik dan internasional untuk produk-produk kesehatan alami. Dengan memberikan pelatihan dan dukungan keuangan kepada pengusaha mikro, pemerintah dan lembaga terkait dapat mendorong pertumbuhan sektor ini, menciptakan lapangan kerja, dan meningkatkan daya saing produk lokal di pasar global. Selain itu, Usaha Mikro Obat Tradisional (UMOT) dapat menarik minat wisatawan kesehatan dan penelitian, yang pada gilirannya menambah devisa negara dan mendorong pertumbuhan ekonomi yang inklusif dan berkelanjutan.

Masyarakat dan Tanaman Obat

Tanaman obat adalah tumbuhan yang telah diidentifikasi dan diketahui berdasarkan pengamatan manusia memiliki senyawa yang bermanfaat untuk mencegah, menyembuhkan penyakit, melakukan fungsi biologis tertentu. Pengertian tanaman obat tradisional juga sering disebut apotek hidup, yakni pemanfaatan sebagian tanah agar dapat ditanami tanaman obat yang digunakan untuk kepentingan sehari-hari (Grenvilco D. Kumontoy 2023).

Tumbuhan obat mempunyai hubungan yang erat dengan masyarakat, baik sebagai sumber mata pencaharian dan pendapatan petani sekitar hutan maupun sebagai peluang yang menjanjikan dalam

sektor ekonomi lokal. Tradisi pengobatan dalam masyarakat tidak terlepas dari budaya setempat dan sering kali diwariskan secara turun-temurun. Pemanfaatan tumbuhan obat oleh masyarakat mencerminkan pengetahuan lokal yang kaya, yang berperan penting dalam menjaga kesehatan komunitas dan melestarikan biodiversitas. Selain itu, industri tanaman obat dapat memberikan dampak positif dengan menciptakan lapangan kerja, meningkatkan nilai tambah produk melalui inovasi, dan mengurangi ketergantungan pada obat-obatan impor. Dengan demikian, tumbuhan obat tidak hanya berkontribusi pada kesehatan individu tetapi juga pada kesejahteraan sosial dan ekonomi masyarakat secara keseluruhan (Herlina et al., 2019).

Penelitian Terdahulu

a. Tanaman Mengkudu

Tanaman mengkudu, yang dikenal dengan nama ilmiah *Morinda citrifolia*, adalah tanaman tropis yang banyak ditemukan di Asia Tenggara dan Pasifik Selatan. Buahnya yang berwarna hijau kekuningan memiliki rasa dan aroma yang khas serta kaya akan senyawa fitokimia seperti antioksidan, vitamin, dan mineral. Berikut adalah penelitian

b. Produk Turunan

Produk turunan adalah hasil dari proses transformasi bahan mentah menjadi produk yang memiliki nilai tambah dan manfaat lebih besar. Produk turunan sering kali dihasilkan melalui berbagai metode pengolahan seperti ekstraksi, fermentasi, atau sintesis kimia. Berikut adalah penelitian terdahulu yang membahas produk turunan:

Tabel 3. Penelitian terdahulu produk turunan pertanian

Kerangka Berpikir

Kerangka berpikir atau kerangka pemikiran adalah dasar pemikiran dari penelitian yang disintesiskan dari fakta-fakta, observasi dan kajian kepustakaan. Oleh karena itu, kerangka berpikir memuat teori, dalil atau konsep-konsep yang akan dijadikan dasar dalam penelitian. Di dalam kerangka pemikiran variabel- variabel penelitian dijelaskan secara mendalam dan relevan dengan permasalahan yang diteliti, sehingga dapat dijadikan dasar untuk menjawab permasalahan penelitian (Syahputri et al., 2023). Berikut ini adalah kerangka

pemikiran yang telah disusun oleh peneliti:

Gambar 1. Kerangka berpikir

METODE PENELITIAN

Metode Penelitian

Metode yang digunakan dalam penelitian ini adalah studi kepustakaan atau tinjauan literatur. Tinjauan literatur adalah evaluasi komprehensif terhadap penelitian sebelumnya yang berkaitan dengan topik tertentu. Tujuannya adalah untuk memberi informasi kepada pembaca tentang pengetahuan yang telah ada dan yang masih belum terungkap mengenai topik tersebut, serta untuk menemukan dasar rasional dari penelitian yang sudah dilakukan atau untuk menginspirasi penelitian selanjutnya (Denney & Tewksbury, 2013). Data yang digunakan merupakan data sekunder diperoleh dari Scientdirect, Googlescholer, BPS Sumatera Utara, Dinas Kesehatan Provinsi Sumatera Utara, Asahan Satu Data, Dinas Kependudukan dan Pencatatan Sipil Kabupaten Asahan, dengan rentang waktu 2019-2024.

Metode Penentuan Lokasi Penelitian

Penelitian ini dilakukan di Kabupaten Asahan Provinsi Sumatera Utara. Metode penentuan lokasi dilakukan secara (*purposive*) sengaja dengan pertimbangan bahwa Kabupaten Asahan memiliki calon Konsumen dan Potensi UMOT (Produk Turunan Mengkudu).

Metode Analisis Data

Metode yang di gunakan untuk analisis data adalah PRISMA (Preferred Reporting Items for Systematic Reviews and Meta-Analyses). PRISMA adalah pendekatan sistematis yang digunakan untuk mengumpulkan, menyeleksi, dan mensintesis hasil dari berbagai studi yang relevan dalam tinjauan sistematis atau meta-analisis. PRISMA dirancang untuk memastikan transparansi dan

ketelitian dalam pelaksanaan penelitian, serta untuk membantu peneliti dalam melaporkan

hasil mereka secara terstruktur. Berikut penjelasan lebih rinci tentang metode analisis data dengan dasar PRISMA:

1. Identifikasi (Identification):

Pada tahap ini, peneliti mencari dan mengumpulkan semua literatur atau studi yang relevan dengan topik penelitian dari berbagai sumber seperti database akademik, jurnal ilmiah, konferensi, dan sumber lainnya. Pencarian ini dilakukan dengan menggunakan kata kunci yang spesifik dan strategi pencarian yang telah dirancang sebelumnya. Tujuan dari langkah ini adalah untuk mendapatkan sebanyak mungkin referensi yang berkaitan dengan topik penelitian.

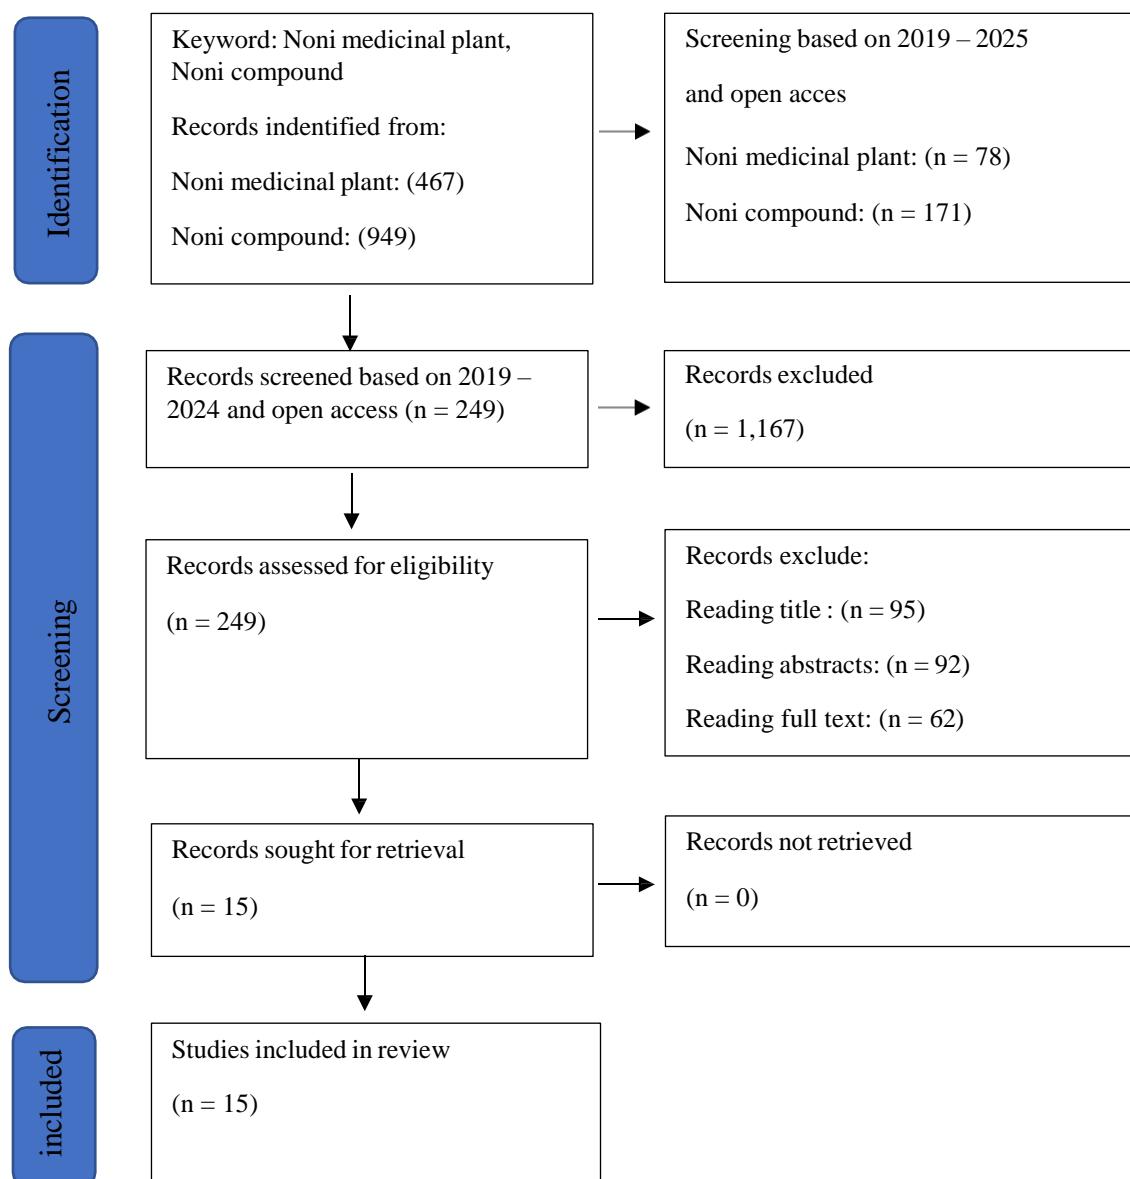

2. Penyaringan (Screening):

Setelah semua studi yang relevan diidentifikasi, langkah berikutnya adalah menyaring atau menyeleksi studi tersebut berdasarkan kriteria inklusi dan eksklusi yang telah ditetapkan sebelumnya. Pada tahap ini, peneliti akan mengeliminasi duplikasi dan menyingkirkan studi yang tidak relevan atau tidak memenuhi kriteria kualitas yang diperlukan. Penyaringan biasanya dilakukan melalui evaluasi judul, abstrak, dan kemudian teks lengkap dari studi yang tersisa.

3. Inklusi (Included):

Tahap akhir adalah inklusi, di mana studi yang lolos penyaringan dan memenuhi kriteria dimasukkan dalam analisis akhir.

Studi ini dianalisis secara mendalam, dan hasilnya digunakan untuk menjawab pertanyaan penelitian atau menyimpulkan topik yang dibahas. Proses ini memastikan hanya studi yang paling relevan dan berkualitas tinggi yang mempengaruhi hasil penelitian.

Gambar 2. Diagram Prisma

Definisi Operasional

1. Potensi: Dalam konteks ekonomi atau penelitian, potensi merujuk pada kapasitas atau kemungkinan suatu objek, aktivitas, atau area untuk menghasilkan hasil atau keuntungan tertentu. Ini mencakup kemungkinan pengembangan dan kontribusi terhadap pencapaian tujuan tertentu, seperti peningkatan ekonomi atau kesehatan masyarakat.
2. Tanaman: Tanaman adalah organisme hidup yang termasuk dalam kerajaan Plantae, yang umumnya memiliki kemampuan fotosintesis untuk menghasilkan makanan dari sinar matahari. Tanaman dapat berupa pohon, semak, herba, atau rumput yang tumbuh di berbagai lingkungan dan memiliki berbagai fungsi ekologis dan ekonomi.
3. Tanaman Obat: Tanaman obat adalah tanaman yang bagian-bagiannya, seperti daun, akar, batang, atau bunga, digunakan untuk tujuan terapeutik atau pengobatan. Tanaman ini mengandung senyawa aktif yang dapat membantu dalam pencegahan, pengobatan, atau perawatan berbagai kondisi kesehatan.
4. Bagian Tanaman Obat: Bagian tanaman obat merujuk pada bagian spesifik dari tanaman yang digunakan untuk tujuan pengobatan. Ini bisa mencakup akar, daun, batang, bunga, atau biji, tergantung pada tanaman dan kegunaan terapeutiknya. Misalnya, akar ginseng sering digunakan dalam pengobatan tradisional, sedangkan daun teh hijau digunakan untuk manfaat kesehatan.
5. Tanaman Mengkudu: Tanaman mengkudu (*Morinda citrifolia*)

adalah tanaman tropis yang dikenal karena sifat obatnya. Buah dan daun tanaman ini sering digunakan dalam pengobatan tradisional untuk berbagai penyakit, seperti peradangan dan gangguan pencernaan, karena kandungan senyawa aktifnya, seperti saponin dan flavonoid.

6. Metabolit Sekunder: Metabolit sekunder adalah senyawa organik yang diproduksi oleh tanaman (dan organisme lain) yang tidak terlibat langsung dalam pertumbuhan atau perkembangan utama, tetapi memainkan peran penting dalam interaksi dengan lingkungan, seperti perlindungan terhadap herbivora atau patogen. Contoh metabolit sekunder termasuk alkaloid, flavonoid, dan terpenoid, yang sering memiliki aktivitas biologis yang bermanfaat.
7. Penyakit: Penyakit adalah kondisi abnormal yang memengaruhi tubuh atau pikiran, biasanya ditandai dengan gejala dan tanda-tanda tertentu. Penyakit dapat disebabkan oleh berbagai faktor, seperti infeksi, ketidakseimbangan biokimia, gangguan genetik, atau kerusakan fisik.
8. Penderita Penyakit: Penderita penyakit adalah individu yang mengalami atau terdiagnosis dengan suatu penyakit. Mereka mungkin mengalami berbagai gejala dan dampak yang memengaruhi kualitas hidup mereka, dan biasanya memerlukan diagnosis dan perawatan medis untuk mengelola kondisi mereka.
9. UMKM (Usaha Mikro, Kecil, dan Menengah): UMKM adalah

kategori usaha yang meliputi perusahaan mikro, kecil, dan menengah, yang ditandai dengan skala operasional, jumlah tenaga kerja, dan pendapatan tahunan yang relatif kecil dibandingkan dengan perusahaan besar. UMKM berperan penting dalam perekonomian lokal dengan menciptakan lapangan kerja dan mendukung pengembangan ekonomi.

10. UMOT (Usaha Mikro Obat Tradisional): UMOT adalah subkategori UMKM yang fokus pada produksi dan pemasaran obat tradisional. Usaha ini melibatkan pengolahan dan pemanfaatan tanaman obat untuk membuat produk-produk kesehatan yang bersifat tradisional dan alami.
11. Produk: Produk adalah barang atau jasa yang dihasilkan untuk dijual atau digunakan. Dalam konteks usaha mikro obat tradisional, produk merujuk pada hasil akhir yang dibuat dari tanaman obat, seperti ramuan, kapsul, atau ekstrak, yang ditawarkan kepada konsumen untuk keperluan kesehatan.
12. Produk Turunan: Produk turunan adalah hasil sampingan atau variasi yang dihasilkan dari produk utama. Dalam konteks tanaman obat, produk turunan bisa termasuk bentuk lain dari produk utama, seperti ekstrak, bubuk, atau minyak esensial, yang diolah dari bahan dasar tanaman obat untuk meningkatkan kegunaan atau nilai tambahnya.

DESKRIPSI UMUM DAERAH PENELITIAN

Karakteristik Lokasi

a) Kabupaten Asahan

Kabupaten Asahan merupakan salah satu wilayah di Provinsi Sumatera Utara, dengan ibukota terletak di Kisaran. Secara geografis, kabupaten ini berbatasan dengan Kabupaten Batubara di barat, Kabupaten Labuhanbatu di selatan, Kabupaten Simalungun di utara, dan Selat Malaka di timur. Daerah ini dikenal sebagai wilayah yang subur dengan sektor pertanian, perkebunan, dan perikanan sebagai tulang punggung ekonominya. Komoditas utama seperti kelapa sawit, karet, dan kakao mendominasi kegiatan perkebunan. Sungai Asahan yang membelah wilayah ini juga menjadi sumber penting untuk perikanan air tawar.

Letak geografis Kabupaten Asahan berada di kawasan pantai timur Sumatera Utara terletak pada garis $2^{\circ}30'00''$ - $3^{\circ}10'00''$ Lintang utara, $99^{\circ}01'$ - $100^{\circ}00''$ Bujur Timur dengan ketinggian 0 – 1.000 m di atas permukaan laut. Total luas wilayah kabupaten Asahan adalah 3732,97 Km persegi atau sekitar 373.297 Hektar.

b) Data penduduk terkait jenis pekerjaan kabupaten asahan

Berdasarkan data penduduk Kabupaten Asahan, terdapat 99 jenis pekerjaan formal dan non formal yang tersebar di berbagai sektor ekonomi. Sektor-sektor utama seperti pertanian, kehutanan, dan perikanan tetap menjadi penopang utama lapangan pekerjaan, sejalan dengan karakteristik wilayah yang didominasi oleh aktivitas agraris. Selain itu, sektor industri pengolahan dan perdagangan juga berperan penting dalam menyerap tenaga kerja, terutama di wilayah perkotaan. Jenis pekerjaan lainnya tersebar di sektor jasa, transportasi, konstruksi, dan layanan publik, yang turut memberikan kontribusi terhadap kesejahteraan masyarakat. Diversifikasi jenis pekerjaan ini mencerminkan adanya perkembangan ekonomi yang berkelanjutan di Kabupaten Asahan.

Tabel 6. Pekerjaan Formal di Kabupaten Asahan 2023

No	Pekerjaan Formal	Jumlah

c) Tingkat kepadatan penduduk di kabupaten asahan

Secara umum, rasio kepadatan penduduk didefinisikan sebagai angka yang menunjukkan perbandingan antara jumlah penduduk dengan luas wilayah, atau jumlah penduduk per kilometer persegi dalam periode tertentu. Berikut adalah data jumlah penduduk dan rasio kepadatan penduduk di Kabupaten Asahan pada tahun 2022.

Kecamatan Kota Kisaran Timur menjadi wilayah dengan kepadatan tertinggi, yakni 2.829 jiwa/km². Ini berarti setiap kilometer persegi wilayah Kota Kisaran Timur dihuni oleh sekitar 2.829 orang. Kecamatan Aek Kuasan berada di urutan kedua dengan kepadatan 1.908 jiwa/km², diikuti oleh Kecamatan Kota Kisaran Barat dengan 1.901 jiwa/km², Kecamatan Air Joman sebesar 600 jiwa/km², dan Kecamatan Meranti sebesar 538 jiwa/km². Kecamatan dengan kepadatan penduduk terendah adalah Kecamatan Bandar Pasir Mandoge dengan 49 jiwa/km², Kecamatan Sei Kepayang dengan 53 jiwa/km², dan Kecamatan Aek

Songsongan dengan 67 jiwa/km². Meskipun Kecamatan Bandar Pasir Mandoge dan Kecamatan Sei Kepayang memiliki luas wilayah yang besar, sebagian besar wilayah tersebut merupakan area perkebunan, baik yang dimiliki oleh perusahaan negara, perusahaan swasta, maupun masyarakat.

Tabel 8. Kepadatan Penduduk di Kabupaten Asahan Tahun 2022

d) Data usia penduduk di kabupaten asahan

Karakteristik penduduk berdasarkan usia dan jenis kelamin sangat penting dalam merencanakan pemenuhan kebutuhan dasar penduduk sesuai dengan kebutuhan spesifik setiap kelompok umur, seperti kebutuhan pangan, sandang, papan, pendidikan, kesehatan, dan pekerjaan. Setiap kelompok usia memiliki kebutuhan yang berbeda, misalnya, bayi dan balita membutuhkan asupan gizi yang baik dan perawatan kesehatan. Sementara itu, remaja perempuan memerlukan perhatian lebih pada peningkatan status kesehatan agar terhindar dari anemia saat memasuki usia reproduksi. Kelompok usia lanjut juga memerlukan layanan kesehatan khusus dan berbagai kebutuhan lainnya.

Berdasarkan jenis kelamin, penduduk Kabupaten Asahan mayoritas adalah laki-laki, berjumlah 400.372 jiwa atau 50,58 persen dari total penduduk, sedangkan jumlah penduduk perempuan sebanyak 391.120 jiwa, sehingga total penduduknya menjadi 791.492 jiwa. Seperti yang telah dijelaskan sebelumnya, meskipun kebutuhan dasar laki-laki dan perempuan seperti pangan, kesehatan, dan pendidikan relatif sama, ada perbedaan dalam kebutuhan khusus, seperti pakaian dan peralatan pribadi. Oleh karena itu, distribusi penduduk berdasarkan jenis kelamin ini harus menjadi pertimbangan bagi pemerintah dalam merencanakan pemenuhan kebutuhan masyarakatnya.

No	Struktur Umur	Laki-Laki	Perempuan	Total
		Jumlah	Jumlah	
1	0-19	137.746	129.175	266.921
2	20-39	133.451	127.612	261.063

4	60-74	30.838	33.078	63.916
5	75+	5 453	7 322	12.775
Jumlah		400.372	391 120	791.492

Tabel 9. Jumlah Penduduk di Kabupaten Asahan Tahun 2022

Sumber : Dinas Kependudukan dan Pencatatan Sipil Kabupaten Asahan

e) Pertumbuhan ekonomi kabupaten asahan

Perekonomian Kabupaten Asahan pada tahun 2022 berdasarkan Produk Domestik Regional Bruto (PDRB) atas dasar harga berlaku mencapai Rp 46,58 triliun, dengan PDRB per kapita sebesar Rp 59,13 juta. Pertumbuhan ekonomi Asahan pada tahun tersebut mencapai 4,66 persen, meningkat dibandingkan pertumbuhan tahun 2021 yang hanya sebesar 3,73 persen. Berdasarkan pendekatan produksi, pertumbuhan tertinggi terjadi pada Lapangan Usaha Transportasi dan Pergudangan dengan angka 8,48 persen, diikuti oleh Jasa Lainnya sebesar 7,29 persen, serta Pertanian, Kehutanan, dan Perikanan sebesar 6,78 persen. Tiga sektor utama yang memberikan kontribusi terbesar terhadap PDRB Asahan adalah Pertanian, Kehutanan, dan Perikanan sebesar 39,78 persen, diikuti oleh Industri Pengolahan sebesar 22,37 persen, dan Perdagangan Besar dan Eceran; Reparasi Mobil dan Sepeda Motor sebesar 19,11 persen (Badan Pusat Statistik Kabupaten Asahan).

Berdasarkan pendekatan pengeluaran, pertumbuhan terbesar terjadi pada Komponen Pengeluaran Konsumsi Rumah Tangga sebesar 4,58 persen, diikuti oleh Pembentukan Modal Tetap Bruto sebesar 3,55

persen, dan Pengeluaran Konsumsi Lembaga Non-Profit yang Melayani Rumah Tangga (LNPRT) sebesar 3,15 persen. Namun, Pengeluaran Konsumsi Pemerintah mengalami kontraksi sebesar 0,69 persen. Komponen Pengeluaran Konsumsi Rumah Tangga menyumbang kontribusi terbesar terhadap PDRB dengan 51,05 persen, diikuti oleh Pembentukan Modal Tetap Bruto sebesar 26,25 persen, dan Net Ekspor Barang dan Jasa sebesar 15,26 persen (Badan Pusat Statistik Kabupaten Asahan).

HASIL DAN PEMBAHASAN

Kemampuan Tanaman Mengkudu untuk Mencegah dan Mengobati Penyakit Kronis di Kabupaten Asahan

Mengkudu (*Morinda citrifolia*) adalah tanaman obat dari daerah tropis yang telah digunakan sejak lama dalam pengobatan tradisional di Asia Tenggara dan Kepulauan Pasifik. Tanaman ini diakui karena berbagai manfaat kesehatannya yang beragam (Abou Assi et al., 2019). Buah mengkudu kaya akan nutrisi dan bahan bioaktif alami, dengan lebih dari 200 fitokimia yang telah diidentifikasi. Produk berbasis mengkudu semakin diminati konsumen karena manfaat kesehatannya yang luas, efek samping minimal, dan ketersediaan bahan yang mudah ditemukan. Tanaman ini tetap potensial dalam pencegahan berbagai penyakit. (Wang et al., 2024). Perkembangan penelitian modern yang menemukan lebih banyak manfaatnya, dalam pengobatan tradisional maupun dalam industri kesehatan dan pertanian.

Berbagai bagian tanaman mengkudu termasuk akar, kulit batang, daun, dan buahnya, digunakan dalam pengobatan tradisional untuk mengatasi berbagai penyakit. Hasil penelitian tentang senyawa metabolit sekunder pada tumbuhan mengkudu menunjukkan bahwa buah mengkudu mengandung senyawa flavonoid, tanin, glikosida, fenol, terpernoid, alkaloid, saponin, triterpenoid dan fitat (Oluwafemi Oyabambi et al., 2023). Flavonoid merupakan polifenol utama yang ada pada buah mengkudu (Chen et al., 2024). Konsumsi makanan kaya flavonoid memberikan manfaat bagi kesehatan. Misalnya, menunjukkan hubungan antara konsumsi antosianin dan pengurangan peradangan (Galatro et al., 2024). Glikosida merupakan

Senyawa yang terdiri dari bagian glikon yang terikat pada aglikon non-gula melalui ikatan glikosidik (Chen et al., 2024). Fenol dapat menangani penyakit kronis seperti tuberkulosis dan diabetes karena manfaat fungsional dan kesehatan yang diperoleh dari fitokimia, seperti senyawa fenolik dan antioksidan secara keseluruhan (Dzah et al., 2024). Alkaloid adalah keluarga besar fitokimia yang mengandung nitrogen dengan banyak khasiat obat. Terpenoid yang diisolasi dari tumbuhan memiliki aktivitas antidiabetes dan antihipertensi (Asafo-agyei et al., 2023). Buah Mengkudu membantu mengatur enzim glukosa, menjaga gula darah normal, dan melindungi hati. Sifat antihiperglikemiknya diduga berasal dari alkaloid, flavonoid, triterpenoid, mineral, dan vitamin (Haque & Rao, 2019).

Sumber: Data sekunder diolah 2022

Penelitian tentang senyawa metabolit sekunder pada tanaman mengkudu menunjukkan bahwa buah mengkudu mengandung flavonoid, tanin, glikosida, fenol, terpenoid, alkaloid, saponin, triterpenoid, dan fitat. Dari senyawa-senyawa tersebut, terdapat lima senyawa yang memiliki kemampuan untuk mencegah dan mengobati tuberkulosis dan diabetes, yaitu flavonoid,

glikosida, fenol, alkaloid, dan triterpenoid. Tuberkulosis (TB) adalah penyakit yang sangat menular yang disebabkan oleh *Mycobacterium tuberculosis* atau *M. bovis* pada manusia dan hewan. Penyebab tuberkulosis yang berupa penyembuhannya dapat dicegah dan diobati melalui senyawa flavonoid dari tanaman mengkudu dengan cara meningkatkan sistem kekebalan tubuh dan menghambat pertumbuhan bakteri, flavonoid memiliki kemampuan untuk mengganggu mekanisme mikobakteri tertentu seperti gangguan sintesis asam nukleat dan asam mikolat (Omukhua-uyi A et al., 2023; Okodawa et al., 2024).

Diabetes adalah penyakit inflamasi kronik yang menjadi ancaman serius bagi kesehatan manusia, disebabkan oleh ketidakmampuan tubuh untuk mengatur kadar gula darah akibat kekurangan produksi insulin atau resistensi terhadap insulin, dan dipengaruhi oleh interaksi antara faktor genetik dan lingkungan (Wang et al., 2024). Penyebab diabetes yang berupa penyembuhannya dapat di cegah melalui senyawa flavonoid dari tanaman mengkudu yang meningkatkan sensitivitas insulin, menghambat enzim pencernaan karbohidrat, dan menurunkan produksi glukosa oleh hati (Bouyahya et al., 2024; Shen et al., 2024; Bondono et al., 2021). Glikosida memiliki kemampuan untuk mencegah dan mengobati diabetes dengan efek terapeutik yang kuat. Senyawa ini terdiri dari bagian glikon yang terikat pada aglikon non-gula melalui ikatan glikosidik. Fenol memiliki potensi untuk mencegah diabetes melalui berbagai mekanisme, termasuk meningkatkan sensitivitas insulin, mengurangi peradangan, menghambat enzim yang terlibat dalam metabolisme glukosa, dan melindungi sel-sel pankreas dari

kerusakan oksidatif (Chen et al., 2024). Alkaloid dan triterpenoid telah terbukti memiliki potensi untuk mengobati diabetes melalui berbagai mekanisme, seperti meningkatkan sensitivitas insulin, mengurangi resistensi insulin, dan menurunkan kadar gula darah (Haque & Rao, 2019).

Jenis penyakit dan jumlah penderita penyakit di Kabupaten Asahan

Penyakit di klusterkan menjadi dua, yaitu akut dan kronis. Penyakit akut adalah kondisi medis yang muncul secara tiba-tiba dan berlangsung dalam waktu singkat dengan penyembuhan kurang dari 6 bulan, dan umumnya dapat diobati (El- Gilany et al., 2023). Penyakit kronis merupakan kondisi kesehatan yang membutuhkan penanganan jangka panjang, dengan waktu penyembuhan yang lebih dari 6 bulan. Penyakit kronis adalah masalah kesehatan yang serius dan menjadi penyebab utama kematian di seluruh dunia (Grover & Joshi, 2019).

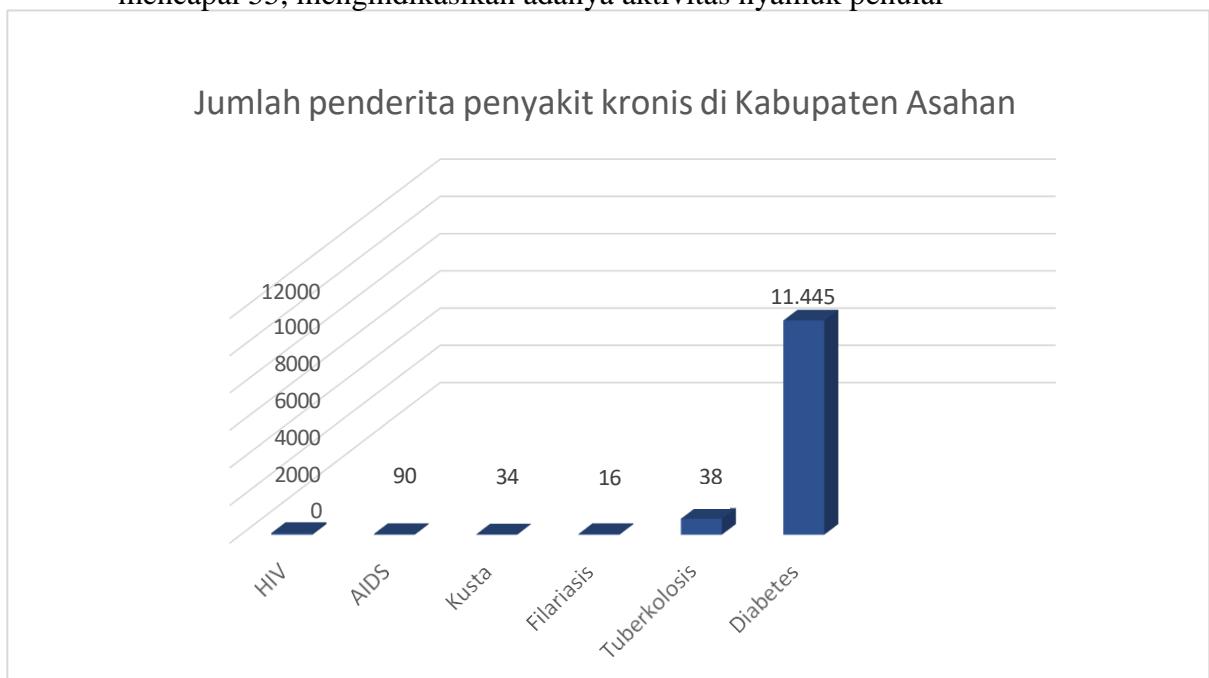

Tabel 10. Penderita Penyakit Akut Di kabupaten Asahan 2022

No	Penderita Penyakit Akut	Jumlah
1	Malaria (Suspek)	2.981
2	Pneumonia Balita	0
3	Tetanus	0
4	Campak (Suspek)	0

Gambar 3. Penderita Penyakit Kronis di Kabupaten Asahan

berdasarkan data grafik diatas, Kabupaten Asahan, Provinsi Sumatera Utara, tercatat mengalami enam jenis penyakit kronis. Data menunjukkan bahwa terdapat 90 kasus HIV, 34 kasus AIDS, 16 kasus Kusta, 38 kasus Filariasis, 847 kasus Tuberkulosis, dan 11.445 kasus Diabetes Melitus (Dinas Kesehatan Provinsi Sumatera Utara). Tuberkulosis dan diabetes merupakan dua penyakit kronis yang prevalensinya tinggi di Kabupaten Asahan, menjadi ancaman serius bagi kesehatan masyarakat. Oleh karena itu, perlu dicari alternatif lain untuk pencegahan dan pengobatan kedua penyakit ini.

Potensi UMOT Untuk Menghasilkan Produk Turunan Dari Tanaman

Mengkudu Berdasarkan Karakterisasi Lokasi

Kabupaten Asahan memiliki potensi besar untuk mengembangkan UMOT (Usaha Mikro Obat Tradisional), terutama dengan memanfaatkan mengkudu sebagai bahan baku. Mengkudu dikenal memiliki khasiat obat tradisional, terutama untuk mengatasi masalah kesehatan seperti tekanan darah tinggi, diabetes, dan infeksi. UMOT di Asahan dapat berkembang pesat karena beberapa faktor:

a) Wilayah

Asahan memiliki iklim tropis dan tanah subur, ideal untuk pengembangan tanaman herbal seperti mengkudu.

b) Ekonomi Lokal

Pertanian, kehutanan, dan perikanan merupakan sektor utama di Asahan, dengan banyak penduduk bekerja di sektor agraris. Pengembangan UMOT dapat memberikan diversifikasi ekonomi bagi para petani.

c) Populasi dan Tenaga Kerja

Asahan memiliki populasi besar dan tenaga kerja yang siap terlibat dalam pengembangan dan pemasaran produk turunan mengkudu.

d) Ekosistem Ekonomi

Pertumbuhan ekonomi Asahan yang positif menandakan adanya peningkatan daya beli masyarakat dan peluang pasar yang terbuka

untuk produk turunan mengkudu.

e) Potensi Produk Turunan

Mengkudu dapat diolah menjadi jus, kapsul ekstrak, teh herbal, dan minyak esensial. Pengembangan produk ini melalui UMOT dapat meningkatkan kesejahteraan petani lokal dan diversifikasi produk pertanian.

Dengan memanfaatkan potensi alam, sumber daya manusia, dan dukungan ekonomi, Asahan memiliki peluang besar untuk menjadi pusat pengembangan UMOT yang menghasilkan produk turunan mengkudu. Hal ini dapat meningkatkan perekonomian lokal dan memberikan alternatif kesehatan berbasis tanaman obat bagi masyarakat luas.

Berdasarkan jenis penyakit kronis dan jumlah penderita penyakit kronis

Kabupaten Asahan memiliki potensi besar untuk mengembangkan Usaha Mikro Obat Tradisional (UMOT) yang memanfaatkan tanaman mengkudu sebagai bahan baku utama. Mengkudu memiliki khasiat obat tradisional, terutama untuk mengatasi berbagai masalah kesehatan, termasuk penyakit kronis seperti tuberkulosis dan diabetes.

Data dari Dinas Kesehatan Provinsi Sumatera Utara menunjukkan bahwa tuberkulosis dan diabetes merupakan dua penyakit kronis dengan prevalensi tinggi di Kabupaten Asahan. Hal ini menjadi ancaman serius bagi kesehatan masyarakat dan menunjukkan perlunya alternatif pencegahan dan pengobatan.

Penelitian menunjukkan bahwa buah mengkudu mengandung senyawa metabolit sekunder seperti flavonoid, tanin, glikosida, fenol, terpenoid, alkaloid, saponin, triterpenoid, dan fitat. Lima senyawa di antaranya, yaitu flavonoid, glikosida, fenol, alkaloid, dan triterpenoid, terbukti memiliki kemampuan untuk mencegah dan mengobati tuberkulosis dan diabetes.

Pemanfaatan khasiat mengkudu dalam pengembangan UMOT di Kabupaten Asahan dapat memberikan manfaat yang signifikan:

a) Solusi Kesehatan

Produk turunan dari mengkudu, seperti jus, kapsul ekstrak, teh herbal, dan minyak esensial, dapat menjadi alternatif pengobatan dan pencegahan yang aman dan efektif untuk penyakit kronis.

b) Diversifikasi Ekonomi

UMOT dapat memberikan peluang usaha baru bagi petani lokal, meningkatkan pendapatan mereka, dan mengurangi ketergantungan pada komoditas utama seperti kelapa sawit, karet, dan kakao.

c) Pengembangan Ekonomi Lokal

Produk UMOT berbasis mengkudu memiliki potensi untuk menjadi komoditas unggulan Kabupaten Asahan, baik untuk pasar lokal maupun ekspor.

d) Peningkatan Kesejahteraan

UMOT dapat menciptakan lapangan kerja baru dan meningkatkan kesejahteraan masyarakat di Kabupaten Asahan.

Potensi pembentukan UMOT di kabupaten Asahan di dukung dari ketersediaan bahan baku. Produksi mengkudu di Kabupaten Asahan dengan tren positif dari tahun 2019-2022 yaitu, 237 kg pada tahun 2019, 994 kg pada tahun 2020, 1725 kg pada tahun 2021, dan 1556 kg pada tahun 2022 (Badan Pusat Statistik Provinsi Sumatera Utara). Ketersediaan bahan baku yang meningkat ini UMOT yang dihasilkan dari bahan baku mengkudu mengurangi kebutuhan modal awal. Pangsa pasar utama dari produk turunan tanaman mengkudu dari UMOT adalah kabupaten asahan. Ketersediaan lembaga keuangan di kabupaten asahan cukup banyak yang dapat dimanfaatkan sebagai sumber modal awal. Berdasarkan data dari dinas koperasi, perdagangan dan perindustrian terdapat sebanyak 655 koperasi yang aktif di kabupaten Asahan.

Konsumen potensial UMOT dari produk turunan mengkudu adalah individu yang cenderung membeli secara berulang, disesuaikan dengan kondisi penyakit kronis. Kabupaten Asahan memiliki enam jenis riwayat penyakit utama, yaitu HIV, AIDS, Kusta, Filariasis, Tuberkulosis, dan Diabetes (Dinas Kesehatan Provinsi Sumatera Utara). Tanaman mengkudu memiliki kemampuan untuk mencegah dan mengobati Tuberkulosis dan Diabetes berdasarkan metabolitnya, dengan jumlah penderita Tuberkulosis yaitu sebanyak 847 orang dan Diabetes sebanyak 11.445 orang.

KESIMPULAN DAN SARAN

Kesimpulan

1. Manfaat Tanaman Mengkudu (*Morinda Citrifolia*): Penelitian ini berhasil mengidentifikasi beragam manfaat tanaman mengkudu (*Morinda Citrifolia*) yang terbukti efektif dalam pencegahan dan pengobatan berbagai penyakit kronis seperti tuberkulosis dan diabetes.
2. Kesesuaian Manfaat Tanaman Mengkudu di Kabupaten Asahan: Temuan dalam penelitian menunjukkan bahwa manfaat tanaman mengkudu sangat sesuai untuk mencegah dan mengobati penyakit kronis yang prevalensinya tinggi di Kabupaten Asahan, seperti tuberkulosis dan diabetes.
3. Potensi Tanaman Mengkudu pada UMOT sebagai produk turunan di Kabupaten Asahan: Potensi tanaman mengkudu pada Usaha Mikro Obat Tradisional (UMOT) sebagai produk turunan di Kabupaten Asahan sangat besar, terutama dalam penyediaan solusi kesehatan yang berkelanjutan dan meningkatkan perekonomian lokal.

Saran

1. Kolaborasi dan Sinergi: Mendorong kolaborasi lintas sektor antara petani, pengusaha UMOT, peneliti, dan pemerintah untuk memaksimalkan potensi tanaman mengkudu dalam pengembangan UMOT di Kabupaten Asahan.
2. Penguatan Infrastruktur: Menyediakan infrastruktur yang mendukung pengembangan UMOT, seperti program pelatihan, pendanaan, dan pemasaran, guna memastikan keberlanjutan dan kesuksesan usaha.
3. Edukasi Masyarakat: Melakukan edukasi yang intensif kepada masyarakat tentang manfaat kesehatan dari tanaman mengkudu dan produk UMOT,

sehingga meningkatkan minat konsumsi produk lokal dan mendukung perekonomian daerah.

4. Standarisasi Produk: Mendorong standarisasi kualitas produk UMOT berbasis mengkudu untuk menjamin keamanan, kualitas, dan khasiat produk yang dihasilkan.
5. Inovasi dan Diversifikasi: Mendorong inovasi produk dan diversifikasi yang berkelanjutan untuk memperluas pasar, meningkatkan daya saing, dan memperkaya produk UMOT di pasaran lokal maupun ekspor.

Dengan penerapan saran-saran di atas, diharapkan pengembangan UMOT berbasis tanaman mengkudu di Kabupaten Asahan dapat memberikan manfaat yang maksimal bagi kesehatan masyarakat, ekonomi lokal, serta meningkatkan kesejahteraan petani dan pelaku usaha mikro di daerah tersebut.

B. Daftar judul artikel menggunakan kata kunci Noni Compound

No	Judul	Tahun
1	Enhancing bioactive <i>compounds</i> extraction from <i>noni</i> leaves (<i>Morinda citrifolia</i>) by enzymes-assisted extraction	2024
2	Multiple metabolite profiles uncover remarkable bioactive <i>compounds</i> and metabolic characteristics of <i>noni</i> fruit (<i>Morinda citrifolia L.</i>) at various stages of ripeness	2024
3	Antimicrobial and anticancer activities of Hainan dry <i>noni</i> fruit alcoholic extracts and their novel <i>compounds</i> identification using UPLC-Q-Exactive Orbitrap-MS/MS	2022
4	Growth of <i>noni</i> fruits (<i>Morinda citrifolia L.</i>) and accumulation of phenolic <i>compounds</i> during fruit development	2014
5	Insight into peroxidase-mediated <i>Morinda citrifolia L.</i> (<i>noni</i>) fruit juice browning and precipitation, and a thermal inactivation strategy	2025
6	Chemical constituents from <i>noni</i> (<i>Morinda citrifolia L.</i>) fruit juice and their chemotaxonomic significance	2024
7	<i>Noni</i> (<i>Morinda citrifolia</i>) fruit and by-products: A comprehensive review of its chemical compositions, health-promoting effects, safety assessment and industrial applications	2024
8	Insight into the changes in active metabolite profiles of <i>noni</i> (<i>Morinda citrifolia L.</i>) fruit subjected to different drying treatments	2024
9	Microencapsulation of <i>noni</i> fruit extract using gum arabic and maltodextrin – Optimization, stability and efficiency International Journal of Biological Macromolecules June 2024	2024
10	Postharvest ripening improves the texture and active ingredients of <i>noni</i> fruit (<i>Morinda citrifolia L.</i>) for processing	2024
11	Bioactivity and influence on colonic microbiota of polyphenols from <i>noni</i> (<i>Morinda citrifolia L.</i>) fruit under simulated gastrointestinal digestion	2024
12	Structural characterization of <i>noni</i> (<i>Morinda citrifolia L.</i>) pectin and its inhibitory activity on pancreatic lipase	2024
13	Effect of temperature regulation on microbial community, volatile flavours, amino acid profiles, and iridoid glycosides during <i>noni</i> (<i>Morinda citrifolia L.</i>) fruit fermentation	2025
14	Divine <i>noni</i> 's protective impact on Swiss albino mice's short-term memory impairment caused by cyclophosphamide: A behavioral and biochemical approach	2024
15	Insight into the effects of different ripeness levels on the quality and flavor chemistry of <i>Noni</i> fruit (<i>Morinda citrifolia L.</i>)	2024
16	Iridoid glycosides from <i>noni</i> (<i>Morinda citrifolia L.</i>) fruit pomace: A novel booster strategy for its extraction and will its α -glucosidase inhibitory be increased by acetylation?	2024
17	Cold damage affects the quality of <i>noni</i> fruits (<i>Morinda citrifolia L.</i>)	2023
18	Effect of combined ultrasonic and enzymatic extraction technique on the quality of <i>noni</i> (<i>Morinda citrifolia L.</i>) juice	2023
19	Constituent analysis, laxative activity, and toxicological evaluation of methanol extract of <i>noni</i> fruit (<i>Morinda citrifolia L.</i> , Rubiaceae)	2023
20	Acetobacter sp. improves the undesirable odors of fermented <i>noni</i> (<i>Morinda citrifolia L.</i>) juice	2023
