KATA PENGANTAR

Alhamdulillahirabbil'alamin, segala puji dan syukur penulis panjatkan ke hadirat Allah SWT yang telah melimpahkan rahmat, karunia, dan hidayah-Nya sehingga penulis dapat menyelesaikan skripsi ini dengan judul “Implementasi Algoritma Analytic Hierarchy Process (AHP) pada Mesin Penetasan Telur Ayam Berbasis Internet of Things (IoT)”. Skripsi ini disusun sebagai salah satu syarat untuk memperoleh gelar Sarjana Komputer pada Program Studi Teknologi Informasi, Fakultas Ilmu Komputer dan Teknologi Informasi (FIKTI), Universitas Muhammadiyah Sumatera Utara (UMSU), Medan.

Penulis tentunya berterima kasih kepada berbagai pihak dalam dukungan serta doa dalam penyelesaian skripsi. Penulis juga mengucapkan terima kasih kepada:

1. Bapak Prof. Dr. Agussani, M.AP., Rektor Universitas Muhammadiyah Sumatera Utara (UMSU)
2. Bapak Dr. Al-Khowarizmi, S.Kom., M.Kom. Dekan Fakultas Ilmu Komputer dan Teknologi Informasi (FIKTI) UMSU.
3. Ibu Fatma Sari Hutagalung S.Kom., M.Kom. Ketua Program Studi Teknologi Informasi
4. Bapak Mhd. Basri, S.Si, M.Kom Sekretaris Program Studi Teknologi Informasi
5. Bapak Andi Zulherry, S.Kom., M.Kom Pembimbing Skripsi
6. Ayah tercinta (Alm.) Bapak Sudaryono, meskipun engkau telah tiada, semangat dan doamu selalu hidup dalam setiap langkahku. Terima kasih atas cinta, perjuangan, dan nilai-nilai hidup yang kau wariskan. Semoga Allah SWT menempatkanmu di tempat terbaik di sisi-Nya.

7. Ibunda tercinta saya, Ibu Sukartinah yang selalu mendoakan, memberi semangat, dan menjadi sumber kekuatan dalam setiap langkah penulis.
8. Kakak dan abang kandung penulis yang selalu memberikan semangat dan dukungan, baik secara langsung maupun tidak langsung. Terima kasih atas ke bersamaan, tawa, serta dorongan yang membuat penulis tidak merasa sendiri dalam proses ini.
9. Semua pihak yang terlibat langsung ataupun tidak langsung yang tidak dapat penulis ucapkan satu-persatu yang telah membantu penyelesaian skripsi ini

ANALISIS SENTIMEN GAME GENSHIN IMPACT UNTUK MENGETAHUI REAKSI DAN HARAPAN PEMAIN MENGGUNAKAN METODE NAIVE BAYES

ABSTRAK

Penelitian ini bertujuan untuk menganalisis sentimen komentar pengguna terhadap game Genshin Impact yang diambil dari tiga video resmi di kanal YouTube berdasarkan tiga aspek: Game, Event, dan Karakter. Komentar-komentar tersebut diklasifikasikan menjadi dua kategori sentimen, yaitu positif dan negatif, dengan menggunakan algoritma Multinomial Naïve Bayes. Proses pengolahan data mencakup web scraping, pelabelan otomatis dengan VADER Sentiment Analysis, pra-pemrosesan teks (case folding, cleansing, tokenizing, stopword removal, lemmatizing), serta pembobotan menggunakan metode TF-IDF.

Untuk mengatasi ketidakseimbangan data, digunakan metode SMOTE agar distribusi sentimen lebih merata. Model kemudian dievaluasi menggunakan metrik akurasi, precision, recall, dan f1-score. Hasil menunjukkan bahwa aspek Event memiliki performa terbaik dengan akurasi sebesar 88% dan f1-score sebesar 93%. Sedangkan aspek Game dan Karakter masing-masing memperoleh akurasi 78% dan 76%. Temuan ini menunjukkan bahwa algoritma Naïve Bayes efektif digunakan dalam mengklasifikasikan sentimen komentar pengguna YouTube terhadap konten game. Visualisasi seperti wordcloud dan pie chart turut mendukung interpretasi terhadap distribusi sentimen dan kata kunci dominan dari tiap aspek.

Kata Kunci: Analisis Sentimen, Genshin Impact, Komentar YouTube, VADER, TF-IDF, Naïve Bayes

SENTIMENT ANALYSIS OF GENSHIN IMPACT GAME TO KNOW PLAYER REACTIONS AND EXPECTATIONS USING THE NAIVE BAYES METHOD

ABSTRACT

This study aims to analyze the sentiment of user comments on the game Genshin Impact, taken from three official videos on YouTube channels, based on three aspects: Game, Event, and Character. These comments were classified into two sentiment categories: positive and negative, using the Multinomial Naïve Bayes algorithm. The data processing process included web scraping, automatic labeling with VADER Sentiment Analysis, text preprocessing (case folding, cleansing, tokenizing, stopword removal, lemmatizing), and weighting using the TF-IDF method.

To address data imbalance, the SMOTE method was used to ensure a more even distribution of sentiment. The model was then evaluated using accuracy, precision, recall, and f1-score metrics. The results showed that the Event aspect performed best with an accuracy of 88% and an f1-score of 93%. Meanwhile, the Game and Character aspects achieved accuracies of 78% and 76%, respectively. These findings demonstrate that the Naïve Bayes algorithm is effective in classifying the sentiment of YouTube user comments on gaming content. Visualizations such as word clouds and pie charts also support the interpretation of the distribution of sentiment and dominant keywords from each aspect.

Keywords: Sentiment Analysis, Genshin Impact, YouTube Comments, VADER, TF-IDF, Naïve Bayes

BAB I

PENDAHULUAN

1.1 Latar Belakang Masalah

Industri game online terus mengalami pertumbuhan signifikan di Indonesia. Salah satu judul game yang berhasil meraih popularitas global serta memiliki basis pemain yang kuat di Indonesia adalah Genshin Impact. Game yang dikembangkan oleh HoYoverse ini dikenal tidak hanya karena kualitas grafik dan alur cerita yang menarik, tetapi juga karena memiliki komunitas pemain yang aktif, termasuk dalam kolom komentar kanal YouTube resmi Genshin Impact. Komentar-komentar dari pemain tersebut dapat menjadi sumber informasi yang sangat kaya dalam memahami opini, persepsi, dan sentimen pengguna terhadap pembaruan konten, fitur karakter, maupun kebijakan dalam game.

Berdasarkan pengamatan awal terhadap beberapa komentar, terlihat bahwa mayoritas pengguna memberikan tanggapan yang bersifat positif, terutama saat merespons karakter baru atau pembaruan konten yang dinilai memuaskan.

Meskipun Genshin Impact memiliki komunitas pemain yang aktif dan banyak memberikan komentar di platform seperti YouTube, belum banyak penelitian yang secara sistematis menganalisis sentimen dari komentar-komentar tersebut. Padahal, opini pemain terhadap karakter baru, pembaruan konten, atau event dalam game dapat menjadi indikator penting dalam mengevaluasi kepuasan pengguna. Oleh karena itu, diperlukan sebuah metode untuk mengolah dan mengklasifikasikan komentar pengguna secara otomatis guna mengetahui persepsi umum terhadap konten dalam game Genshin Impact.

Salah satu metode yang banyak digunakan untuk memahami opini publik dari data teks adalah analisis sentimen. Tujuan dari analisis ini adalah untuk mengklasifikasikan teks ke dalam kategori sentimen tertentu, seperti positif, negatif. Dalam penelitian ini, algoritma Naïve Bayes, khususnya varian Multinomial Naïve Bayes, peneliti pilih karena memiliki model yang sederhana, proses komputasi yang efisien, serta mampu memberikan hasil klasifikasi yang cukup akurat untuk data teks.

Pada penelitian ini, komentar pengguna mengenai game Genshin Impact yang diperoleh dari kanal YouTube resmi akan dianalisis untuk mengetahui persebaran sentimennya. Proses analisis diawali dengan tahapan pra-pemrosesan data (preprocessing), yang meliputi case folding (mengubah semua huruf menjadi huruf kecil), cleansing (menghapus karakter atau kata yang tidak relevan), tokenizing (memecah kalimat menjadi kata-kata), stopword removal (menghapus kata-kata umum yang tidak memiliki makna penting), serta transformasi TF-IDF untuk mengubah teks menjadi bentuk numerik. Setelah itu, data yang telah dibersihkan dan diubah ke dalam bentuk vektor akan diklasifikasikan menggunakan algoritma Multinomial Naïve Bayes untuk memetakan komentar ke dalam kategori sentimen positif, negatif..

Berbagai penelitian sebelumnya telah membuktikan efektivitas Naïve Bayes dalam menganalisis teks, termasuk pada Platform YouTube. Misalnya, dalam penelitian oleh Ahmadi metode Naïve Bayes digunakan untuk menganalisis sentimen masyarakat terhadap kasus COVID-19 pada media sosial YouTube dan menghasilkan akurasi sebesar 74% dalam mengklasifikasikan komentar menjadi positif, negatif, dan netral. (Ahmadi et al., 2021).

Dalam bidang layanan digital, Anggita dan Ikamah (2020) membandingkan algoritma Naïve Bayes dan Support Vector Machine (SVM) yang dioptimasi dengan Particle Swarm Optimization dalam analisis sentimen layanan pengiriman barang, di mana studi ini menyoroti keunggulan masing-masing metode dalam konteks klasifikasi. (Keputusan Dirjen Penguatan Riset dan Pengembangan Ristek Dikti & Dyah Anggita, 2020).

Sementara itu, Munthe dan rekan-rekannya (2021) menerapkan Naïve Bayes untuk menganalisis sentimen komentar pada saluran YouTube food vlogger berbahasa Indonesia. Penelitian ini bertujuan untuk memahami persepsi penonton terhadap konten yang disajikan oleh food vlogger. (Munthe et al., n.d.) Hal yang serupa juga dilakukan oleh Harahap dan Kurniawan (2024) dalam konteks kuliner, di mana sentimen penonton terhadap food vlogger diklasifikasikan secara sistematis (Bayes et al., n.d.)

Selain itu, Anggraini et al. (2021) mengaplikasikan metode Naïve Bayes untuk mengklasifikasikan sentimen masyarakat terhadap kebijakan pemerintah seperti Kartu Prakerja, yang menunjukkan bagaimana metode ini dapat digunakan untuk menangkap opini publik dalam isu-isu kebijakan (Anggraini & Utami, 2021).

Di Platform media sosial lain seperti Twitter, Ridwansyah (2020) menggunakan text mining dan Naïve Bayes untuk menganalisis sentimen masyarakat dunia terhadap kota Medan, dengan pendekatan validasi silang K- Fold untuk meningkatkan akurasi Model (Ridwansyah, 2022).

Adriyendi dan Melia (2020) melakukan perbandingan performa Naïve Bayes dan K-Nearest Neighbor dalam pengklasifikasian layanan teknologi informasi,

yang menunjukkan bahwa metode ini juga fleksibel diterapkan di sektor pelayanan TI (Adriyendi & Melia, 2020).

Penelitian oleh Toresa et al. (2023) membandingkan algoritma C4.5 dan Naïve Bayes dalam mengukur tingkat kepuasan mahasiswa terhadap Platform Edlink, dan Naïve Bayes berhasil memberikan hasil klasifikasi yang kompetitif. (Toresa et al., 2023).

Dalam konteks lebih aktual, Firsttama et al. (2024) menggunakan Naïve Bayes untuk menganalisis komentar publik terhadap Konferensi Tingkat Tinggi G20 melalui kanal YouTube, dan berhasil memetakan persepsi publik secara efektif. (Firsttama et al., 2024).

Yang paling relevan dengan penelitian ini adalah studi oleh Pratama (2024), yang menganalisis sentimen ulasan aplikasi InDrive di Google Play Store menggunakan metode Naïve Bayes. Penelitian ini membuktikan bahwa teknik tersebut mampu mengidentifikasi komentar positif dan negatif secara efektif, setelah melalui proses web scraping dan Preprocessing teks (Ramadhan, n.d.).

Melihat banyaknya studi yang berhasil menggunakan Naïve Bayes dalam berbagai konteks data teks—baik pada media sosial, ulasan aplikasi, maupun Platform video seperti YouTube—maka metode ini juga sangat potensial untuk diterapkan dalam menganalisis sentimen komentar pemain Genshin Impact. Penelitian ini bertujuan untuk mengisi kekosongan studi pada domain gaming, khususnya komentar pemain di YouTube, yang belum banyak dianalisis secara akademik

1.2 Rumusan Masalah

Dalam penelitian ini, dirumuskan beberapa pertanyaan yang menjadi dasar untuk mencapai tujuan yang telah ditetapkan. Rumusan masalah tersebut dirancang untuk membantu peneliti dalam merancang alur kerja, menentukan metode yang sesuai, serta memperoleh hasil yang relevan dan terarah. Adapun rumusan masalah dalam penelitian ini adalah sebagai berikut:

1. Bagaimana proses pengumpulan dan Preprocessing data komentar pemain dari kanal YouTube resmi Genshin Impact?
2. Seberapa baik performa metode Naïve Bayes dalam mengklasifikasikan sentimen komentar menjadi positif, negatif?
3. Bagaimana distribusi sentimen komentar pemain terhadap konten- konten dalam game Genshin Impact?

1.3 Batasan Masalah

Agar penelitian ini lebih terarah dan fokus, terdapat beberapa batasan masalah yang diterapkan sebagai berikut:

1. Data diperoleh dari komentar 3 video terbaru pada kanal YouTube resmi Genshin Impact.
2. Preprocessing teks mencakup: case folding, tokenisasi, stopword removal, dan stemming.
3. Representasi data menggunakan metode TF-IDF.
4. Algoritma klasifikasi yang digunakan adalah Naïve Bayes Multinomial.
5. Evaluasi Model dilakukan menggunakan akurasi, Precision, Recall, dan F1-score.

1.4 Tujuan Penelitian

Penelitian ini bertujuan untuk :

1. Memproses data komentar pemain dari kanal YouTube resmi Genshin Impact.
2. Mengklasifikasikan komentar berdasarkan sentimen menggunakan algoritma Naïve Bayes.
3. Menyajikan distribusi sentimen untuk memberikan gambaran persepsi pemain terhadap game.

1.5 Manfaat Penelitian

Penelitian ini diharapkan bermanfaat sebagai berikut : Bagi Akademis

1. Menambah referensi ilmiah dalam bidang analisis sentimen, khususnya pada domain game online.
2. Memberikan contoh implementasi nyata dari metode Naïve Bayes pada data sosial media berbasis teks bahasa Indonesia.
3. Membuka peluang untuk pengembangan metode klasifikasi lain dalam penelitian lanjutan, seperti kombinasi dengan metode pembobotan atau ensemble learning.

Bagi Komunitas

1. Memberikan informasi objektif bagi pemain atau komunitas penggemar mengenai tren sentimen dan opini komunitas terhadap event atau karakter tertentu dalam game.
2. Membantu content creator (YouTuber, streamer, atau penulis blog game) memahami minat dan perhatian mayoritas audiens.

Bagi Peneliti Selanjutnya

1. Menjadi rujukan untuk pengembangan penelitian serupa, misalnya dengan metode klasifikasi lain (Decision Tree, Deep Learning), atau Platform komentar yang berbeda seperti Reddit, Twitter, atau Discord.
2. Menawarkan landasan untuk eksplorasi topik analisis emosi (emotion detection) yang lebih dalam dibanding sekadar klasifikasi sentimen.

BAB II

LANDASAN TEORI

2.1 Genshin Impact

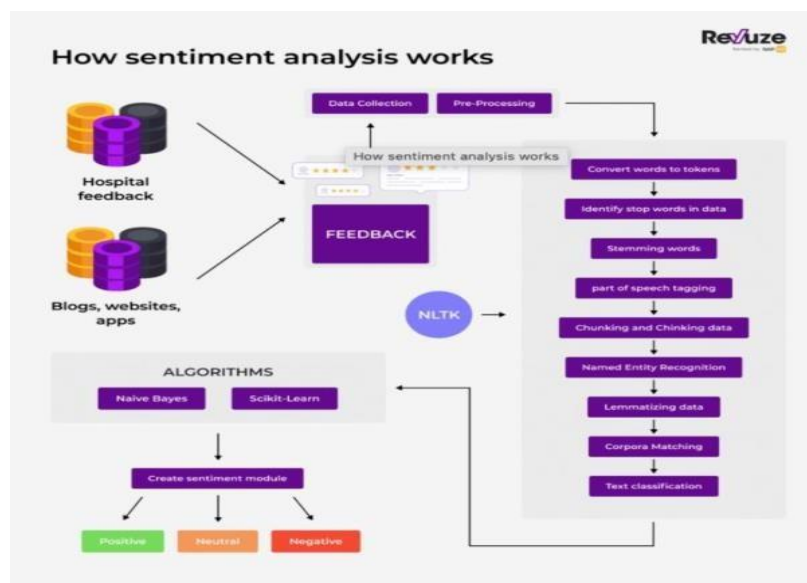

Genshin Impact Genshin Impact adalah permainan aksi RPG (Role Playing Game) dunia terbuka yang dikembangkan oleh miHoYo dan dirilis pertama kali pada tahun 2020. Game ini tersedia di berbagai Platform seperti Android, iOS, Windows, dan PlayStation. Dalam Genshin Impact, pemain menjelajahi dunia fantasi bernama Teyvat dengan berbagai karakter yang memiliki elemen dan kemampuan unik.

Genshin Impact memiliki komunitas pemain yang sangat besar dan aktif secara global. Selain gameplay dan karakter, update berkala dari pengembang juga memicu diskusi luas di berbagai media sosial. YouTube menjadi salah satu Platform utama tempat para pemain mengekspresikan opini, baik dalam bentuk komentar positif, negatif. Oleh karena itu, komentar pengguna YouTube terhadap konten Genshin Impact menjadi sumber data yang relevan dan kaya untuk dilakukan analisis sentimen.

2.2 Analisi Sentimen

Analisis sentimen merupakan metode yang digunakan untuk mengevaluasi opini atau pandangan yang disampaikan melalui tulisan maupun ucapan, dengan tujuan untuk mengetahui apakah opini tersebut bernada positif, negatif. Secara umum, analisis sentimen bertujuan untuk mengidentifikasi, mengumpulkan, menganalisis, dan menginterpretasikan emosi atau sikap yang terkandung dalam suatu teks guna memahami pandangan pengguna terhadap suatu topik, merek, produk, atau isu tertentu.

Proses analisis sentimen melibatkan beberapa tahapan, mulai dari pengumpulan data, pra-pemrosesan teks, klasifikasi sentimen, hingga interpretasi hasil. Data yang diperoleh dalam bentuk teks akan dibersihkan dan kemudian dikategorikan ke dalam kelas sentimen seperti positif, negatif. Setelah itu, analisis lanjutan dapat dilakukan untuk mengekstrak informasi yang lebih mendalam, misalnya dengan mengidentifikasi tema atau kata kunci yang sering muncul dalam sentimen tertentu. Menurut Anna Potapenko (2022), analisis sentimen dapat diterapkan pada berbagai jenis data, seperti unggahan media sosial, ulasan pelanggan, dan sumber data lainnya. Informasi yang diperoleh dari analisis ini dapat membantu perusahaan memahami perilaku konsumen serta mengamati tren yang sedang berkembang. Hasilnya pun dapat dijadikan dasar untuk mendukung pengambilan keputusan bisnis dan merancang strategi pemasaran yang lebih efektif. Gambar 1 berikut ini menampilkan infografis dari artikel berjudul “Sentiment Analysis for Brand Building” yang dimuat di situs Revuze, yang menggambarkan cara kerja analisis sentiment

Gambar 2.1 Cara Kerja Analisis Sentimen

2.3 Algoritma Term Frequency-Inverse Document Frequency

Menurut Dwi Septiani & Ica Isabela (2023) bahwa TF-IDF adalah teknik yang digunakan dalam pengolahan teks dan peModelan bahasa alami untuk mengevaluasi seberapa penting suatu kata dalam sebuah dokumen dalam konteks koleksi dokumen yang lebih besar. (Septiani & Isabela, n.d.)

Ada beberapa tahapan beserta persamaan matematis yang diperlukan dalam algoritma TF-IDF, yaitu:

1. Term Frequency mengukur seberapa sering suatu kata muncul dalam satu dokumen tertentu. Semakin sering kata muncul dalam dokumen tersebut, semakin tinggi nilai TF-nya. Rumus TF adalah:

$$TF(t, d) = \frac{f_{t,d}}{\sum_k f_{k,d}} \dots\dots\dots(2.1)$$

Keterangan:

- a. $f_{t,d}$ adalah jumlah kemunculan kata t pada dokumen d
 - b. $\sum_k f_{k,d}$ adalah jumlah seluruh kata dalam dokumen d
2. Inverse Document Frequency (IDF) tahap ini mengukur tingkat keunikan atau kelangkaan suatu kata di seluruh dokumen. Kata-kata yang jarang muncul di dokumen lain akan mendapatkan bobot yang lebih tinggi. Rumus IDF adalah:

$$idf(t) = \log \frac{N}{df(t)} \dots\dots\dots(2.2)$$

Keterangan:

- a. N adalah jumlah total dokumen dalam korpus
- b. $df(t)$ adalah jumlah dokumen yang mengandung kata t

3. Term Frequency-Inverse Document Frequency (TF-IDF), lalu hasil daripada TF dan IDF perlu dikalikan untuk mendapatkan nilai TF-IDF. Persamaan matematis ditunjukkan pada persamaan berikut:

$$TF \cdot IDF = TF_{normalize} * IDF \dots\dots\dots(2.3)$$

2.4 Naive Bayes Classifier

Naïve Bayes adalah algoritma klasifikasi yang berdasarkan pada Teorema Bayes dengan asumsi bahwa antar fitur bersifat independen. Algoritma ini banyak digunakan dalam klasifikasi teks karena sederhana, cepat, dan cukup akurat untuk data berukuran besar.

Menurut Patel, Kartik (2021) Naïve Bayes adalah sebuah algoritma klasifikasi untuk text mining yang sesuai untuk masalah klasifikasi biner atau multi kelas. Algoritma ini menggunakan teknik supervised untuk melakukan klasifikasi pada objek yang diteliti dengan cara menetapkan label kelas ke setiap data.

berikut adalah rumus yang umum digunakan untuk klasifikasi algoritma Naïve Bayes.

$$P(Y|X) = \frac{P(X|Y)P(Y)}{P(X)} \dots\dots\dots(2.4)$$

Penjelasan:

X = data dengan kelas tidak dikenal Y = kelas spesifik

$P(Y|X)$ = probabilitas hipotesis Y berdasarkan kondisi X

$P(Y)$ = probabilitas hipotesis Y

$P(X|Y)$ = probabilitas hipotesis X berdasarkan kondisi Y

$P(X)$ = probabilitas X

Naïve Bayes memiliki beberapa varian algoritma yang disesuaikan dengan jenis data yang akan diklasifikasikan.

Berikut adalah jenis-jenis Naïve Bayes yang umum digunakan:

1. Bernoulli Naïve Bayes

Bernoulli Naïve Bayes digunakan untuk data biner, yaitu fitur hanya memiliki dua kemungkinan nilai: hadir (1) atau tidak hadir (0). Algoritma ini cocok untuk representasi teks menggunakan bag-of-words biner, di mana hanya diperhatikan apakah kata tertentu muncul atau tidak dalam dokumen, tanpa memperhitungkan jumlah kemunculannya.

2. Multinomial Naïve Bayes

Multinomial Naïve Bayes merupakan varian yang paling banyak digunakan untuk klasifikasi teks. Algoritma ini mempertimbangkan jumlah kemunculan setiap kata (frekuensi kata) dalam dokumen. Input dari algoritma ini biasanya berupa representasi numerik seperti Count Vectorizer atau TF-IDF. Multinomial Naïve Bayes sangat sesuai untuk data teks yang sudah dikonversi ke dalam bentuk vektor berdasarkan jumlah kata atau bobot kata.

3. Gaussian Naïve Bayes

Gaussian Naïve Bayes digunakan untuk data numerik kontinu yang diasumsikan memiliki distribusi normal (Gaussian). Algoritma ini tidak cocok untuk data teks, namun lebih sering digunakan pada data numerik seperti klasifikasi citra, pengenalan suara, dan dataset medis.

2.5 Confusion Matrix

Menurut Anggraeny, M.S. (2020), Confusion Matrix adalah metode yang digunakan untuk mengukur performa suatu Model klasifikasi, baik untuk dua kelas (binary Classification) maupun lebih (multiclass Classification). Confusion Matrix berbentuk tabel yang terdiri atas empat kombinasi antara nilai prediksi dan nilai

aktual. Keempat kombinasi tersebut adalah True Positive (TP), True Negative (TN), False

Positive (FP), dan False Negative (FN), yang merepresentasikan hasil klasifikasi dari Model. Gambar 3 berikut merupakan visualisasi dari representasi Confusion Matrix yang diadaptasi dari artikel di website Towards Data Science berjudul “Understanding Confusion Matrix”.

		Actual Values	
		1 (Positive)	0 (Negative)
Predicted Values	1 (Positive)	TP (True Positive)	FP (False Positive) <i>Type I Error</i>
	0 (Negative)	FN (False Negative) <i>Type II Error</i>	TN (True Negative)

Gambar 2.2 Confusion Matrix

Hasil dari Confusion Matrix ini pun akan dapat digunakan untuk mengetahui hasil dari akurasi, Recall, Precision dan F-1 Score, yang persamaannya akan dijelaskan sebagai berikut.

- Akurasi, menggambarkan seberapa akurat Model melakukan klasifikasi terhadap dataset yang diberikan. Persamaannya ditunjukkan pada persamaan 2.5 berikut.

$$Akurasi = \frac{(TP+TN)}{(TP+FP+FN+TN)} \dots \dots \dots (2.5)$$

- Recall atau Sensitivity, merupakan gambaran keberhasilan Model dalam menemukan kembali informasi antar data pada dataset. Persamaannya ditunjukkan pada persamaan 2.6 berikut.

$$Recall = \frac{TP}{(TP+FN)} \dots \dots \dots (2.6)$$

- c. Precision, mengukur seberapa baik suatu Model dalam mengidentifikasi hasil positif dengan benar dari semua hasil prediksi positif. Persamaannya ditunjukkan pada persamaan 2.7 berikut.

$$Precision = \frac{TP}{(TP+FP)} \dots \dots \dots (2.7)$$

- d. F-1 Score, adalah nilai rata-rata harmoni dari Recall dan Precision, yang digunakan untuk mencari keseimbangan antara Recall dan Precision. Persamaannya ditunjukkan pada persamaan 2.8 berikut

$$f - 1 \text{ Score} = \frac{(2 \times Recall \times Precision)}{(Recall+Precision)} \dots \dots \dots (2.8)$$

2.6 Google Cloud Platform

Google Cloud Platform (GCP) adalah layanan komputasi awan yang disediakan oleh Google untuk mendukung berbagai kebutuhan pengembangan aplikasi dan pengolahan data. Salah satu fitur yang tersedia di GCP adalah YouTube Data API v3, yang memungkinkan pengembang atau peneliti mengakses data publik dari platform YouTube, seperti informasi video, komentar, dan statistik kanal.

Dalam penelitian ini, GCP digunakan untuk mengaktifkan dan menghasilkan API Key yang dibutuhkan dalam proses pengambilan komentar dari video YouTube. Proses ini dilakukan melalui dashboard Google Cloud Console, di mana peneliti membuat project, mengaktifkan layanan YouTube Data API, dan mendapatkan kredensial berupa API key. Kunci ini kemudian diintegrasikan ke dalam kode Python agar sistem dapat mengambil komentar secara otomatis menggunakan Library googleapiclient.

Dengan memanfaatkan GCP, proses pengambilan data dapat dilakukan secara resmi, terstruktur, dan sesuai dengan batas kuota akses yang telah ditetapkan oleh pihak Google, tanpa memerlukan perangkat lunak tambahan.

2.7 Penelitian Terdahulu

Tabel 2.7 Penelitian Terdahulu

No.	Nama Peneliti	Judul	Metode	Kesimpulan
1	Muhammad Refansyach Sugianto (2023)	Analisis Sentimen Game <i>Genshin Impact</i> untuk Mengetahui Reaksi dan Harapan Pemain Menggunakan Support Vector Machine	Support Vector Machine (SVM)	Model SVM berhasil mengklasifikasikan komentar dengan akurasi tertinggi 83% pada aspek karakter dan game. Mayoritas sentimen pengguna bersifat positif terhadap pembaruan versi 3.6 <i>Genshin Impact</i> , meskipun terdapat beberapa kritik terhadap event dan sistem.

2	Farhan Firmansyah (2023)	Perancangan Analisis Sentimen pada Komentar Sosial Media Instagram Indodax tentang Cryptocurrency Menggunakan <i>Naïve Bayes</i> Classifier	<i>Naïve</i> <i>Bayes</i> Classifier	Model <i>Naïve Bayes</i> mampu mengklasifikasikan sentimen komentar secara efektif dengan hasil akurasi mencapai 89,3%. Mayoritas komentar bersentimen positif terhadap cryptocurrency yang dibahas di akun Instagram Indodax.
3.	Andika Putra dan Tiara (2022)	Analisis Sentimen Komentar Pengguna terhadap Aplikasi InDrive Menggunakan Metode <i>Naïve</i> <i>Bayes</i>	<i>Naïve</i> <i>Bayes</i>	Model memberikan akurasi yang cukup baik dengan performa optimal dalam mengklasifikasikan komentar pengguna, sebagian besar bernada positif

				terhadap layanan aplikasi InDrive.
4	Ramadhan Pratama (2024)	Analisis Sentimen Pengguna Terhadap Aplikasi InDrive Menggunakan Metode <i>Naïve Bayes</i>	<i>Naïve Bayes</i>	Model berhasil mengelompokkan komentar ke dalam dua kelas utama (positif dan negatif) dengan hasil akurasi yang baik, menunjukkan bahwa mayoritas ulasan pengguna aplikasi InDrive bersifat positif.
5	Dwi Atika Sari (2023)	Analisis Sentimen Review Aplikasi Gojek Menggunakan Metode <i>Naïve Bayes</i>	Metode <i>Naïve</i>)	Mayoritas review pengguna terhadap aplikasi Gojek mengandung sentimen positif. Metode <i>Naïve</i>

				Bayes terbukti dapat digunakan untuk mengklasifikasikan sentimen dengan hasil akurasi yang memadai.

BAB III

METODOLOGI PENELITIAN

3.1 Alur Penelitian

Penelitian ini menggunakan pendekatan kuantitatif dan bersifat deskriptif, dengan tujuan untuk mengetahui pola sentimen pemain terhadap game Genshin Impact melalui analisis komentar YouTube. Metode yang digunakan termasuk ke dalam Supervised Learning, di mana data dilatih menggunakan label sentimen yang telah ditentukan sebelumnya. Algoritma Multinomial Naïve Bayes digunakan untuk melakukan klasifikasi sentimen berdasarkan representasi data yang dibentuk melalui teknik TF-IDF. Seluruh proses pengolahan data, mulai dari Preprocessing hingga evaluasi Model, diimplementasikan menggunakan bahasa pemrograman Python melalui Platform Jupyter Notebook. Gambar 1 berikut menggambarkan alur tahapan penelitian yang dilakukan.

Gambar 3.1 Alur Penelitian

3.1.1 Web Scraping

Web scraping adalah teknik yang digunakan untuk mengumpulkan data secara otomatis dari halaman web. Pada penelitian ini, web scraping dilakukan untuk mengambil komentar- komentar dari tiga video terbaru di kanal YouTube resmi Genshin Impact. Video dipilih berdasarkan tingkat popularitas dan jumlah komentar yang cukup representatif. Scraping dilakukan menggunakan pustaka Python yang mampu mengekstrak komentar dari elemen HTML pada laman video. Data yang diperoleh kemudian disimpan dalam format .csv untuk memudahkan pengolahan dan analisis selanjutnya.

3.1.2 Pengumpulan Data

Setelah scraping berhasil dilakukan, komentar dari beberapa video yang dipilih di kanal YouTube resmi Genshin Impact digabungkan dalam satu dataset. Masing-masing data mencakup informasi seperti nama pengguna, isi komentar, tanggal komentar, serta ID komentar untuk identifikasi unik. Pada tahap ini, belum ditentukan secara pasti jumlah komentar yang akan digunakan, karena jumlah data bersifat fleksibel dan akan disesuaikan dengan kebutuhan pada saat implementasi.

Pelabelan data merupakan proses memberikan kategori sentimen pada setiap komentar yang telah dikumpulkan. Kategori yang digunakan adalah positif, negatif. Penentuan label dilakukan secara manual dengan mempertimbangkan konteks dan makna dari isi komentar. Proses ini penting karena Naïve Bayes termasuk algoritma Supervised Learning, yang membutuhkan data latih dengan label yang sudah diketahui. Pelabelan yang akurat akan berpengaruh langsung terhadap kinerja Model klasifikasi.

3.1.3 Pelabelan Data

Pelabelan data merupakan tahap penting dalam penelitian ini karena menjadi dasar bagi algoritma Supervised Learning untuk mempelajari pola klasifikasi sentimen. Dalam konteks ini, pelabelan berarti memberikan kategori sentimen pada setiap komentar YouTube yang telah dikumpulkan, dengan kategori yang digunakan yaitu positif, negatif.

Proses pelabelan dilakukan secara manual dengan membaca dan memahami setiap komentar satu per satu. Penilaian dilakukan dengan mempertimbangkan konteks, kata-kata yang digunakan, serta makna yang tersirat dalam komentar. Misalnya, komentar yang mengandung pujian atau ekspresi kebahagiaan terhadap fitur game dikategorikan sebagai positif. Sementara itu, komentar yang mengandung keluhan, kritik, atau ekspresi kekecewaan terhadap game dikategorikan sebagai negatif.

Karena Multinomial Naïve Bayes merupakan algoritma Supervised Learning, maka kualitas pelabelan sangat penting. Algoritma ini membutuhkan data latih yang sudah memiliki label yang benar agar dapat mempelajari hubungan antara fitur (kata-kata dalam komentar) dan kategori sentimen. Jika proses pelabelan tidak akurat, maka Model akan mempelajari pola yang salah dan berdampak langsung terhadap rendahnya performa klasifikasi. Oleh karena itu, pelabelan dilakukan dengan hati-hati dan konsisten untuk memastikan keakuratan dan validitas hasil analisis sentimen.

Dalam penelitian ini, proses pelabelan tidak dilakukan secara manual sepenuhnya, melainkan menggunakan bantuan VADER Sentiment Analyzer, yaitu sebuah alat analisis sentimen berbasis leksikon yang mampu mengukur intensitas

sentimen dalam kalimat berbahasa Inggris. VADER memberikan skor compound yang kemudian digunakan untuk mengklasifikasikan komentar ke dalam tiga kategori sentimen, yaitu positif, negatif berdasarkan ambang batas tertentu. Penggunaan VADER bertujuan untuk mempercepat proses pelabelan sekaligus menjaga konsistensi dalam pemberian label.

3.1.4 Preprocessing Data

Pra-pemrosesan Preprocessing dilakukan untuk menyiapkan data teks sebelum dianalisis lebih lanjut. Komentar-komentar yang dikumpulkan dari YouTube umumnya masih dalam bentuk mentah, mengandung berbagai elemen yang tidak relevan seperti emotikon, tanda baca, simbol, serta penggunaan bahasa informal atau tidak baku. Jika tidak dibersihkan, elemen-elemen tersebut dapat mengganggu proses ekstraksi fitur dan menurunkan kinerja Model klasifikasi. Untuk itu, dilakukan serangkaian tahapan Preprocessing dengan urutan sebagai berikut:

1. Case Folding: Pada tahap ini, seluruh huruf dalam komentar diubah menjadi huruf kecil (lowercase). Hal ini dilakukan untuk menyamakan format penulisan, sehingga kata yang sama tetapi berbeda kapitalisasi (misalnya "Game" dan "game") tidak dianggap berbeda oleh sistem.
2. Cleansing: Cleansing adalah proses pembersihan teks dari elemen-elemen yang tidak relevan dan dapat mengganggu proses analisis data. Pada tahap ini, komentar dibersihkan dari karakter-karakter khusus seperti tanda baca (!, ?, .., dll), angka, emoji, simbol, serta tautan (URL). Selain itu, karakter non-alfabet dan kata-kata yang tidak bermakna (seperti spam atau iklan) juga dihapus. Tujuannya adalah untuk menyederhanakan data teks agar lebih bersih dan

konsisten sebelum masuk ke tahap tokenisasi dan pembobotan. Dengan teks yang lebih bersih, proses klasifikasi sentimen dapat dilakukan dengan lebih akurat dan efisien.

3. Tokenizing: Tokenisasi adalah proses memecah komentar menjadi unit-unit kata atau token. Misalnya, komentar "Saya suka game ini" akan dipecah menjadi ["saya", "suka", "game", "ini"]. Tahapan ini penting karena Model klasifikasi bekerja pada level kata, bukan kalimat utuh.
4. Stopword Removal: Tahapan ini bertujuan untuk menghapus kata-kata umum yang sering muncul namun tidak memberikan kontribusi bermakna terhadap analisis sentimen, seperti “yang”, “dari”, “dan”, “ke”. Kata-kata ini disebut stopwords, dan penghapusannya dapat membantu Model lebih fokus pada kata-kata yang memiliki bobot informasi tinggi.
5. Lemmatizing: Lemmatizing adalah proses mengubah kata ke bentuk dasar atau akar katanya. Misalnya, kata "bermain", "dimainkan", dan "memainkan" semuanya akan diubah menjadi "main". Dengan melakukan stemming, jumlah variasi kata dapat dikurangi dan makna inti dari komentar dapat lebih mudah dikenali oleh Model.

Seluruh proses Preprocessing ini bertujuan untuk mengurangi kompleksitas data, meningkatkan konsistensi penggunaan kata, serta memperbaiki akurasi dalam proses pembobotan kata (TF-IDF) dan klasifikasi sentimen menggunakan algoritma Multinomial Naïve Bayes. Dengan data yang lebih bersih dan terstruktur, Model dapat lebih mudah mengenali pola sentimen dalam komentar-komentar yang dianalisis.

3.1.5 Pembobotan TF-IDF

Setelah melalui tahap Preprocessing, langkah berikutnya adalah mengubah data teks menjadi representasi numerik yang bisa diproses oleh algoritma klasifikasi. Representasi ini dilakukan menggunakan metode TF-IDF (Term Frequency – Inverse Document Frequency), yaitu teknik pembobotan kata dalam dokumen yang digunakan secara luas dalam penambangan teks (text mining).

TF-IDF terdiri dari dua komponen utama:

1. Term Frequency (TF)

TF mengukur seberapa sering suatu kata muncul dalam satu dokumen (dalam konteks ini: satu komentar). Semakin sering sebuah kata muncul dalam komentar, maka semakin besar nilai

2. Inverse Document Frequency (IDF)

tahap ini mengukur tingkat keunikan atau kelangkaan suatu kata di seluruh dokumen. Kata-kata yang jarang muncul di dokumen lain akan mendapatkan bobot yang lebih tinggi.

3. Term Frequency-Inverse Document Frequency (TF-IDF)

lalu hasil daripada TF dan IDF perlu dikalikan untuk mendapatkan nilai TF-IDF.

Persamaan matematis ditunjukkan pada persamaan berikut:

$$TF \cdot IDF = TF_{normalize} * IDF \dots\dots\dots(3.1)$$

Pembobotan TF-IDF bertujuan untuk memberikan nilai penting yang lebih tinggi kepada kata-kata yang sering muncul di satu dokumen namun jarang di dokumen lain, sehingga kata-kata yang umum tidak mendominasi Model klasifikasi. Hasil dari tahap ini adalah vektor numerik yang akan menjadi Input ke algoritma klasifikasi

3.1.6 Naive Bayes

Setelah data diubah menjadi vektor TF-IDF, tahap selanjutnya adalah klasifikasi komentar ke dalam tiga kategori sentimen: positif, negatif. Proses klasifikasi ini dilakukan menggunakan algoritma Multinomial Naïve Bayes, yang merupakan salah satu algoritma Supervised Learning yang paling umum digunakan untuk tugas klasifikasi teks karena kesederhanaan dan efisiensi komputasinya.

Namun, sebelum proses pelatihan model dilakukan, perlu dilakukan penyeimbangan distribusi data latih karena jumlah komentar dalam tiap kategori sentimen tidak seimbang. Untuk mengatasi hal ini, digunakan metode SMOTE (Synthetic Minority Over-sampling Technique), yaitu teknik oversampling yang menghasilkan data sintesis pada kelas minoritas. Dengan menerapkan SMOTE, distribusi kelas menjadi lebih seimbang sehingga model tidak cenderung bias terhadap kelas mayoritas dan dapat belajar secara lebih adil terhadap semua kategori sentimen yang ada.

Multinomial Naïve Bayes bekerja dengan menghitung probabilitas suatu dokumen (komentar) termasuk dalam kelas tertentu berdasarkan distribusi kata-kata dalam dokumen tersebut. Prinsip utamanya adalah teorema Bayes, yang dirumuskan sebagai berikut:

$$P(Y|X) = \frac{P(X|Y)P(Y)}{P(X)} \dots\dots\dots(3.2)$$

Keterangan:

$P(\neg Y|X)$ adalah probabilitas dokumen X termasuk dalam kelas Y

$P(Y)$ adalah probabilitas awal (prior) dari kelas Y

$P(\neg X|Y)$ adalah probabilitas kemunculan fitur (kata-kata dalam komentar) X jika diketahui berada di kelas Y

$P(X)$ adalah probabilitas keseluruhan dari dokumen X (dapat diabaikan karena nilainya konstan untuk semua kelas)

Dalam kasus Multinomial Naïve Bayes, fitur-fitur (kata-kata) dianggap independen satu sama lain, dan digunakan distribusi multinomial untuk menghitung $P(\{X\} | Y)$. Meskipun asumsi independensi ini jarang terpenuhi dalam teks nyata, algoritma ini tetap efektif karena kesederhanaannya dan efisiensi komputasinya.

Model dilatih menggunakan data yang telah diberi label sentimen, sehingga algoritma dapat mempelajari pola distribusi kata yang khas untuk masing-masing kelas. Setelah pelatihan selesai, Model diuji menggunakan data uji (testing set) untuk mengevaluasi kemampuannya dalam mengklasifikasikan komentar baru secara akurat. Hasil klasifikasi akan dibandingkan dengan label sebenarnya untuk menghitung metrik evaluasi seperti akurasi, presisi, Recall, dan F1-score.

3.1.7 Evaluasi Model

Setelah proses pelatihan dan pengujian Model selesai dilakukan, langkah selanjutnya adalah mengevaluasi kinerja Model klasifikasi sentimen. Evaluasi dilakukan untuk mengetahui seberapa baik Model dalam memprediksi kategori sentimen komentar dengan benar. Beberapa metrik evaluasi yang digunakan dalam penelitian ini meliputi:

1. Confusion Matrix: Confusion Matrix merupakan tabel yang menggambarkan performa Model klasifikasi dengan menampilkan jumlah prediksi yang benar dan salah untuk masing-masing kelas sentimen (positif, dan negatif). Matriks ini terdiri dari empat komponen utama: True Positive (TP), True Negative (TN), False Positive (FP), dan False Negative (FN), yang digunakan sebagai dasar perhitungan metrik lainnya.

2. Accuracy: Akurasi mengukur proporsi prediksi yang benar dibandingkan dengan total prediksi yang dilakukan oleh Model. Nilai akurasi dihitung dengan rumus:

$$Akurasi = \frac{(TP+TN)}{(TP+FP+FN+TN)} \dots \dots \dots (3.3)$$

3. Precision: Precision mengukur ketepatan prediksi positif, yaitu seberapa banyak dari prediksi yang dianggap positif oleh Model ternyata benar-benar positif. Rumusnya adalah:

$$Precision = \frac{TP}{TP+FP} \dots \dots \dots (3.4)$$

4. Recall: Recall mengukur seberapa baik Model dalam mendeteksi data yang memang termasuk kategori positif. Artinya, dari semua data yang benar-benar positif, berapa persen yang berhasil dikenali oleh Model:

$$Recall = \frac{TP}{(TP+FN)} \dots \dots \dots (3.5)$$

5. F1-score: F1-score merupakan rata-rata harmonik dari Precision dan Recall. Metrik ini digunakan untuk mencari keseimbangan antara keduanya, terutama jika distribusi data tidak seimbang:

$$f - 1 \text{ Score} = \frac{(2 \times Recall \times Precision)}{(Recall+Precision)} \dots \dots \dots (3.6)$$

Evaluasi ini sangat penting agar hasil klasifikasi dapat diandalkan dalam analisis lanjutan. Dengan mengetahui metrik-metrik tersebut, peneliti dapat menilai apakah Model sudah cukup baik dalam mengelompokkan komentar atau masih perlu perbaikan lebih lanjut, seperti penyesuaian parameter atau penambahan data latih.

3.1.8 Visualisasi Data

Tahap akhir dari penelitian ini adalah visualisasi data, yang berfungsi untuk memperkuat pemahaman dan interpretasi terhadap hasil klasifikasi sentimen yang telah dilakukan. Salah satu teknik visualisasi yang digunakan adalah Wordcloud.

Wordcloud adalah representasi visual dari kumpulan kata, di mana ukuran setiap kata menunjukkan frekuensi atau seberapa sering kata tersebut muncul dalam kumpulan data. Dalam konteks penelitian ini, Wordcloud dibuat secara terpisah untuk masing-masing kategori sentimen: positif, dan negatif. Dengan demikian, dapat terlihat dengan jelas kata-kata apa saja yang paling dominan dalam setiap kelompok sentimen.

Sebagai contoh, kata-kata seperti “seru”, “grafik”, atau “event” mungkin sering muncul dalam komentar positif, sementara komentar negatif mungkin lebih banyak mengandung kata seperti “gacha”, “mahal”, atau “lag”. Pola-pola semacam ini tidak hanya memperjelas hasil klasifikasi, tetapi juga memberikan wawasan tambahan mengenai aspek apa saja dari game Genshin Impact yang paling sering dibicarakan oleh pemain dengan emosi tertentu.

Visualisasi ini juga mendukung validitas hasil klasifikasi dengan memberikan konteks visual terhadap data yang dianalisis, dan dapat menjadi dasar bagi penelitian lanjutan atau rekomendasi terhadap pengembang game.

3.3 Alat dan Bahan

3.3.1 Alat

Berikut merupakan *hardware* dan *software* yang saya gunakan

Tabel 3.3 Hardware dan Software

<i>Hardware</i>	Komputer Pribadi	Amd Ryzen 5 Ram 16 GB NVME M.2 RX 6700 XT
<i>Software</i>	Sistem Operasi	<i>Windows 10 Google</i> <i>Chrome Google</i> <i>Cloud Platform</i> <i>Jupyter Notebook</i> <i>Phyton</i>

3.3.2 Bahan

Bahan yang diperlukan pada penilitan ini adalah:

1. Jurnal, media cetak, dan internet sebagai penunjang referensi

2. Data pada Platform YouTube, berupa komentar video YouTube yang diunggah oleh kanal resmi Genshin Impact, dengan video yang dimaksud adalah dengan judul sebagai berikut:

- Adegan Animasi "Keajaiban dari Kebajikan" | Genshin Impact
- Kisah Karakter: "Escoffier — "Kurang Presisi" | Genshin Impact
- Acara Khusus Versi 5.6 | Genshin Impact

BAB IV

HASIL DAN PEMBAHASAN

4.1 Hasil Web Scraping

Dalam penelitian ini, proses pengambilan data dilakukan secara otomatis menggunakan YouTube Data API v3 yang diaktifkan melalui *Google Cloud Platform* (GCP). API key yang dihasilkan digunakan untuk mengakses komentar dari video YouTube secara terprogram. Dengan bantuan library *googleapiclient*, sistem terhubung langsung ke platform YouTube dan mengekstrak komentar dari video yang dijadikan objek penelitian. Seluruh proses dijalankan melalui Jupyter Notebook, yang memungkinkan peneliti mengeksekusi kode secara interaktif dan menyimpan data komentar dengan efisien untuk digunakan pada tahap analisis selanjutnya.

	Komentar
1	8/6 Happy Birthday Escoffier. 🎂👑
2	Escoffier's such a queen I love her
3	Didn't even realize Savanna was in this teaser
4	o skip these dialogs in the game. many players don't want to watch these conversations but you stubbornly don't bring a solution to this. people hate doing quests because of dialogs. put a skip button now.
5	0:27 her pout is so cute 0:50 i can't believe they not only kept the design of savanna consistent, but mentioned her substituting marcottes for plume lotus 1:39 cute but scary
6	escoffiers quest is so cool especially because some of its from here
7	This is Teaser is JP because EN VA don't want to work?
8	All I see from Escoffier after watching all her trailers are -Remy (Ratatouille) -Gordon -Shokugeki no souma
9	0:45 the girl here is the now-head chef at Hotel Debord who replaced Escoffier in her SQ, so sad that she became a different person after getting the title
10	Welcome back Nakiri Erina

Gambar 4.1 Hasil Web Scraping

4.1.1 Proses Pelabelan

Proses pelabelan komentar dilakukan secara otomatis menggunakan library *VaderSentiment*, sebuah peroyek dari *Github* yang dirancang untuk menganalisis sentimen teks berbahasa Inggris. Library ini bekerja dengan membaca setiap kata dalam komentar, lalu memberikan skor berdasarkan nuansa emosional dari kata-

kata tersebut apakah cenderung positif, atau negatif. Skor dari seluruh kata dalam satu komentar akan dihitung secara keseluruhan menjadi compound score, yang kemudian digunakan sebagai dasar pengelompokan sentimen.

	Komentar	Label	Compound
1	y Birthday Escoffier. 🍰🌸	positif	0.5719
2	's such a queen I love her	positif	0.6369
3	avanna was in this teaser	negatif	-0.3071
4	gs. put a skip button now.	negatif	-0.8935
5	lotus 1:39 cute but scary	positif	0.2808
6	use some of its from here	positif	0.4572
7	EN VA don't want to work?	positif	0.08
8	don -Shokugeki no souma	negatif	-0.296
9	erson after getting the title	negatif	-0.6113
10	Welcome back Nakiri Erina	positif	0.4588

Gambar 4.2 Hasil pelabelan *VaderSentiment*

Penentuan label sentimen mengacu pada ketentuan yang telah ditetapkan oleh metode VADER, yaitu:

1. Komentar dikategorikan positif jika memiliki compound score ≥ 0.05 ,
2. Dan negatif jika nilainya ≤ -0.05 .

Berdasarkan pendekatan ini, setiap komentar dalam dataset diproses dan secara otomatis diberi label sesuai skor yang diperoleh. Contoh hasil pelabelan otomatis terhadap 12 komentar pertama dapat dilihat pada gambar di atas, di mana tampak bahwa sebagian besar komentar awal diklasifikasikan sebagai netral, dengan beberapa di antaranya termasuk kategori positif dan negatif.

4.2 Persiapan Data

Sebelum dilakukan proses klasifikasi, data komentar yang telah dikumpulkan dari YouTube perlu dipersiapkan terlebih dahulu. Persiapan data ini

bertujuan untuk memastikan bahwa teks yang akan diproses oleh model memiliki struktur yang rapi dan terbebas dari unsur-unsur yang tidak relevan, seperti simbol, angka, emoji, maupun variasi huruf kapital yang tidak konsisten.

Sebagai ilustrasi awal, Gambar berikut menampilkan lima komentar dalam kondisi asli sebagaimana diambil langsung dari kolom komentar video. Komentar-komentar ini belum melalui proses apa pun, sehingga masih mengandung berbagai elemen mentah seperti huruf kapital acak, tanda baca, hingga kemungkinan adanya karakter non-alfabet.

```
Contoh Komentar:
0           8/6 Happy Birthday Escoffier. 🍷🍷
1           Escoffier's such a queen I love her
2       Didn't even realize Savanna was in this teaser
3       bring the skip option to skip these dialogs in...
4       0:27 her pout is so cute\n\n0:50 i can't belie...
Name: Komentar, dtype: object
```

Gambar 4.3 Komentar Awal

Komentar tersebut nantinya akan melalui serangkaian tahapan preprocessing yang terdiri dari *case folding*, *cleansing*, *tokenization*, *filtering*, dan *lemmatization*. Setiap tahapan ini berfungsi untuk menyederhanakan bentuk teks sehingga model dapat lebih mudah dalam memahami dan mengelompokkan sentimen. Seluruh proses tersebut akan dijelaskan dan ditampilkan secara bertahap menggunakan contoh komentar yang sama, agar pembaca dapat melihat bagaimana data berubah dari bentuk mentah hingga menjadi teks siap klasifikasi.

4.2.1 Case Folding

Langkah awal dalam preprocessing adalah melakukan *case folding*, yaitu proses mengubah seluruh huruf dalam komentar menjadi huruf kecil (*lowercase*).

Tujuan dari tahap ini adalah untuk menyamakan format penulisan, sehingga kata-kata yang semula ditulis dengan variasi huruf kapital tidak dianggap berbeda oleh sistem.

Contohnya dapat dilihat pada Gambar di bawah ini:

```
Contoh hasil case folding:
0           8/6 happy birthday escoffier. 🍰🎂
1           escoffier's such a queen i love her
2           didn't even realize savanna was in this teaser
3           bring the skip option to skip these dialogs in...
4           0:27 her pout is so cute\n\n0:50 i can't belie...
Name: Case_Folding, dtype: object
```

Gambar 4.4 Hasil Case Folding

4.2.2 *Cleansing*

Setelah dilakukan case folding, langkah selanjutnya dalam proses preprocessing adalah *cleansing*, yaitu pembersihan teks dari karakter-karakter yang tidak diperlukan. Pada tahap ini, komentar yang telah diseragamkan hurufnya akan dibersihkan dari elemen seperti tautan (*URL*), emoji, karakter non-ASCII, angka, serta tanda baca. Pembersihan ini dilakukan agar teks lebih sederhana dan mudah diproses oleh algoritma klasifikasi tanpa terganggu oleh unsur-unsur yang tidak relevan.

Gambar berikut menunjukkan hasil dari proses cleansing terhadap lima komentar yang sebelumnya telah melalui tahap case folding. Terlihat bahwa tanda baca, emoji, dan simbol-simbol lain telah berhasil dihapus. Misalnya, pada komentar keempat, simbol tanda seru dan emoji api yang sebelumnya muncul kini sudah tidak ada, menyisakan kata-kata penting yang dibutuhkan dalam proses selanjutnya.

Contoh hasil cleansing:

```
0             happy birthday escoffier
1         escoffier s such a queen i love her
2     didnt even realize savanna was in this teaser
3     bring the skip option to skip these dialogs in...
4     her pout is so cute i cant believe they not on...
Name: Cleansing, dtype: object
```

Gambar 4.5 Hasil Cleansing

1.2.3 Tokenizing

Setelah teks dibersihkan pada tahap sebelumnya, proses selanjutnya adalah *tokenizing*. Pada tahap ini, setiap komentar dipecah menjadi potongan-potongan kata yang disebut sebagai token. Tujuan dari tokenizing adalah untuk memisahkan setiap kata dalam kalimat agar bisa diproses secara individu oleh sistem. Dengan memecah kalimat menjadi satuan kata, model akan lebih mudah dalam melakukan analisis, seperti pembobotan TF-IDF dan klasifikasi sentimen berdasarkan masing-masing token.

Gambar menampilkan hasil dari proses tokenizing terhadap lima komentar yang telah melalui tahapan cleansing. Setiap baris dalam gambar berisi daftar kata yang sebelumnya tergabung dalam satu kalimat.

Contoh hasil tokenizing:

```
0             [happy, birthday, escoffier]
1     [escoffier, s, such, a, queen, i, love, her]
2     [didnt, even, realize, savanna, was, in, this,...
3     [bring, the, skip, option, to, skip, these, di...
4     [her, pout, is, so, cute, i, cant, believe, th...
Name: Tokenizing, dtype: object
```

Gambar 4.6 Hasil *Tokenizing*

1.2.4 Stopword

Setelah komentar berhasil dipecah menjadi token, langkah selanjutnya dalam proses preprocessing adalah menghilangkan kata-kata yang dianggap tidak memiliki kontribusi penting terhadap analisis. Tahapan ini dikenal dengan istilah *stopword removal*.

Stopword merupakan kata-kata umum yang sering digunakan dalam percakapan sehari-hari, seperti “*is*”, “*to*”, “*in*”, “*the*”, dan sejenisnya. Kata-kata ini cenderung tidak memberikan nilai informasi yang signifikan karena hanya berfungsi sebagai penghubung atau pelengkap dalam sebuah kalimat. Oleh karena itu, *stopword* dihapus agar hanya kata-kata yang lebih bermakna dan relevan yang dipertahankan dalam data.

Gambar berikut menunjukkan hasil dari proses *stopword removal* terhadap lima komentar yang sebelumnya telah melalui tahap tokenisasi.

```
Contoh hasil stopwords removal:
0          [happy, birthday, escoffier]
1          [escoffier, queen, i, love]
2          [didnt, even, realize, savanna, teaser]
3  [bring, skip, option, skip, dialogs, game, man...
4  [pout, cute, i, cant, believe, kept, design, s...
Name: Stopword_Removal, dtype: object
```

Gambar 4.7 Hasil Stopword

4.2.5 Lemmatizing

Langkah terakhir dalam proses preprocessing adalah *lemmatizing*, yaitu proses mengubah setiap kata ke bentuk dasar atau bentuk lema-nya. Tujuan utama dari tahap ini adalah untuk menyatukan kata-kata yang memiliki akar sama namun

bentuknya berbeda, seperti “running”, “ran”, dan “runs” yang semuanya dikembalikan ke bentuk dasar “run”.

Dengan melakukan lemmatizing, sistem akan memandang kata-kata tersebut sebagai satu entitas yang sama, sehingga dapat meningkatkan akurasi dalam proses pembobotan maupun klasifikasi. Hal ini juga membantu mengurangi jumlah variasi kata yang perlu diproses oleh model.

Gambar berikut menunjukkan hasil dari proses lemmatizing pada lima komentar yang telah melalui tahapan sebelumnya. Misalnya, kata “feels” pada komentar pertama diubah menjadi “feel”, dan “getting” pada komentar ketiga disederhanakan menjadi “get”.

```
Contoh hasil lemmatizing:
0          [happy, birthday, escoffier]
1          [escoffier, queen, i, love]
2          [didnt, even, realize, savanna, teaser]
3  [bring, skip, option, skip, dialog, game, many...
4  [pout, cute, i, cant, believe, kept, design, s...
Name: Lemmatizing, dtype: object
```

Gambar 4.8 Hasil Lemmatizing

4.3 TF-IDF (Term Frequency - Inverse Document Frequency)

Setelah melalui tahap pembersihan data, setiap komentar yang telah diproses kemudian dikonversi ke dalam representasi numerik menggunakan metode TF-IDF (Term Frequency-Inverse Document Frequency). Teknik ini bertujuan untuk memberikan bobot pada setiap kata berdasarkan seberapa sering kata tersebut muncul dalam suatu dokumen dan seberapa jarang kata tersebut muncul di seluruh dokumen.

TF-IDF efektif dalam mengekstraksi kata-kata penting dalam komentar karena

mampu menurunkan bobot kata-kata umum yang muncul terlalu sering namun kurang informatif. Proses ini dilakukan menggunakan `TfidfVectorizer` dengan parameter `gram_range=(1,2)` agar mencakup unigram dan bigram, serta `min_df=1` dan `max_df=0.95` untuk menyaring kata yang terlalu jarang atau terlalu sering muncul.

Berikut adalah hasil TF-IDF yang menunjukkan 20 kata dan frasa dengan skor tertinggi dari kumpulan komentar yang dianalisis:

```
TF-IDF:
'gordon': 12.889,
'ramsay': 11.8618,
'food': 11.4278,
'gordon ramsay': 10.731,
'love': 10.7092,
'cute': 10.6186,
'escoffier': 10.6017,
'war': 10.484,
'food war': 10.454,
'erina': 9.7977,
'like': 8.9372,
'english': 8.0433,
'va': 8.041,
'cant': 7.6705,
'nakiri': 6.8205,
'welcome': 6.8056,
'chef': 6.5962,
'genshin': 6.4792,
'cant cute': 6.3811,
'back': 5.8505,
```

Gambar 4.9 Visualisasi hasil TF-IDF pada komentar YouTube terhadap video

yang dianalisis, menampilkan kata/frasa dengan skor tertinggi.

Gambar di atas menunjukkan beberapa contoh kata yang memiliki nilai bobot TF-IDF tertinggi. Kata-kata tersebut dianggap paling berpengaruh dalam membedakan sentimen komentar yang dianalisis, dan bobot inilah yang kemudian digunakan oleh

algoritma klasifikasi Naive Bayes dalam proses pelatihan model. Melalui proses ini, sistem dapat lebih akurat dalam menentukan apakah sebuah komentar bernada positif atau negatif.

4.4 Hasil Klasifikasi Naive Bayes

Setelah melalui tahapan preprocessing dan vektorisasi menggunakan TF-IDF, data yang telah bersih digunakan untuk pelatihan dan pengujian model klasifikasi. Algoritma yang digunakan dalam penelitian ini adalah Multinomial Naïve Bayes karena dikenal efisien dan cukup efektif dalam menangani data teks.

Contoh hasil prediksi:

	Komentar_Uji	Label_Asliprediksi	Prediksi_Model
0	xiagliling finally worthy opponent battle lege...	positif	positif
1	please hoyo make npc well	positif	positif
2	i thought i clicked hell kitchen oh well close...	positif	positif
3	erina nakiri food war	negatif	negatif
4	reminds narakai food war idk spell name	negatif	negatif
5	im ready escoffier ramsay	positif	positif
6	really change va refuse work i dont care fit c...	negatif	negatif
7	definitely shes nakiri erina i say shes childe...	positif	positif
8	im look forward video ifa least he chill lmao	positif	positif
9	literally eng va tf jp cause charlotte	positif	negatif

Hasil prediksi disimpan ke: hasil_prediksi_naive_bayes.csv

Gambar 4.10 contoh hasil prediksi Naive Bayes

Gambar di atas menampilkan beberapa contoh hasil prediksi model terhadap data uji. Masing-masing baris memperlihatkan komentar yang diuji, label asli yang dihasilkan dari proses pelabelan menggunakan VADER, serta label hasil prediksi model. Terlihat bahwa ada beberapa kasus di mana prediksi sesuai dengan label asli, namun terdapat pula prediksi yang tidak tepat (misalnya komentar positif yang diklasifikasikan sebagai negatif).

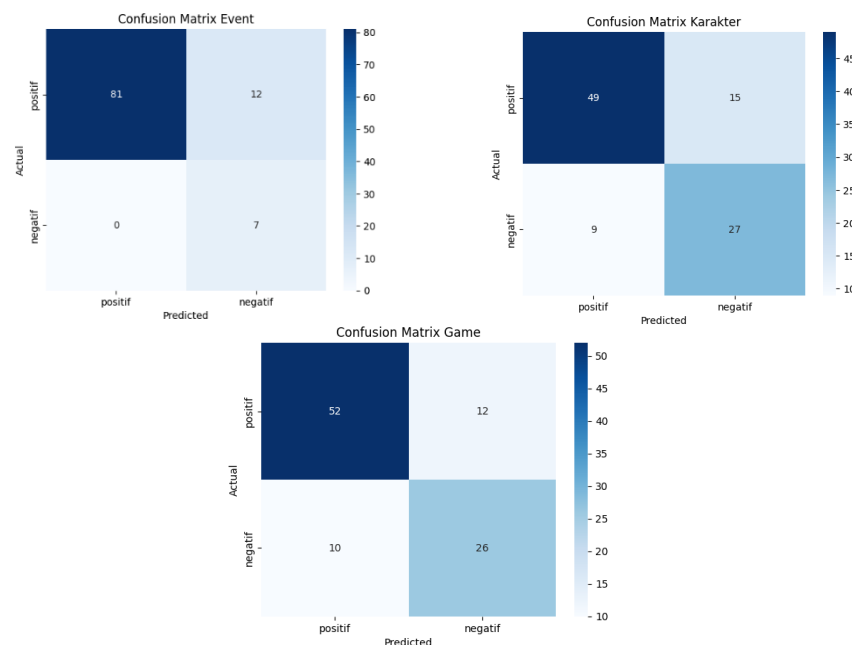

Secara keseluruhan, performa model akan dievaluasi lebih lanjut melalui metrik akurasi, precision, recall, dan confusion matrix yang dijelaskan pada subbab berikutnya. Namun dari cuplikan prediksi ini, kita sudah bisa melihat pola kerja

model dalam membedakan sentimen positif dan negatif berdasarkan teks komentar pengguna.

4.5 Evaluasi

Setelah model selesai dilatih, tahap berikutnya adalah mengevaluasi performa klasifikasi yang dihasilkan oleh algoritma Multinomial Naïve Bayes. Evaluasi ini penting untuk melihat sejauh mana model mampu mengenali sentimen komentar pengguna dengan tepat.

Proses evaluasi dilakukan dengan membandingkan hasil prediksi model terhadap label asli pada data uji. Hasilnya kemudian divisualisasikan dalam bentuk *confusion matrix* yang menunjukkan jumlah prediksi yang benar dan salah pada masing-masing kelas (positif dan negatif). Gambar confusion matrix berikut memberikan gambaran tentang distribusi prediksi dan kesalahan klasifikasi yang terjadi pada setiap kategori, yaitu komentar karakter, event, dan gameplay.

Gambar 4.11 Hasil confusion Matrix Setiap Aspek

Setelah ditampilkan confusion matrix, tahap evaluasi dilanjutkan dengan menampilkan classification report yang memuat nilai precision, recall, f1-score, serta akurasi. Metrik-metrik ini digunakan untuk menilai seberapa baik model dalam mengklasifikasikan setiap kategori sentimen. Untuk memastikan keakuratan hasil evaluasi tersebut, dilakukan juga perhitungan secara manual sebagai pembandingan dari hasil yang dihasilkan oleh sistem.

```

Classification Report Event Rev:
      precision    recall  f1-score   support

   negatif      0.37      1.00      0.54         7
   positif      1.00      0.87      0.93        93

 accuracy          0.88        100

```

Gambar 4.12 Hasil Evaluasi Setiap Aspek

Setelah menampilkan gambar hasil evaluasi model, informasi mengenai nilai precision, recall, f1-score, dan accuracy juga disajikan dalam bentuk tabel. Penyajian ini bertujuan agar hasil evaluasi dapat dilihat dengan lebih jelas dan terukur, serta memudahkan dalam membandingkan performa model terhadap masing-masing kategori sentimen.

Tabel 4.1 Hasil Evaluasi

Aspek	Akurasi	Precision	Recall	F1-Score
Event	88%	100%	87%	93%
Game	78%	84%	81%	83%
Karakter	76%	84%	77%	80%

Perhitungan Manual Event

$$Akurasi = \frac{TP + TN}{Total} = \frac{81 + 7}{100} = \frac{88}{100} = 0,88$$

$$Precision = \frac{TP}{TP+FP} = \frac{81}{81+0} = \frac{81}{81} = 1 = 1$$

$$Recall = \frac{TP}{TP+FN} = \frac{81}{81+12} = \frac{81}{93} = 0,8709 = 0,87$$

$$F1 - Score = 2 \times \frac{Precision \times Recall}{Precision + Recall} = 2 \times \frac{1 \times 0,87}{1 + 0,87} = 2 \times \frac{0,87}{1,87} = 2 \times 0,4652 = 0,93$$

Perhitungan manual Game

$$Akurasi = \frac{TP + TN}{Total} = \frac{52 + 26}{100} = \frac{78}{100} = 0,78$$

$$Precision = \frac{TP}{TP+FP} = \frac{52}{52+10} = \frac{52}{62} = 0,8387 = 0,84$$

$$Recall = \frac{TP}{TP+FN} = \frac{52}{52+12} = \frac{52}{64} = 0,8125 = 0,81$$

$$F1 - Score = 2 \times \frac{Precision \times Recall}{Precision + Recall} = 2 \times \frac{0,84 \times 0,81}{0,84 + 0,81} = 2 \times \frac{0,6804}{1,65} = 2 \times 0,4123 =$$

0,83

Perhitungan manual Karakter

$$Akurasi = \frac{TP+TN}{Total} = \frac{49+27}{100} = \frac{76}{100} = 0,76$$

$$Precision = \frac{TP}{TP+FP} = \frac{49}{49+9} = \frac{49}{58} = 0,8448 = 0,84$$

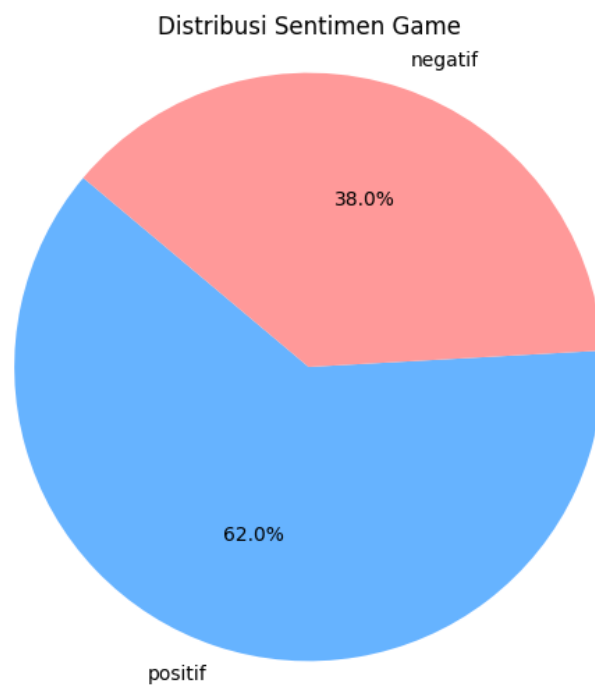

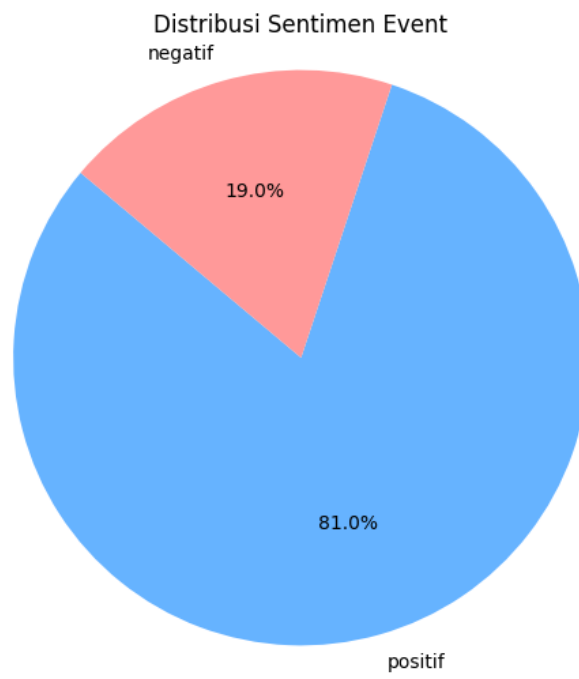

$$Recall = \frac{TP}{TP + FN} = \frac{49}{49 + 15} = \frac{49}{64} = 0,7656 = 0,77$$

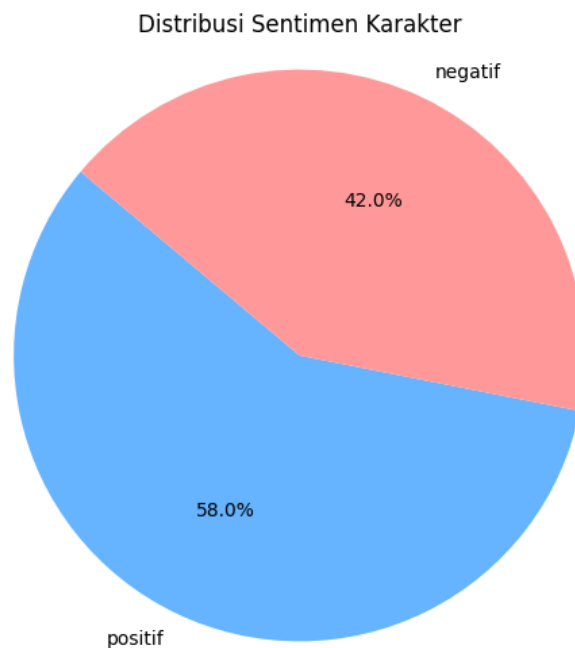

$$F1 - Score = 2 \times \frac{Precision \times Recall}{Precision + Recall} = 2 \times \frac{0,84 \times 0,77}{0,84 + 0,77} = 2 \times \frac{0,6468}{1,61} = 2 \times 0,4017 = 0,80$$

Dari hasil perhitungan manual, dapat terlihat bahwa aspek *Event* merupakan kategori dengan performa terbaik. Model mampu mengklasifikasikan komentar bertema event dengan akurasi mencapai 88% dan nilai f1-score sebesar 93%, yang menunjukkan kemampuan model dalam mengenali pola sentimen pada aspek ini secara cukup konsisten. Sementara itu, aspek *Karakter* menunjukkan performa paling rendah dengan akurasi 76% dan f1-score 80%. Hasil ini mengindikasikan bahwa masih terdapat sejumlah kesalahan dalam mengklasifikasikan komentar pada kategori karakter, kemungkinan karena variasi penggunaan bahasa atau kesamaan konteks dengan aspek lain.

4.6 Visualisasi Data

Untuk memberikan gambaran yang lebih mudah dipahami terhadap hasil klasifikasi sentimen yang telah dilakukan, dilakukan tahap visualisasi data. Visualisasi ini bertujuan untuk memperlihatkan sebaran sentimen yang teridentifikasi dalam dataset, khususnya setelah melalui proses pelatihan dan pengujian model klasifikasi menggunakan algoritma Multinomial Naïve Bayes.

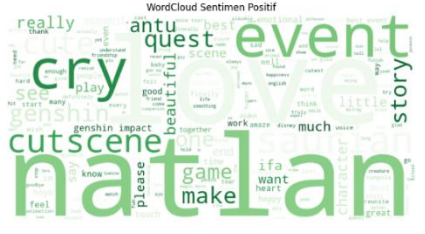

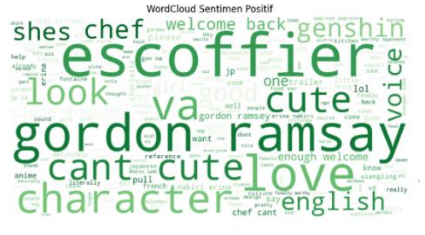

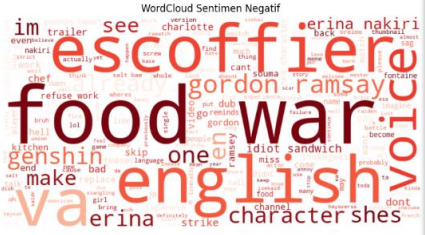

Gambar 4.13 Diagram Pie Distribusi Sentimen

Gambar 4.13 menunjukkan distribusi sentimen pada aspek *Game*, di mana sentimen positif mendominasi sebanyak 62%, dibandingkan 38% sisanya termasuk ke dalam kategori negatif. Hal ini menunjukkan bahwa sebagian besar komentar pengguna terhadap fitur game bersifat positif.

pada aspek Karakter, terlihat bahwa 58% komentar bersentimen positif, sementara 42% bersentimen negatif. Persentase ini menunjukkan bahwa walaupun mayoritas pengguna memberikan tanggapan positif terhadap karakter dalam game, masih terdapat sejumlah pengguna yang mengungkapkan ketidakpuasannya.

Sementara itu, yang menampilkan aspek *Event* menunjukkan dominasi sentimen positif yang sangat tinggi, yakni 81%, dan hanya 19% komentar yang mengandung sentimen negatif. Ini menandakan bahwa event-event yang dihadirkan *Genshin Impact* mendapatkan respons yang sangat baik dari komunitas pemain.

Tabel 4.2 Hasil *WordCloud*

Aspek Uji	Positif	Negatif
Event	 WordCloud Sentimen Positif for Event. The cloud features words like 'event', 'game', 'story', 'quest', 'scene', 'cut', 'game', 'make', 'want', 'heart', 'character', 'great', 'story', 'event', 'quest', 'scene', 'cut', 'game', 'make', 'want', 'heart', 'character', 'great'.	 WordCloud Sentimen Negatif for Event. The cloud features words like 'event', 'game', 'story', 'quest', 'scene', 'cut', 'game', 'make', 'want', 'heart', 'character', 'great', 'story', 'event', 'quest', 'scene', 'cut', 'game', 'make', 'want', 'heart', 'character', 'great'.
Game	 WordCloud Sentimen Positif for Game. The cloud features words like 'event', 'game', 'story', 'quest', 'scene', 'cut', 'game', 'make', 'want', 'heart', 'character', 'great', 'story', 'event', 'quest', 'scene', 'cut', 'game', 'make', 'want', 'heart', 'character', 'great'.	 WordCloud Sentimen Negatif for Game. The cloud features words like 'event', 'game', 'story', 'quest', 'scene', 'cut', 'game', 'make', 'want', 'heart', 'character', 'great', 'story', 'event', 'quest', 'scene', 'cut', 'game', 'make', 'want', 'heart', 'character', 'great'.
Karakter	 WordCloud Sentimen Positif for Karakter. The cloud features words like 'event', 'game', 'story', 'quest', 'scene', 'cut', 'game', 'make', 'want', 'heart', 'character', 'great', 'story', 'event', 'quest', 'scene', 'cut', 'game', 'make', 'want', 'heart', 'character', 'great'.	 WordCloud Sentimen Negatif for Karakter. The cloud features words like 'event', 'game', 'story', 'quest', 'scene', 'cut', 'game', 'make', 'want', 'heart', 'character', 'great', 'story', 'event', 'quest', 'scene', 'cut', 'game', 'make', 'want', 'heart', 'character', 'great'.

Setelah menampilkan distribusi sentimen dalam bentuk diagram pie, visualisasi data dilanjutkan dengan penyajian *WordCloud* untuk memperlihatkan kata-kata yang paling sering muncul dalam komentar pengguna berdasarkan masing-masing kategori sentimen dan aspek uji.

Tabel menyajikan *WordCloud* yang dibagi ke dalam dua kolom: sentimen positif dan sentimen negatif. Setiap baris mewakili satu aspek yang dianalisis, yaitu *Event*, *Game*, dan *Karakter*. Ukuran kata dalam visualisasi ini menunjukkan frekuensi kemunculan kata tersebut dalam komentar. Semakin besar ukuran kata, semakin sering kata tersebut muncul dalam data.

Pada aspek *Event*, kata-kata yang muncul pada sentimen positif seperti “udah”, “gue”, dan “emang” menunjukkan ekspresi yang cenderung mendukung atau menyukai event tertentu. Sebaliknya, pada sentimen negatif, kata “stabbed”, “neuvillette”, dan “wait” tampak dominan, yang menandakan adanya keluhan atau ekspresi kecewa dari pengguna terhadap event tertentu.

Untuk aspek *Game*, kata “natlan”, “quest”, dan “event” mendominasi bagian positif, menunjukkan bahwa banyak pengguna memberikan apresiasi terhadap fitur atau alur permainan. Namun, kata “event”, “quest”, dan “cry” muncul di bagian negatif, yang menunjukkan kemungkinan adanya ketidakpuasan terhadap beberapa bagian dari permainan.

Pada aspek *Karakter*, kata seperti “gordon”, “ramsay”, dan “escoffier” sering muncul dalam sentimen positif, menandakan bahwa karakter-karakter ini mendapat respons yang baik dari komunitas pemain. Di sisi lain, kata-kata seperti “voice”, “food”, dan “war” muncul pada bagian negatif, yang dapat mencerminkan ketidaksukaan atau kritik terhadap elemen karakter atau pengisi suara.

Melalui *WordCloud*, dapat dilihat bagaimana masing-masing sentimen dan aspek memiliki kata kunci yang khas. Visualisasi ini sangat membantu dalam memahami topik atau elemen apa saja yang paling banyak dibicarakan oleh pengguna dalam masing-masing kategori komentar.

4.7 Kode Program

```
api_key = "AIzaSyALdHvZAdx0Q1-ncTIYx7NhBlUGSoLtt-E"
video_id = "6YNK-Qy8Lco"
youtube = build('youtube', 'v3', developerKey=api_key)

# --- SCRAPING ---
def scrape_comments_labelled(video_id, limit=500):
    comments = []
    labels = []
    compounds = []
    analyzer = SentimentIntensityAnalyzer()
    next_page_token = None

    while len(comments) < limit:
        request = youtube.commentThreads().list(
            part="snippet",
            videoId=video_id,
            maxResults=100,
            pageToken=next_page_token,
            textFormat="plainText"
        )
        response = request.execute()

        for item in response["items"]:
            comment = item["snippet"]["topLevelComment"]["snippet"]["textDisplay"]
            score = analyzer.polarity_scores(comment)['compound']
            if score >= 0.05:
                label = 'positif'
            elif score <= -0.05:
                label = 'negatif'
            else:
                continue
            comments.append(comment)
            labels.append(label)
            compounds.append(score)
            if len(comments) >= limit:
                break
        next_page_token = response.get('nextPageToken')
        if not next_page_token:
            break

    return pd.DataFrame({'Komentar': comments, 'Label': labels, 'Compound': compounds})

df = scrape_comments_labelled(video_id, limit=500)
```

Gambar 4.14 Kode Scraping Data

Pada gambar 4.14 ditunjukkan merupakan source code untuk mengambil data dari *youtube* source code ini memanfaatkan Youtube data API v3 untuk mengambil komentarnya. Lalu komentar komentar yang berhasil di ambil akan di peroses dan diberi label sentimen secara otomatis menggunakan Vader Sentiment Analyzer yang dimana dalam proses pelabelannya hanya mengambil komentar positif dan negatif sedangkan komentar netral di abaikan.

```
# --- PREPROCESSING ---
def case_folding(text): return text.lower()
def cleansing(text):
    text = re.sub(r"http\S+", "", text)
    text = emoji.replace_emoji(text, replace='')
    text = re.sub(r"^\x00-\x7F+", " ", text)
    text = text.translate(str.maketrans('', '', string.punctuation))
    text = re.sub(r"\d+", "", text)
    text = text.replace('\n', ' ')
    text = text.replace('\t', ' ')
    text = re.sub(r'\s+', ' ', text)
    return text.strip()
def tokenizing(text): return nltk.word_tokenize(text)
def stopword_removal(tokens): return [word for word in tokens if word not in stop_words]
def get_wordnet_pos(word):
    tag = pos_tag([word])[0][1][0].upper()
    tag_dict = {
        'J': wordnet.ADJ,
        'N': wordnet.NOUN,
        'V': wordnet.VERB,
        'R': wordnet.ADV
    }
    return tag_dict.get(tag, wordnet.NOUN)
def lemmatizing(tokens):
    return [lemmatizer.lemmatize(word, get_wordnet_pos(word)) for word in tokens]
```

Gambar 4.15 Kode Preprocessing

Pada gambar 4.15 di tunjukkan source code untuk melakukan case folding, cleansing, tokenizing, stop word, lemmatizing supaya membersihkan data dari unsur unsur yang tidak relevan serta menyiapkannya dalam bentuk lebih terstruktur supaya lebih mudah di olah oleh algoritma klasifikasi dan menampilkan 5 contoh hasil setelah setiap processing data.

```
# --- SPLIT DATA ---
X = df['Cleaned']
y = df['Label']
X_train, X_test, y_train, y_test = train_test_split(X, y, test_size=0.2, stratify=y, random_state=42)
```

Gambar 4.16 Kode Split Data

Pada gambar 4.16 di tunjukkan source code untuk melakukan pembagian data yang telah dilakukan pembersihan (*Cleaned*) menjadi data latih dan data uji. Variabel X berisi teks komentar yang sudah diproses, sedangkan y berisi label sentimen dari setiap komentar lalu membagi data menjadi 80% untuk pelatihan dan 20% untuk pengujian, sambil tetap menjaga proporsi jumlah data positif dan negatif.

```
# --- TF-IDF ---
tfidf = TfidfVectorizer(ngram_range=(1, 2), min_df=1, max_df=0.95)
X_train_tfidf = tfidf.fit_transform(X_train)
X_test_tfidf = tfidf.transform(X_test)
```

Gambar 4.17 Kode TF-IDF

Pada gambar 4.17 di tunjukkan source code untuk melakukan dari data teks hasil processing menjadi bentuk numerik menggunakan tehnik TF-IDF. Kode ini memakai fungsi *TfidfVectorizer* untuk mengubah teks menjadi angka. Parameter *ngram range=(1,2)* digunakan agar model bisa mengenali kata tunggal dan pasangan kata. Nilai *min df=1* memastikan semua kata yang muncul minimal satu kali tetap dihitung, sedangkan *max df=0.95* mengabaikan kata-kata yang muncul terlalu sering di hampir semua komentar.

```
# --- SMOTE BALANCING ---
smote = SMOTE(random_state=42)
X_train_bal, y_train_bal = smote.fit_resample(X_train_tfidf, y_train)

# --- MODEL TRAINING ---
model = MultinomialNB()
model.fit(X_train_bal, y_train_bal)
y_pred = model.predict(X_test_tfidf)
```

Gambar 4.18 Kode SMOTE dan Model Klasifikasi

Pada gambar 4.18 di tunjukkan source code untuk melakukan *oversampling* SMOTE dan model Naive Bayes Multinomial. supaya data tidak bias ke data positif dapat menggunakan *oversampling* SMOTE lalu Selanjutnya, dilakukan pelatihan model menggunakan algoritma *Multinomial Naïve Bayes*, yang umum digunakan dalam klasifikasi teks. Model ini dilatih pada data yang sudah diseimbangkan, dan hasilnya digunakan untuk memprediksi data uji yang sebelumnya telah dipisahkan.

BAB V

KESIMPULAN DAN SARAN

5.1 KESIMPULAN

Penelitian ini dilakukan untuk mengklasifikasikan sentimen komentar pengguna terhadap tiga video YouTube Genshin Impact berdasarkan aspek Game, Event, dan Karakter. Setiap video dikumpulkan sebanyak 500 komentar, sehingga total data yang dianalisis berjumlah 1.500 komentar. Proses pengambilan data dilakukan secara otomatis menggunakan Google Cloud Platform yang terhubung dengan API resmi YouTube.

Komentar yang terkumpul kemudian dilabeli secara otomatis menggunakan VADER Sentiment Analysis, dengan hasil sebagai berikut pada game terdapat 319 komentar positif dan 181 komentar negatif, pada event terdapat 467 komentar positif dan 33 komentar negatif, dan pada karakter terdapat 321 komentar positif dan 179 komentar negatif lalu komentar-komentar ini diproses melalui beberapa tahapan yaitu preprocessing seperti case folding, cleansing, tokenizing, stopword removal, dan lemmatizing, untuk memastikan bahwa teks yang dianalisis bersih dan seragam. Setelah itu, data diolah menggunakan metode TF-IDF dan diklasifikasikan dengan algoritma Multinomial Naïve Bayes. Teknik SMOTE digunakan untuk menyeimbangkan jumlah data antar kelas.

Hasil evaluasi menunjukkan bahwa pada aspek Event memberikan hasil terbaik dengan akurasi 88% dan f1-score 93%. Aspek Game dan Karakter masing-masing memperoleh akurasi sebesar 78% dan 76%. Ini menunjukkan bahwa model mampu mengenali sentimen dengan baik, terutama pada komentar yang berhubungan dengan event. Visualisasi seperti pie chart dan wordcloud juga

memperkuat pemahaman terhadap sebaran sentimen dan kata-kata kunci yang dominan.

5.2 SARAN

1. Eksplorasi algoritma lain yang dimana penelitian selanjutnya disarankan untuk mencoba algoritma klasifikasi lain dalam melakukan analisis sentimen, seperti K-Nearest Neighbor (K-NN), Support Vector Machine (SVM), atau metode lainnya. Hal ini bertujuan untuk membandingkan performa model dan mencari pendekatan yang mampu menghasilkan tingkat akurasi yang lebih optimal.
2. Perluasan dan keanekaragaman dataset dianjurkan juga untuk menggunakan dataset yang lebih besar dan bervariasi, baik dari segi jumlah, sumber, maupun jenis konten. Misalnya, dengan mengambil data dari berbagai platform media sosial, topik yang berbeda, atau menggunakan lebih dari satu bahasa. Pendekatan ini dapat membantu model dalam mengenali pola sentimen dengan lebih akurat dan relevan di berbagai konteks.

LAMPIRAN

Lampiran.1 Komentar karakter

Komentar
8/6 Happy Birthday Escoffier. 🧑🍳❄️
Escoffier's such a queen I love her
Didn't even realize Savanna was in this teaser
bring the skip option to skip these dialogs in the game. many players don't want to watch these conversations but you stubbornly don't bring a solution to this. people hate doing quests because of dialogs. put a skip button now.
0:27 her pout is so cute
0:50 i can't believe they not only kept the design of savanna consistent, but mentioned her substituting marcottes for pluie lotus
1:39 cute but scary
escoffiers quest is so cool especially because some of its from here
This is Teaser is JP because EN VA don't want to work?
All I see from Escoffier after watching all her trailers are -Remy (Ratatouille) -Gordon -Shokugeki no souma
0:45 the girl here is the now-head chef at Hotel Debord who replaced Escoffier in her SQ, so sad that she became a different person after getting the title
Welcome back Nakiri Erina
This feels so food wars like, Escoffier especially feels very Nakiri Erina coded 😊
So many people are saying Gordon Ramsay, but I gotta wonder if more of the character was based on Erina Nakiri in Food Wars. Her look definitely suggests it.
Everyone here is saying Gordon Ramsay, but I'm getting some Food Wars flashbacks here
Stop with the gimmicks in the new area so I can come back PLEASE
Why are yall calling a French chef Gordon Ramsey 😭😭😭😭
She is giving me that NAKIRI ERINA VIBES!!!!
0:36 I come here to check Savanna after playing a quest.
0:29 WHAT ARE YOU AN IDIOT SANDWICH 🧑🍳🔥🔥🔥🔥🔥🔥
0:00 pretty sure

There's no excuse for this to not be in English.
What, because of a single Charlotte line at the very end? Screw off. No one would have missed that line being left silent.
Is she a food demon Edit: after watching her story quest I believe we can conclude that she's a metaphorical food demon on a bad day
Escoffier is love <3
0:27 my fav part
I wanna rewatch Food Wars now lol
0:34 kinda reminds me of... idiot sandwich?
Are you giving up on English voice-over?
Another character that looks better then furina
SHE SAID IT „What are you!“ „a goldfish with batter for brains“ Close enough welcome back gordon ramsay
Escoffier IS coming home on 1 pity
gotta love gordon ramsay in genshin
Might skip her for now missed Navia way too many time. Due to waiting for Wiro.
Raiden: **accidentally makes Fruit Paste**
Escoffier: "IT'S CALLED MASTER CHEF, NOT MASTER BAIT!"
I love that Escoffier's tail is basically like Doctor Octopus' tentacles.
0:29 what are you?
0:31 A stupid sandwich
VA: Nino 🍌❤️
IS NO ONE GONNA TALK ABOUT HOW SHE ASKED IF THE FIRST DISH WAS INSPIRED BY THE FLOOD OF THE PROPHECY
There is no way she is just genshin's gordan ramsey
TBH it's a FOOD WAR Erina Nakiri COPY!!!!
Gordon Ramsay. Erina Nakiri - Food wars. And Nusr-Et Gökçe, better known as the Salt sprinkle meme. All in one.
"WHAT ARE YOU!!??"
"an idiot sandwich"

"AN IDIOT SANDWICH WHAT!?!?"
"An Idiot sandwich chef"
-Escoffier pov.
I can't be the only one here who thinks Escoffier in the thumbnail looks and poses like Kirino from the Oriemo cover art
Definitely a descendant of Erina Nakiri
WHY HOYOO, I WANT TO HEAR HER BRITISH ACCENT 😞😞😞
close enough, welcome back xiangling
1:02 smug
the thumbnail is literally my sister can't be this cute but more like my chef cant be cooking this good ;-;
Why is this not voiced Hoyooo? Please upload these again in EN as well when the situation is resolved 😞😞😞🙏🙏🙏
Food wars??
Yes
I thought it was about to become Food wars rq
“WHAT ARE YOU???”
“IM AN IDIOT SANDWICH-“
Ngl. Gurl is so much like Nakiri Erina from Food wars
1:05 My fear has became true...salt bae meme. If one learned what salt bae did previously, the meme and anything associated with it will become cringe...
I love her already
the only thing that creeps me out is that female characters speak with children voices like they are 10 years old or smth .
escoffier is not beating the gordon ramsay allegations
other than being strict, i don't see any similarity between her and Ramsey, i mean... imagine Ramsey acting like her makes me shiver in fright 😱😄
Escoffier? A mi no me engañan, esa es Erina Nakiri
We need English 😭
0:37 👍❤️ the hand movement on the hair
1:18 genshin what r u doing?! what the hell
LOL why didn't they make her a dude she's literally Gordon Ramsay
Bro the downfall need to be studied... Back in the days these teasers used to get 1M views easily... Now it barely even reaches half a million...

my favorite part 0:15 - 0:36 , 1:16 - 1:26 😂😂😂 . she is a must pull for me i am in love with her voice ☑️🌟
Imagine the voice line when you give her some food she doesn't like and she roasts you for a full minute😂
"Overcooked on the bottom, crispy as fk, and it looks like Nahida's flip flops!"
Why is it not in English this is so annoying
I must say however, that the English subtitles are a little too mild XD Her insults are much more in depth compared to what's being shown in the subtitles XD
0:29 Jaja tremenda referencia a Ramsay xd
0:21 - 0:35 is my fav part
That reference to Oreimo😂
Close enough, welcome back gordon ramsay
How to switch on english? 🤔
My baby is so cute <3 Come home to me!!!
finally..some good f food , lol hells kitchen in genshin
Was it necessary to moan like that?
close enough, welcome French Girlie Pop Gordon Ramsay
My English chef cant be cute
0:30 idiot sandwich
It's actually so strange seeing her design next to fully clothed cooks wtf
The vision in the bow is so cute, and I love that she's just Gordon Ramsay as an anime girl.
So let me get this straight. They make a chef character that leans into the Chef Ramsey thing. They get an English VA with an actual English accent.. but they have her do a plain voice???? Someone make it make sense
"on a good day"
Damn.
"There's so much garlic in here, it could kill every vampire in Teyvat!" - Escoffier Probably
No está vez , en tu rerun , todas las protos por skirk
Meanwhile Xiangling in Liyue: "Finally! A worthy opponent!"
Isn't Escoffier's English VA available? I thought all the newer hires weren't caught up in the strike situation.
Please don't tell me this is in JP just so Charlotte could be voiced. 🤔
She reminds me of narakai from food wars. (Idk how to spell her name)
She patted no one but her)
How many funny things are being written about her)

1:00 Fastest hand in the wild Fountain o_O "Escoffier-soma, be my teacher!..." ;D
God tongue is back 🤔🙏
If Gordon Ramsay was a cute anime girl
There's no way my chef can be this cute!?
No EN dub?
Please hoyo make npc better 🙏🙏
Bruh she made 2 of her chefs cry
Genshin but Gordon Ramsay X Food Wars!
♥
For a second I was scared it would turn into Food Wars 0:54
Al final dice que no tiene que ver con la realidad... entonces ella no es así
Now wheres Souma fro. Inazuma and er can declare FOOD WAR
SAYING JOKES ABOUT THE FLOOD IN FONTAINE IS CRAZY.... 🤔🤔🤔
this is lousy, yet another girlboss character, please stop
We have our own gordon ramsay in genshin ❤️❤️❤️
boring, she doesn't look like a 5star, why so bad MHY?
we got shokugeki no genshin before GTA 6
1:18 Sounds like Jibril from No Game No Life.
is it jp for yall too or I'm just insane
Finally japanese trailer 🤔
I love that most of the comments here are just the Escoffier Gordon Ramsay jokes
salt bae refference as well. escoffier..got tail like Jane Do.similar roughly.
erina nakiri food wars??
Oreimo thumbnail, Kirino attitude and Manami voice, truly the Impact to my Genshin
I swear the staff of mihoyo loves salt bae
WHERE IS ENGLISH VERSION 🤔🤔🤔
i hope she says "sosig" in her story quest
Close. Welcome back Gordan Ramsey.
Me- Look its Escoffier My Friend- No...
its Gordan Ramsay

😭 0:10 wow girl too soon
1:06 Absolute Cinema! 🤔
Tone it down nah, I want to be feel like I'm in a episode of Hell's Kitchen when I play her character quest. 😊
Oh no my Raiden savings..... how'd they end up on Escoffier's banner?
Escoffier is lookin' like Gordon Ramsay + Erina Nakiri from Food Wars
I really wanted the JP VA for nakiri erina to do her voice but I guess she is already the one to do nilou?
I nedd 😞
Mihoyo can't make a single thing of their own, they can only steal from other works
Lame
Nobody cares about this character... Its crazy.... Hope genshin learns from this and start releasing lore relevant characters... No more filler characters pls!!!
Gordon Ramsey Isekai 😂
WHY IS SHE HAVING A SHOUKUGEKI NO SOMA FOODGASM ❤️
Close enough, welcome to Teyvat Gordon Ramsay
She has VERY HIGH intelligence, also she is so perfect that Gordon ramsay would BEG to be her apprentice. I LOVE that she is like a slightly nicer version of chiori and also WAY more expressive.
1:07 Salt bae reference 😊
0:28 nahhhh they doing the "im an idiot sandwich" bit lmfaooo
❤️
She's like fontains citlali. I love it. Fast talker, super emotional, and aggressive
Can we please have English version?
Gordon Ramsey as an isekai waifu. I like that.
We got Gordon Ramsay in Genshin Impact before GTA 6 🙏😂
im so mad she didnt say idiot sandwich 😭😭 i love her sm
marco pieere white's influence seep in into the gatcha universe gg
Why are their (escoffier and charlotte) jp voice so high pitched...
"That was her on a good day"
Died 1935. Born 2025. Welcome back Georges Auguste Escoffier 🍳👨
What is this Hoyoverse? You already hired a British VA for Escoffier. But you still deprived us the whole EN trailer of Escoffier who has a voice just because Charlotte VA refused to work for one single short line.
I'm done. I'm skipping Escoffier and Skirk because I don't feel respected as a player if the Genshin team are gonna continue not to care for EN player's experiences. Please recast the VAs who refused to work already. You wait &

see approach for too long. These American Union VAs already planned not to work forever.
0:01 Invincible title card jumpscare
my little chef cant be this cute
My Hell's kitchen chef can't be this cute
English please
“What are you? an idiot sandwich. that’s right!”
I get some Erina Nakiri vibes from her, I don't know why 😂😂😂
"Due to the already established American EN VAs being lazy good-for-nothings, this trailer will be in Japanese", that's what the description should have said
Screw SAG-AFTRA, hope everyone willingly refusing to work and bullying other VAs gets replaced. Start with Paimon's VA first
imagine escoffier looking how xiangling cook lol
Infinix Smart 9 にダウンロードできないのはなぜですか?本当に欲しいです
I think her being rude to the guys and very sweet to the girl is a reference to how Gordon Ramsey is FERAL with adults on his show but super kind to the kids 😂 1:00
Omg! I’m so excited to try her out and pull for her, this trailer was awesome, and her design is so cute! Love this video! :D
Close enough 🤖, welcome back gordon ramsay
I don't get why it's in jp, surely the va can't strike before the characyer even comes out?
La-la-la-lava, ch-ch-ch-chicken Steve's Lava Chicken, yeah, it's tasty as hell Ooh, mamacita, now you're ringin' the bell Crispy and juicy, now you're havin' a snack Ooh, super spicy, it's a lava attack
Me bajo del barco no vale la pena jugar toda la vida por un personaje que jamás te saldrá. 🙄
Close enough, welcome back Gordon Ramsay!!!
What are you ? 🤔🤔🤔 and the gesture with the arm for the salt
Do you know the down side to not having all of the English VAs back yet, concerning trailers like this?
At the beginning of the trailer, I can't tell if I'm hearing Charlotte, or Escoffier talking before you see the latter; both Japanese VAs sound the same to me! It

doesn't help that I've never listened to the JP VAs before Natlan, so I never know who's talking until I see someone
"My Gordon Ramsay can't be this cute" ahh trailer
Is her lastname Ramsay by any chance
No saldrá versión en inglés?
her and xiangling would get on so well- we need an event of those two fr!!!!
is she erina nakiri from Food wars/shokugeki no soma XD
for all who don't know, her name is a reference to this man: Auguste Escoffier (1846–1935) was a legendary French chef, restaurateur, and culinary writer, widely regarded as one of the most important figures in the history of modern French cuisine. He simplified and systematized the elaborate and complex cooking style of haute cuisine developed by Marie-Antoine Carême. Escoffier created the kitchen brigade system, a hierarchical organization of kitchen staff with defined roles (e.g., sous-chef, saucier, pâtissier), which is still used in professional kitchens today. He compiled and standardized thousands of recipes in his seminal book, Le Guide Culinaire (1903), which remains a classic reference for chefs. Escoffier helped transform the image of chefs from laborers to respected professionals. He partnered with César Ritz and helped elevate the standard of hotel dining at places like the Ritz in Paris and the Savoy and Carlton Hotels in London. He was also know as: "The King of Chefs and the Chef of Kings" And "Father of Modern French Cuisine"
Is there a reason for no English va?
She sounds like Marine a bit.
Went from isekai Gordon Ramsay to food wars 😂
Also I forgot this genshin impact not failure flopped anime food wars.
This female character was definitely inspiring erika from anime food wars and personality definitely erika and Gordon Ramsay.
Gordon's got some real competition now 😂
Escoffier would be excellent at Cinema Sins
Ugly fanservice game thank you!!!! Plus like the way all teasers and trailers turned in to goonerbaits bye!!!!
imagine if the freaking kitchen nightmares youtube guy used an escoffier thumbnail.... ...i can actually see it happening
does the new EN VA also refuse to work?

1:06 SALT BAE lol
Want her & Xiangling to meet. <3 & that poster pose of her reminds me of that 1 anime back in the 2000s. I can't remember the name of it but I know the anime cover of it. I think it's: "My sister can't be this cute" or something. Nice chara trailer. She's like a mix of all these other anime chara that we can think of. Can't wait for the next patch.
My chef can't be this cute 🤪
REPLACE THE VOICE ACTORS WHO DON'T WANT TO WORK ALREADY!!!!!! The "strike for protection against AI" was a lie all along. Keep the ones who will keep working and fire the ones who don't. It's almost a year already!!!
she sure looks like a good companion having around (never cook nearby her)
And so it's a 5-star... When Genshin stops treating us like wallets, maybe they'll learn to choose 4 and 5-stars wisely...
New 5-star: She cooks... big character story...
There are two types of people when seeing this character. One see's Gordon Ramsay from hell's kitchen and the other See's Nakiri Erina from food war.
i hope the 5.6 isn't muted
Her design is so pretty and cute!!!! Good luck to everyone who will be pulling on her banner! ❤️🌟
I hope Gordon Ramsay sees a video of her one day 😭❤️
Hey hoyo? Just asking can you add more clothes to the in game girls? Like mualani,dehya,xilolen,varesa and more? Because of those few characters I'm not allowed to play the game
ESCOFFIER PLS COME HOMEEE
yall should i wish for escoffier or wait till skirk..?
So now we're gonna have new character teasers/trailers in Japanese too because of the strike? Charming. Why not at least throw us English speakers a bone and make this in English? Remove Charlotte if need be, any NPC can voice her 2 lines of dialogue...
Stoooooopppp!!!
You're making it harder for me to save my primos for the Inazuma chronicled wish!
Can Escoffier judge our teapot kitchen? Asking for a friend.
JP VA - Satomi Sato
Has "K-on!" moved to Teyvat?
bruh forget xiangling Escoffier has gotta have a battle with Gordan ramsey

Escoffier: WHAT ARE YOU??
Them: An idiot sandwich.... 🍔 🍔
Omg I love her already so much ❤️❤️👀👀 can't wait to pull for her
Bennett though as Escoffier's student would be priceless. The worst dishes ever made, probably burn them and/or the kitchen, probably make something unintendedly poisonous too 🤢🤢
they did translation mistake at 0:23. what actually Escoffier saying is, it is even harder than hilichurl shield
She is so Erina coded, I can't 😭
Xiangling: Finally a worthy opponent, our battle will be more than legendary.
I disliked this video because it doesn't have an English dub, and as long as this company isn't able to make it have an English dub, no matter how much money it has, you will continue to criticize it.
2021: Eula Sneezes at the end of her teaser, assuming Jean is talking bad about her 2025: Escoffier Sneezes at the end of her teaser, because Charlotte talked bad about her
Genshin fans are so selfish. EN VAs are literally risking their careers and the player base is all, "give me my waifu!"
The Oreimo Pose 🤔🤔🤔🙏🙏🙏
That Thumbnail 🤔🤔🤔 Kirino 😂🤔🤔. Da Wei's History needs to be checked
Definitely she's Nakiri Erina. Now I can say she's Childe's twin, even in cooking XD
MY GIRLLLLL 💋
She looks like Chitoge from Nisekoi lol
Welcome home, Mr. Ramsay
We love our Queen Nakiri Erina in Genshin ❤️
Gordon lookn hella cute today. 😊
I love how they basically just put Female Gordon Ramsey into the game
Fontaine's Gordon Ramsay 🤔🤔
i think xiangling's main course can beat her, but she win at desserts (she's french)
I'm thinking Charlotte VA is now missing out to her voice line
Dayum, that imp didn't hold back, SHEEESH 🤢🤢🤢

a bit unrelated but do they not have a va for escoffier? she's a new character so what's the difficulty with finding a voice actor who's not on the strike, especially now that hoyo hired an en va outside of the united states for kinich
So we have mute impact one more 😊
Imagine hoyo does a shogeki battle with cloud retainer, xiangyan, and escoffier as a new event either in liyue or fontaine.
I love my new Gordon Ramsay wife!
Shokugui no Souma
Close enough, welcome back, Hell's Kitchen.
where i can watch dub en ? kind a lame
no wendy a ti no te queda bien este papel
No wonder she will make a great team with Skirk, someone who can tolerate and deal with her attitude =P
Ah yes, Genshin memeimpact is back and i love it
IT'S MY BELOVED ESCOFFIER!!!!!!!!!!!!!!
Is she Nakiri san from shokugeki no souma?
Oh great, more chinese freks into fictional food instead of actually caring for the devlopoment of their game.
Hoyo should just combine Gordan Ramsay F jokes and Food War's "Artistic" value into this PV.
Gordon Ramsey if he was isekai'd into Food Wars
The title should be "My Gordon Ramsay can't be this cute."
Is that... an OreImo reference? 😊
Not using the EN VAs British accent was a huge missed opportunity for endless Gordon Ramsey memes. I'm not mad. I'm disappointed in you, son.
Is no one going to talk about the fact that the thumbnail is the classic Oreimo pose for Kirino?
why are the trailers still without the English version?? ❤️
Food war
Oh please have her shout "Lamb Sauce"!!! please!
Raiden Ei's only worthy opponent
Close enough, welcome back food wars erika
The va has to be in the food wars cast 😊
New Anime : My Cook can't be this Cute
0:35 I think this was said to all of us 😊
El equilibrio perfecto entre Erina-sama y Gordon Ramsey. Necesito la referencia de la salsa de cordero en sus líneas de texto.
Oh come on, we just saw her perform for the live event, don't tell me she's on strike and they couldn't film the trailer!?
WHERE'S THE LAMB SAUCE!!!!!! 😊😊😊😊

Character Erina nakiri version 2 from Shokugeki no Soma
I want to give her a new title as "The Delacroix of Fontainian Cuisine". She's a version of Iron Chef French Hiroyuki Sakai.
SHES SO PRETTY (something I wouldn't say to Gordon Ramsay)
Escoffier is scary
Oh geez. Escoffier is cute when she cooks like Sanji and scarier when she acts like Gordon Ramsay. But damn it! I can't believe that Charlotte english voice actress didn't return yet!
This is Kirino and I love it!
I'm sorry fermented juice OTL 🥹🥹🥹
Shokugeki no Shouma!!! Shokugekiii
So close to Idiot Sandwich...
Still, gonna be excited to welcome home Demoiselle Escoffier!
Food wars ahh character 🥹🥹🥹🙏(im still pulling)
This is bad I can hear all the comments
2:00 😊
She's giving me flashbacks to Tighnari, where most people thought she'd be kind of cutesie and nice, but she's very good at what she does and is not shy about it! I'm liking her a lot more
ITS GORDON RAMSAY EVERYONE SCATTER. PROTECT EI AHHHH
Dear Maya Aoki Tuttle, EN VA of Charlotte, be so kind to get lost! :)
Close enough. Welcome back , Gordon Ramsay
Am I wildin or does the dude look like Ayanokoji?
2:04
There's no way our chef can't be this cute!
Xiangling: finally a worthy opponent our battle will be legendary
Ei: Pathetic...
If Gordon Ramsay ate on of escoffier dish he would DEFINITELY LOVE IT.
IM SO READY FOR ESCOFFIER RAMSAY!!
She seems more like Erina from Food Wars than Gordon. Osomatsu!
Not gonna lie, I was interested to find out how she sounded in English in this scene. With her Ramsey-like personality + British VA, I was curious in that moment just to see what her EN voice was like.
Her JP VA did great, but it's not the same because I don't understand Japanese. I know I sound like a hypocrite for saying that since I use the CN voiceover, but in moments like these, I miss the EN dub.

Okay I was planning to skip her. But I can't skip Erina Ramsey!
Hermosa ♥
Gordon Ramsay Salt Bae Food Wars
Am I missing anything?
The gordon ramsay of genshin 🤖
Erina of Genshin 😊😊😊😊❤❤❤❤
We have As Hell Kitchen before 2026
making the chef apologize to the fermented juice is so Gordon Ramsey coded lmfao
Esa es Erina Nakiri de Shokugeki no Soma, a mí no me engañan !!!!!
I'm way too focused on if the woman with brown hair at 1:56 by Charlotte is a future playable or just an NPC
Where is the damn source
Oh yes nothing like abuse to make your students better...
this is the final trial for my skirk savings. gotta be strong
What are you? I'm a goldfish
Yep Gordon Ramsey got genderbent 🤖♥
Gordon Ramsay x Shokugeki No Soma 🤖
0:21 She actually says: "That's harder than a hilichurl's shield". XD
مسخرة الحين ذي ة ولا ه
THANKS FOR THE FOOD <333
Erina from food wars reincarnated as a chef again
Meh, another Fontaine character with the same vibe. Escoffier looked cool in concept, but honestly, her design is just more of the same short skirt, delicate aesthetic, and that overly “cute” voice acting. It feels like HoYoverse is sticking to their formula without taking risks. The Cryo animations are nice, and the whole culinary theme is unique, but I can't help but feel like they could've pushed the creativity further. And yeah, Fontaine characters still lean super light-skinned, which has been a talking point for a while now. She's fine if you like the aesthetic, but for me? Nothing groundbreaking.
Again in Jp? Aren't they tired of striking there? It's worse for themselves... (They'll introduce AI replacements faster)
Great... Gordon Ramsey vibes... wow
Not genshin kidnapping her from food wars

Welcome to Hells Kitchen xd
Gordon reincarnated in Genshin Impact as girl to with number 1 chef from Liyue 😁.
❤️
My little Ramsay cant be this cute
Why isn't the video in English in the English YT channel? Escoffier is a brand new character with zero lore and zero old voicelines. How come they already have problems with the English voice actor?
I want the gameplay!
Parodying Ramsay in japanese is like barking like a kitten. Can you do it in eng, please?
god i wish she had irish accent in en
Welcome to Heck's Kitchen
Hi Father Please My phone is giving up Bc of the Update 😞
But odd thing: Furina, Lyney and Clorinde had garters. But Escoffier had garters: big problem? 😞
"My chef can't be this cute"
I love it
Nice trailer. Would be even cooler if I could enjoy it in my native language of English. End the strike and give the VAs the pay and protections they rightfully deserve
Where is English VA? Is not she new character, it is hard to find other VA with other studio contractor for that company which makes billions in a year?
So Gordon Ramsay will pay child support, yet?
Why is this trailer not in English? I'm sick of reading subtitles and not watching what is going on in the video.
unknown language on global channel. this is bullshit. they got their own channel, why put it here? just fire sag va.
Is this litterally Erina from food wars ?
The Va is available and even appeared during the livestream and character demonstration.
Why is this in JP?
Unnötigster Char nach Varesa..... Naja gut könnten glatt Freunde sein. Einer frisst, einer Kocht..... Dat is nimmer mein Genshin xD
Erina from shokugeki no soma isekai into Genshin Impact
Thanks to this trailer I'm convinced I'm not gonna pull for her ❤️
Hey food wars your god tongue girl is here.

Video title: english channel name: english video: japanesse with no subtitles. Can we start calling out how dumb this is?
Ogni riferimento a Hell's Kitchen è assolutamente casuale 🤪
Now I really want Gordon Ramsey to react to Escoffier!
Yey another woman 5 star. Can we finally get a man 5 star? Capitano or someone? Those characters can be good but come on how much more can you do this Hoyo?
I HOPE I WIN THE 50/50 THIS TIME
Why she looked like the God's Tounge ?
Mihoyo learned from Sigewinne: Emilie and Escoffier! 😊😊😊❤❤ Emilie is underrated, but good Dendro sup dps, not only pyro+dendro. Odd thing, but I like her more than Nahida! 😊 I'm future Effie main! 😊😊
I want escoffier and xiangling to have a food battle now! Lol
The fact that the character trailers are in japanese now kinda hurts me, I don't even want to imagine Paimon talking almost alone in 5.6. Gotta switch languages then TvT
02:04 My Gordon wannabe chief can't be this cute
Cute
So we can't enjoy EN Escoffier because Charlotte's EN VA is not working? great...
i hope gordon ramsay knows that he's in a waifu gacha game
I'm pulling her! 😊❤ After that, Nod Krai feels better. Escoffiers adventures! 😊❤❤❤❤
Brilliant!
My Gordon Ramsay cannot be this cute
Waaa really want heeeerrrr but have to skip again. 🤪
She looks so cute <3
"WHERE'S THE LAMB SAUCE?!?" 😊😊
Love her 😊
Love how she is named after a French Chef.
Where is the English voice 🤪
All hail Gordon Ramsay 🇯🇵🇯🇵🇯🇵
why not in english her va is working like any normal decent va not like others
SHE NOT WEARING HER BRAAAAAAAAAAAAAA 💀💀💀💀💀🤪
not the salt 🤪🤪
1:05 they love this meme so much omg 🤪

Wonder how she is gona feel about us cause the traveler is a pretty good cook.
why this is o,n jp ? ..Doesn't she have en voice?
Alright people, we got Erina, where is Souma?
Bless you escoffier
As I hoped, they went full Food Wars.
Yeah, im pulling for her. Finally a new sassy waifu.
She's cooking🔥
“Wherisu da lambu saussu” would go haaaaard😭🔥
I want a sitcom where Escoffier teaches Ei how to cook
reminds me of food wars
She's a mix with Erina in food wars and Asuna in Sao
Erina 2.0 welcome :D
Hoyo please execute Paimon ENG VA thank you.
No Eng VA?
My little tsundere chef can't be this cute!
She could be a good character if it weren't for her terrible gameplay. The most pointless attempt to force players to play through freezing.
Share same va as Ritsu from K-On which means 1, Navia - Yui 2, Chiori - Azusa 3, Emilie - Mio We just need character voiced by Mugi's VA and we have after school tea time
So they really did do Varesa dirty in her Teaser Trailer. This one looks way more animated and more dynamic than the Cow girl's... lol.
why this is in japanese? her va was in livestream :/
She looks like FIschl sister.
Okay we have Nakiri escoffier in genshin impact👍
The way shes gentler with the girl omg😭
Glad she isn't a fanservice character
We can finally roll for Gordon Ramsay himself 😄😄😄😄😄
No English dub huh so strike happens to a new character
ESCOFFIER MY BELOVED
her cute face and expression are perfect it would be super perfect if she voice by erina(food wars) or asuna(SAO) but her current VA is also good definitely a must C6
So we have references from: - Hell's Kitchen - Food Wars - Salt Bae - Oreimo

this is Gordon Ramsay + food war with soma!!!
Can I honestly say that she's one of the most beautiful characters in the entire game? She's so gorgeous 😊
Where is the English subtitles lol
So...a new Tsundere. Again. 😬👉 Because we haven't enough at this point (*sarcasm*). The lack of creativity makes me sad and the pre-view annoyed me already.
Reminds me of Erina Nakari from food wars
2:05 My Little Chef Can't Be This Cute
My little cocky chef can't be this cute!
Bro dont say the english voice actor of escoffier is already on strike 🤖
Escoffier jp va should be Ayana Taketatsu
She's basically Erina Nakiri lol
Are we not going to have English voiced Teasers anymore? Or is it going to come later? It is a new character, come on...
0:49 one thing I love is even though she's harsh you see here she's ether comforting or offering a towel to the chef who messed up as if she was helping wipe off her sweat. It shows while my girl is VERY harsh and to the point, she's not trying to knock down her students for no reason. She wants them to succeed, while harsh it's good criticism and if she goes too far she offers them comfort even if it doesn't seem so at a glance.
The chicken is so undercooked a good vet can still save it ~escoffier ramsay
Is it just me or does her personality look like Nakiri Erina from Food Wars 🤖
My Escoffier Can't Be This Cute
Aaah I can hear Chitanda in her excited voice !!
Wait is the girl with Charlotte an npc? Bc I think she looks a bit like a playable character
Just replace the missing VAs already having a trailer in jp just cause of one character in the end is so dumb. Can't even hear the new character cause of them now
Why is there no English VA if she was on the Version 5.6 Special Program?
Ah, so Genshin is getting a Food Wars character, I see.
I can't believe there's going to be a Gordon Ramsey genderbent Genshin sona out there and people are going to pay for her lmao
Haha, that was so cute! Seriously, someone remind me... what was that anime where girls org*sm'd from eating delicious food? This so reminds me of that, I need to watch that anime one day, lol

Just want to name names here. Maya Aoyi Tuttle is the one who is supposed to voice Charlotte here, but she's not for at least one of few reasons:
1. She's a SAG VA;
2. She's a non-union VA aiming to join SAG someday, or;
3. She's being threatened by SAG to not voice, or;
4. She's friends with Corina Boettger, who has been manipulating everyone to turn Genshin union for her own medical bills.
This is why the teaser for EN Genshin is in JP: Because the actress, Tuttle, isn't voicing. You can go to her about our harmed experience unless #3 is her reason for not voicing in this teaser. We need the EN dub back, through recasts or reform. Remember that you can always contact Genshin's customer service any time in game or through email. Thank you for reading.
This is Erina Nakiri :D
I just know that her response to bad food will more savage than wanderer's.
People be like "Genshin/anime Gordon Ramsay"
My brothers in Celestia, she's literally named after one of, if not THE most, influential chefs in French cuisine
Gordon Ramsy fr 😂😂
Escoffier with the first chef 😡
Escoffier with second chef 😡
Escoffier with third chef: you're sweating dear, let me help
I see preference 😂😂
Portraying men as failures and women as capable is such bs bruh.
Gordon Ramsey got isekaid after watching food wars but entered the wrong story and ended up in Teyvat
I love how everyone is immediately comparing her to Gordon Ramsay lol so true
Welcome back Erina
Food wars: Genshin Impact Edition
"What inspired you to drown this Tripes du Port? Was it the flood?"
"Apologize to the fermented juice now!"
This is radiating so much Gordon Ramsay energy AND I LOVE IT!
I'm seeing all these Gordon Ramsay comments, I mean if you think about it, Gordon was trained for classical French cuisine.
Also for all the Frenchies out there do you find it offensive for the distinct lack of snails in this vid?
She's so peak I can't wait 🔥🔥
Raiden Ei's doesn't like this sm 😂
Thumbnail looks like My chef cant be this cute lol

this is genshin's second salt bae meme lmao
Food wars? 1:21
Now we want to see escoffier cook with ride in shogun/j
Will she smashing a Salmon 🤔
Genshin Impact - Shokugeki no Soma edition
This dish is drowned in juice so much that James Fvuking Cameron is making a movie about it!!
I toight it was a joke but she is really Gordon ramsay
This is so food wars coded and i LOVE IT ❤️❤️😭😭
Why did I remember Erina nakiri from Shokugeki no Souma 😂😂😂😂
My headchef cannot be this cute :v
erina-chan ❤️❤️
why this channel only have japanese dubs now ???? did they stop doing english dub for the game or something ?
HEAR ME OUT, ITS LITERALLY GIVING CLAIRE FROM IM IN LOVE W THE VILAINESS GOOOOOOOOODDDDDDD PLS MAKE HER A WLW SOLDIER
i love this haha! 😊😊 Cant wait to pull her! my Shenhes gonna shine! 😊😊□□□
WHERE'S THE DAMN SAURIAN SAUSE!!!
Now I feel that the absence of the VAs affects my experience watching the videos, because if even one of them is missing, the entire video switches to another language, spoiling that some other character will appear on screen.
welcome home nakiri erina!
So she's just an annoying Kryo-Fischl Kuudere with a lance? Lol no. Hard skip. Highly doub she is ever good enough and does damage. Call me when we get a 2nd Neuvilette or Archon.
PLEASE BRING BACK ENGLISH VOICE ACTING 😭😭😭
"Escoffier used to work at a gourmet restaurant" says in the Livestream, I bet she got fired cause she was too strict😭🙏
Many references in one video... 1. Gordon Ramsay 2. Nakiri Erina 3. Salt Bae 4. Kousaka Kirino 😊
Did her VA already strike 😐😐

Whole trailer in Japanese because a character in it has their English VA on “strike”
Ugh. The whole “strike” thing has been poorly documented to the point people like me don’t give a damn who it screws over anymore. Just replace the “striking” VAs already
Tainaka Ritsu and Chitanda Eru voice. Make me remember that "i love sushi by Ritsu" and "kininarimasu by Chitanda" 😊
Varesa : MORE PLEASE
Fontaine previously: an orphan raised in prison, a fashionist born in inazuma, the hydro sovereign on a judge's post, twisting archon, house of the hearth trio, a perfume maker also working as a forensic cleanser Fontaine now:
She has an en va who voiced her already why's she in jp here.....
Not beating the Genshin Gordon Ramsay allegations animate soon
Literally Gordon Ramsay 🔥🔥
When they mentioned what she was like during the presentation I was already wondering if they went the Gordon Ramsay route. Looks like that was really the point. 🤔
Bukankah ini my❤️❤️❤️❤️❤️
Escoffier come home pls.
Time to rewatch shokugeki no soma :D
HER JP VA IS SO SOO ADORABLE
I love Coffi
She's definitely Erina from Food War! Shokugeki no Soma LOL
she's cute
WE LOVE YOU ESCOFFIER
I saw Gordon Ramsay, Salt Bae and Food Wars lmao
no stomach physics, i love her
im not pulling cause i like her, cause shes useful.. what was that pose..
Close enough. Welcome back Erina Nakiri
close enough, welcome back Gordon Ramsay
Food wars ahh reaction 😂
Close enough... WELCOME BACK GORDON RAMSAY
Why do I like it?
kok jadi inget nakiri erina..😂
Where's the English Version?? 😞
She literally has an eng va, why tf in jp again 😞 Is it cause of Charlotte?
Savanna such cutie! (^ω^)

Why am I hearing hilichurl on 0:21?
The direct translation is "Hey, that's tougher than the Hilchurl Shield!"
ESCOFFIEE MY LOVE
Idiot sandwich equivalent is now Teyvat canon! Ahaha good luck to everyone pulling Gordon Ramsey!
This gives me shokugeki no souma vibes 🤔
I'm looking forward to a video about Ifa, at least he's more chill lmao
0:24 in jp she says "it's harder than a hilichurl's shield!" 😂😂
Huh. Why'd this need to be in JP when only Charlotte's voice would've been mute?
Love her
"My headchef can't be this cute"
1:06 there is no way.
I thought that Chitanda's VA (also Escoffier's VA) here suit more with Nilou, and switch with Nilou's VA (also as Erina's VA). Also their personalities a bit similar 😂😂
Erina from Shokugeki no Souma
Я НА ВАШИ КОЛЕНИ, ПОЧЕМУ ТАК КРАСИВО ❤️❤️❤️
Even Hoyoverse scared of putting ENG VA they are sacred of Gordon Ramsay.
Will she be actually strict or end up like granny itzli
I thought I clicked on Hell's Kitchen.
Oh well, close enough.

Lampiran.2 Komentar event

NOOO I'M *SO* SAD I COULDN'T PLAY SINCE 5.1 AND MISSED THAT EVENT 😭 LOOKS SO COOL WITH THE NATLAN & FONTAINE CHARACTER CROSSOVER AND ESPECIALLY MY FAVE NEUVILLETTE 😭 (love WrioathSLAY & Navia too)
I enjoyed the video too much. I missed the coupons. :<
the new weekly boss in monstadt is one of my favourite ever. its so extremely cool looking
They should have kept Escoffier's original accent
The best event guys and I love the archon quest AAAAA VERY BEAUTIFUL
Kinich has a new english voice actor here. Good job hoyoverse for hiring new VAs. Im tired of doing main quest with voiceless characters. It's time for hoyoverse to replace all those english VAs who are no longer working with them. For those English VAs who still work for Genshin, we appreciate that you keep supporting this amazing game despite the issues. Thank you.
I'm literally watching this while playing on genshin impact 🤩👄🤩
Lol at 9:39 it sounds like that oof from Roblox.
3:37 "neuvilette was stabbed" but in the archon quest this didnt happen?

11:37	Fase	1
22:48	Fase	2
Full Skip 🎧		
I wonder if Emily cats likes cats 😂		
im SOOOOO excited vro		
No way broo		
伊法很帥想抽，但沒石頭了 😞		
Why is chronicled wish coming this year early? i thought it only comes every year or every lantern rite just curious		
these voices are so cringe I honestly can't watch this		
I Missed Mondstand So Much, This is So Cool Quest, I cant wait to Play it		
This trailer looks INSANE!! Albedo on Trial?! Kinich in Fontaine? a few seconds of the Ragbros fighting side by side?! We coming back to Mondstadt???? I cannot wait ❤️❤️❤️❤️		
guys, how long will the prayer of chronicles last? will it last only 21 days or all 42? (i don't remember the previous prayer of chronicles, and how long it lasted so i need to know if i can knock out both miko and kokomi) 😞		
16:16 yay he works with his best bro !!! 😊		
12:56 does it just repeat whatever ifa says like a parrot hahaha		
I am NOT cooking a blubber beast! 😊		
I thought I'd give the game another shot with this new update. Big mistake. Turns out the only thing that's improved is the developer's ability to disappoint. Let's break down this masterpiece of mediocrity:		
1. Voice Acting & Lip Syncing – Truly Next-Gen Absolutely mind-blowing how the voice lines are either missing or completely out of sync. Some characters look like they're playing charades instead of talking. Peak immersion.		
2. The Traveller – The Background Extra We Never Asked For At this point, just rename the game to Paimon Impact. The Traveller has all the charisma of a brick and less dialogue than an NPC. Honestly, some background characters are more engaging.		
3. Optimization in Natlan – A Performance Horror Show Natlan is so optimized, it feels like I'm playing a PowerPoint presentation. 60 FPS in Mondstadt? Sure. But step into Natlan and suddenly we're in slideshow territory, even with FSR on. Unity engine, by the way!		
4. Quality of Life – Who Needs It? No skip button in a dialogue-heavy game? Genius. Healing at teleport waypoints? Nah, too convenient. Logical quests? That's too mainstream.		

5.	Character Design	–	Straight Outta Budget Cuts	
New characters look like they were designed overnight with leftover assets. But hey, as long as they appeal to the gooners, mission accomplished, right?				
6.	Primogems	–	The Vanishing Currency	
With billions in revenue, you'd think we'd get more than a handful of Primogems per update. But nope, now we're lucky to scrape together enough for a pity pull. Must be hard times at HQ.				
7.	Weapon Banner	–	The Ultimate Scam	
Nothing beats spending your hard-earned currency only to lose the 50/50 and get a completely irrelevant weapon. Thanks for the excitement, I guess?				
8.	Exploration	–	Exclusivity at Its Finest	
Want to explore Natlan properly? Better pull those region-exclusive characters! Because the rest of your roster? Useless. Very player-friendly.				
If you're going to hire more British voice actors can you please let them use their accents for the characters they voice? It would actually be quite nice for variety, It din't do any harm to Xenoblade Chronicles!				
19:57 IM SORRY WHAT				
I liked announcement of Escoffier and Ifa, I also really liked the animations in the stream, even when I watched this stream, I realised: "I'll like this version!"				
Imagine the trailer being voiced in English ☐, we get to hear Albedo again!! On another note, the hosts did good today! I especially liked Varesa trying to make it lively haha				
Each new character's skills are very special.The storyline is also good				
NEUVILLETE IS STABBED HOW CAN A DRAGON BE STABBED LIKE BRO HE WAS ONE OF THE STRINGEST				
Clear audio!				
"Oh, you meant Cacucu and Ajaw! Wow, I feel like those two could argue forever!"				
Wait	until	Ajaw	meets	Itto 😂
PD: YES MIHOYO, write that down 😊				
Adorei Tower defender				
VENTI♥ he's so back omg				
peak is finally back, what a breath of fresh air				
It really is very good, the characters on the banners are very beautiful and I LOVED the design of the new character				

The preview video for version 5.6 shows us promising content. I'm already looking forward to the new quest with Albedo in Mondstadt. I'm also very curious about Escoffier, the new cryo character, and Ifa's abilities. The video alone is just too awesome. The chessboard shown in the video also has something exciting and mysterious about it. In any case, we'll be able to collect lots of primogems and much more. That's what I'm looking forward the most.		
My Jo.	UID:	715126462 Yai
Love you guys <333		
i wanna know when the transfer acc without losing data to another server is like released or if its in progress like far in progress or u need to do alot more progress for it bc i wanna change to american sserver without having to start over very hard in eu serv to find ppl who talk english in my case		
why is there spiral abyss ost here😭😭		
Can someone pls help me find the name of the song at 4:20 ??😭 or is it unreleased? Its just too beautiful		
Does anyone know if we'll finally get new commissions for Natlan because I'm tired of doing the same ones over and over again.		
ain't no way we getting clash of clans as an event.		
This is the best version! By far Hoyo did very well on this! Good job and about chronicle wish they did great on get it often. Maybe I suggest 1 chronicle wish every 3 version? But this is already very good, Hoyo		
The lore and the excitement is so good		
Two new characters and thare design and detailing are very beautiful and nice I will for tham		
Varesas so cute!!		
Begging You Like the Beggiest Beggar in Begdom! is back! woوو hooo welcome back Pauline!		
I really like the appearance of Escoffier! We need more cooks in Genshin Impact! I really like the news about the Inazuma Chronicles banner .UID:668596000		
Berkat A L E X I S 1 7 saya melesat, dari tukang angkot ke bos minibus. ❤️		
di a l e x i s 1 7 mendukung transformasi saya, dari tukang buah jadi bos supermarket. ❤️		
Ga sia sia maen diAlexis17 beneran gua wd❤️		
Update 5.6 is torture for f2p people		
CACUCU GONNA BE SAYING YARE YARE DAZE LETS GOOOO		
Simple banget, ★ A L E X I S 1 7 ★ bikin hidup lebih praktis.		
Salut, ★ A L E X I S 1 7 ★! kasih kemudahan tanpa ribet.		
Ngelihat review positif ★ A L E X I S 1 7 ★, tambah yakin deh.		
Rekomendasi teman ternyata terbukti, ★ A L E X I S 1 7 ★ memang top!		
Sudah banyak yang membuktikan, ★ A L E X I S 1 7 ★! memang berkelas.		
Langsung auto fans ★ A L E X I S 1 7 ★! begitu cobain layanannya.		

Saya suka, ★ A L E X I S 1 7 ★ tuh benar-benar ramah pengguna.
Kali pertama coba ★ A L E X I S 1 7 ★ langsung kagum, recommended!
Berkat A L E X I S 1 7 saya melesat, dari tukang angkot ke bos minibus. ♥
di a l e x i s 1 7 mendukung transformasi saya, dari tukang buah jadi bos supermarket. ♥
Ga sia sia maen di Alexis17 beneran gua wd ♥
gw runtkad wkwkwkw tapi tmn gw yg pada jp di ALEXIS17,
ternyata ramai yg main di ALEXIS17, wkwkwk mmg lebih gampang jp sih
Gak pernah kecewa main di ALEXIS17,, slt mereka selalu on fire!
Terimakasih ALEXIS17, memang super hoki keren terpercaya dan nyata
Sukses selalu terimakasih wd besarnya ALEXIS17,
terimakasih selalu upload bg, walaupun masih sibuk 🍷 ALEXIS17,
Mantap, user interface ★ A L E X I S 1 7 ★ juga friendly banget.
Add delete mark for artifacts please, so its easier to salvage..
4:04 VARKA??? GENSHIN COOKED WITH THIS ONE
6:01 another Britt? It honestly makes sense considering the strike and allat
7:18 "WHERE'S THE LAMB SAUCE!?" "WHAT ARE YOU!? YOU DONKEY!"
11:27 that is a very unique passive
15:09 OMG HE LOOKS SO SILLY
15:33 he's a gun user
15:52 natlan wanderer be like: (no srs this is literally js wanderers skill)
16:01 oh wait jk he heals too :o
16:19 so hes built to support an electro charged ororon team
16:31 other fun teams for him could include chasca as the main driver, ororon
sub dps, ifa healer/support, and furina? Maybe
16:46 now they wont be dying all the time :)
17:05 look at the speed.. His flying is way better than wanderers.. The powercreep is real
19:03 THEY TAUGHT HIM HOW TO SAY THE F WORD!!
20:03 "IM BEGGING YOU LIKE THE BEGGIEST BEGGAR IN ALL OF BEGDOM!!" ❤️🍷
22:54 why does this banner mashup feel familiar
23:22 wait THERE'S AN ANIMATION??
26:11 now listening to this.. I hope they dont pull a 4.2 cliffhanger trailer.. Like
that was way out of context
33:26 is it permanent?
39:25 makeup animation
Wait.. Kinich.. IFA?!?!?! IM FARMING PRIMOS RN, NO ONE WILL STOP ME FROM GETTING IFA!!
❤️ A L E X I S 1 7 ❤️ tuh emang bener-bener beda dari yang lain sih, RTPnya tertinggi di kelasnya
Mau tau cara menang konsisten di ❤️ A L E X I S 1 7 ❤️? Ikutin tips gue, dijamin auto maxwin

👉 A L E X I S 1 7 👉 tuh emang bener-bener beda dari yang lain sih, RTPnya gila-gilaan

Bro 🍷 A L E X I S 1 7 🍷 sekarang udah bisa DEPOSIT pake semua metode pembayaran tanpa ribet
🍷 A L E X I S 1 7 🍷 tuh emang bener-bener ngubah hidup gue, dari pengangguran jadi pengusaha
Bro 🍷 A L E X I S 1 7 🍷 lagi ngadain giveaway nih, hadiahnya liburan keliling dunia
Gue sih udah anggep 🍷 A L E X I S 1 7 🍷 kaya pabrik uang pribadi, butuh duit tinggal main
Gue udah ga bisa tidur nyenyak kalo belum main 🍷 A L E X I S 1 7 🍷 sehari, kaya ada yang hilang
🍷 A L E X I S 1 7 🍷 tuh emang bener-bener ngebantu banget pas gue lagi butuh dana super darurat
Gue udah ga bisa tidur nyenyak kalo belum main 🍷 A L E X I S 1 7 🍷 sehari, kaya ada yang hilang
Gue sih udah anggep 🍷 A L E X I S 1 7 🍷 kaya rumah sendiri aja, nyaman banget mainnya
🍷 A L E X I S 1 7 🍷 tuh emang paling ngerti kebutuhan membernya, sering kasih surprise bonus
Bro, 🍷 A L E X I S 1 7 🍷 tuh emang mantep banget, gue udah buktiin sendiri

Gue udah buktiin sendiri 🍷 A L E X I S 1 7 🍷 tuh bukan scam, udah WD ratusan juta lancar jaya
Gue sih udah anggep 🍷 A L E X I S 1 7 🍷 kaya tambang emas pribadi, butuh duit tinggal main
since ifa can heal dragons, can he heal neuvillette (PLS HEAL MY BBG,IFA, HE GOT STABBED 🥲)
🍷 A L E X I S 1 7 🍷 tuh emang paling ngerti kebutuhan membernya, sering kasih hadiah
Gue sih udah ga bisa move on dari 🍷 A L E X I S 1 7 🍷, terlalu GACOR soalnya, bikin nagih
Bro mau tau ga 🍷 A L E X I S 1 7 🍷 sekarang udah support semua bank dan e-wallet tanpa potongan
Gue sih udah anggep 🍷 A L E X I S 1 7 🍷 kaya rumah sendiri aja, betah banget atmosfernya
Gue udah ga bisa bayangin hidup tanpa 🍷 A L E X I S 1 7 🍷 sih, udah jadi sumber penghasilan utama
Gue sih udah jadi member VIP 🍷 A L E X I S 1 7 🍷, fasilitasnya super premium, banyak benefitnya
Eh bro, 🍷 A L E X I S 1 7 🍷 lagi ada event spesial nih, hadiahnya liburan ke luar negeri
🍷 A L E X I S 1 7 🍷 emang ga ada matinya, tiap hari makin rame dan makin banyak J3KP0T
Bro, 🍷 A L E X I S 1 7 🍷 tuh emang mantep banget, gue udah buktiin sendiri
Bro mau tau ga 🍷 A L E X I S 1 7 🍷 sekarang udah support semua e-wallet tanpa minimal DEPOSIT
Gue sih udah jadi member VIP 🍷 A L E X I S 1 7 🍷, fasilitasnya keren banget, banyak bonusnya
🍷 A L E X I S 1 7 🍷 bikin gue jadi sultan dalam sebulan, padahal modal cuma 100rb
🍷 A L E X I S 1 7 🍷 emang ga main-main soal keamanan data member, pake sistem anti-hack
Gue sih udah ga ragu lagi rekomendasiin 🍷 A L E X I S 1 7 🍷 ke semua orang, soalnya terbukti aman
🍷 A L E X I S 1 7 🍷 bikin gue bisa beli rumah cash dalam 3 bulan, padahal modal awal cuma 200rb
Bro mau tau ga 🍷 A L E X I S 1 7 🍷 sekarang udah support semua e-wallet dengan rate terbaik
Stabbed?! 🥲
Bro 🍷 A L E X I S 1 7 🍷 lagi ngadain giveaway nih, buruan ikutan sebelum kuotanya habis
Mau tau jam GACOR 🍷 A L E X I S 1 7 🍷 hari ini? DM gue aja, nanti gue kasih tau pola terbaru

Bro pada sibuk apa sih? 🍷 A L E X I S 1 7 🍷 lagi bagi-bagi bonus DEP○SIT super gede nih
🍷 A L E X I S 1 7 🍷 emang ga ada matinya, tiap hari makin rame aja, bukti kalo emang terbaik
🍷 A L E X I S 1 7 🍷 emang ga ada duanya, pelayanan VIP buat semua member 24 jam nonstop
🍷 A L E X I S 1 7 🍷 emang ga ada duanya, pelayanan super kilat, WD lancar selalu
🍷 A L E X I S 1 7 🍷 tuh emang bener-bener beda dari yang lain sih, RTPnya super tinggi
🍷 A L E X I S 1 7 🍷 emang paling top dah, ga pernah bikin kecewa dari jaman batu sampe sekarang
Gue udah coba main di jam-jam tertentu, 🍷 A L E X I S 1 7 🍷 emang paling GAC○R jam fajar
🍷 A L E X I S 1 7 🍷 emang ga ada duanya, pelayanan VIP buat semua member seumur hidup
Bro mau tau ga 🍷 A L E X I S 1 7 🍷 sekarang udah support semua e-wallet dengan proses kilat
Bro the sag aftra problem is getting so out of hand they have to post a Japanese voiced trailer on the English Channel
Bro 🍷 A L E X I S 1 7 🍷 sekarang udah bisa DEP○SIT pake semua metode pembayaran loh
What happened to the English language of these videos ? 🙄
Gue udah coba main di jam-jam tertentu, 🍷 A L E X I S 1 7 🍷 emang paling GAC○R jam dini hari
Gue udah coba main di jam-jam tertentu, 🍷 A L E X I S 1 7 🍷 emang paling GAC○R jam fajar
🍷 A L E X I S 1 7 🍷 tuh emang paling ngerti kebutuhan membernya, sering kasih bonus surprise
Gue sih udah anggep 🍷 A L E X I S 1 7 🍷 kaya tambang emas pribadi, butuh duit tinggal main
Gue sih udah jadi member VIP 🍷 A L E X I S 1 7 🍷, fasilitasnya super keren, banyak privilegenya
🍷 A L E X I S 1 7 🍷 tuh emang paling ngerti kebutuhan membernya, sering kasih bonus melimpah
Bro pada sibuk apa sih? 🍷 A L E X I S 1 7 🍷 lagi bagi-bagi bonus DEP○SIT jumbo nih
Bro mau tau ga 🍷 A L E X I S 1 7 🍷 sekarang udah support semua bank dan e-wallet tanpa potongan
Gue sih udah anggep 🍷 A L E X I S 1 7 🍷 kaya ATM pribadi aja, butuh duit tinggal spin bentar
Gue sih ga pernah nyesel gabung 🍷 A L E X I S 1 7 🍷 dari awal, malah nyesel kenapa ga dari lahir

👉 A L E X I S 1 7 👉 tuh emang bener-bener beda dari yang lain sih, RTPnya tinggi banget
👉 A L E X I S 1 7 👉 tuh emang jadi andalan gue kalo lagi butuh dana cepet, prosesnya secepat cahaya
👉 A L E X I S 1 7 👉 tuh emang bener-bener ngasih peluang ke semua orang buat jadi milyarder
Gue sih ga pernah nyesel gabung 👉 A L E X I S 1 7 👉 dari awal, malah nyesel kenapa ga dari lahir
Gue sih udah ga bisa move on dari 👉 A L E X I S 1 7 👉, terlalu GACOR soalnya, bikin kecanduan
Gue sih udah ga heran lagi kalo 👉 A L E X I S 1 7 👉 jadi trending terus di TikTok
👉 A L E X I S 1 7 👉 emang paling top dah, ga pernah bikin kecewa dari jaman batu sampe sekarang
Bro pada sibuk apa sih? 👉 A L E X I S 1 7 👉 lagi bagi-bagi bonus DEPOSIT 1000% nih, super limited
👉 A L E X I S 1 7 👉 bikin gue jadi sultan dalam sebulan, padahal modal cuma 100rb

I am so happy we are returning to Mondstadt and with Archon Quest!! It is so exciting, I can't wait!!
I absolutely love meeting characters from different nations! This is going to be so much fun!
My heart will break tho not getting to hear some my favorite VA's when their characters finally get some action again□
im not excited for this bro. neuvillette stabbed? dude. not good.
L patch
G TROP HÂTE !!!🌟🌟🌟

I miss the English VAs being apart of the trailers 🥹
Looks like Clash of Clan 😂😂🎉🎉
But Ventis VA actors suffer by SAG-AFTRA Sendig her threatening letter making the situation very difficult to navigate show result is Ventis VA actors respond indirectly saying she hadn't record for version 5.6
PEAKSTADT IS BACKKKK PRAISE THE LAAWDDDDD 🙏🙏🙏🙏🙏🙏💯💯💯💯💯💯
HOLD UP WHYS ALBEDO IN TRIAL?! ANND NEUVILETTE GOT STABBED? WHAT
Wheres mizuki on the chronicled wish hoyo?
man the new boss looks really cool and oml a inazuma chronicle banner!?? Rip primogems 🥹
WHAT DO YOU MEAN NEUVILLETTE WAS STABBED? HOYO WHAT DID YOU DO TO NEUVILLETTE.
i wish all the voice actors can come back now. :(((i miss all their voices. Genshin and Hoyoverse must patch this up faster.
First time I watch a genshin livestream definitely gunna start watching them more
So, will the Chronicled Wish last throughout 5.6, or just the second patch? Because I really want to try my luck with Ayaka BEFORE even thinking about pulling for Escoffier...
De verdad que no sé por qué exactamente, pero este programa me ha hecho muy feliz. Me he pasado cuarenta minutos sonriendo.
Recast paimon va bestie 😊
Dear @GensinImpact, i legit don't understand why you keep ignoring your actors' pleas. What's so hard in agreeing not to use the VAs' voice in ai related ministrations?
This is getting ridiculous
When are we getting one of the travelers hosting a special program on a regular basis once more? Currently, employment law has not yet incorporated specific regulations regarding ai, and as a result, there are no standardized legal frameworks governing labor rights in relation to ai as of now.
Like, it is entirely reasonable of VAs to take responsibility for safeguarding their own labor rights. No one can assure you won't take advantage of them in the future if we ever live to see the day when new voice lines can be generated based on existing recordings. Or that you won't use the said recordings for synthesizing a voice anew in your future projects.
Ngl it's super shady that y'all choose to stay silent on the matter and don't acknowledge your VAs' autonomy, their wish to reserve their own rights. Literally what is wrong with wanting your labour rights to be respected
Genshin, Mihoyo, please be reasonable. Idk about others but i do miss familiar voices both in game and on the livestreams

Lampiran 3. Komentar gameplay

Komentar
yo im crying bro, goated ifa story quest
was admitted in the hospital during this whole event and missed it completely. First natlan even I had to miss. So sad.
soo cute
see yall at the abyss 🙌🙌
wow, how touching this is, I WANT ANOTHER NATLAN QUEST.
It's so cute that I regret missing out the event
This little quest got me crying a little man 😭 the way they all worked together so he could passed peacefully was really heartwarming and bittersweet at the same time seeing them being reunited in the end. And also it's my sign to wife up Ifa my bbg 🥰❤️
I love natlan 😭
I suspect that some gameplay had missed me.
Baby sauri and are just so adorable
It's sad to see allies depart 😞, but the bird found her true master. And that's all that matters
This story was better than Varesa's quest
Fontaine: we have the cutest creatures under the water Natlan: HOLD OUR SAURUS!!
This event has me thinking about the fact that different culture from many tribes lived together and I start to wonder how did they manage to be at peace, now we know their conflict in the past, Natlan just made me think that every culture was so beautiful not just people and animal too. I really wish the society evolve this way in real life. But at the end of the day I still eat meat and farming saurians for materials.
Cute 🥰😭
This was one of the cutest events ever!
this quest made me cry so hard
Im so sad I missed this event
Where is the special program 🙄
I cried this is so cute 😭😭😭😭😭
0:45 Thanks Mama/Papa Qucusaur
Gosh, I keep repeatedly watching this whole video, I'll never get enough of this bitter sweet thing. Thanks genshin dev ☐
Have deleted this fine game till next 4 months
Please recast the EN VA.

This is why genshin impact best game alongside a emotion
IFAAAAA ♥♥♥♥♥
I don't speak English, not even close. In fact, I'm using a translator. But the fact is that this animation is quite well done. I can see it in great detail, and it's actually very good.
The truth is, I think my words are not enough to describe the work and the emotion. Without a doubt, art is not just a pretty painting, it's what it makes you feel. He conveyed with emotions what cannot be said with words.
Stupid lovey dovy crap from the nation of war
Please add a female character with a very long tail like Jane
How touching that is 😭
I fixed this saurians illness and it's so sad that the qucasaur had to go right after it healed:(
Extremely bad writing. Both this event, Nathlan part and Mizuki's "healthy" topics. Seems like the game trying hard to attract adherents of "moral health".
The indomitable human urge to care for all cute creatures
STOP! CHOPPING! ONIONS!
My heart- errr, I mean my eyes can't much more! 😭♥
Please add the mount in game
I got emotional damage right now 😞
pls the 7th nation
Please back raiden shogun 😞
May I ask Genshin if it's true that Capitano won't be playable in 6.X patch? I just want to ask cause I truly wish for Capitano to be playable and what to know more about him. Like his voice overs, etc. I simply fall for him when he was shown in 5.3 patch. Again you don't have to answer if you don't wish to...
Loved the event, I was crying when Antu finally crossed, the scene popped out at the 10th anniversary of the passing of my Chiqui
I'm gonna say it baby tepetlisaurus are the cutest baby saurians
Kindest yet saddest April Fool ever 😭😭
great, now Genshin's doing what Disney is supposed to do
I beg u remove the Storage thing when u download it 😭😭😭😭😭😭
Please genshin omg 😭☐
This event hits hard when you have, nope, I mean had a pet.... I once had a dog. She died from cancer. I hope she is now in heaven.... Damn... still crying even after a year...
Reminds me of Alan Becker's animations, no words are spoken but it still conveys emotion.
This scene touched me better than my uncle♥
similar to raiden teaser, only 2 sentences for the entire video that appear at the end but you already understand what it tells
Example of great story telling. Im glad they are finally improving that aspect
the purity of a child s innocence happiness

♥♥♥ame mucho está misión
Esta comenzando a llover 😞
i missed this event :(nauurrr
These little saurians are so cute I want to cuddle so much
From Saurian teaser to this
I love the Jurassic series vibes from this cutscene. All the saurians running in packs and vibing with other species was a fun and emotional moment.
It's been days and I still cried when I see this cutscene 😭😭
I quickly finished Natlan's Archon Quest to be able to fully appreciate this event, and it was worth it. I initially state that Natlan's story ranked as good but flawed but this really bumped it up to be pretty great seeing all the characters of Natlan working as a community to help out.
Natlan may be flawed but it is quite charming
Damn, too bad i miss this event cause my burn out.
It's a little wish Hoyon had for real life Africa, united, strong, upbeat
Best Natlan event so far! The story was very well made and emotional. (I might've enjoyed this more than the Natlan archon quest tbh)
This is the genshin I love 😭 I cried when I finished it and crying again.
♥♥♥
you make events last too short 😞😞
Please give us an Antu and Nampole avatar picture! What an amazing quest
damn im so sad i didnt get the time to do the event quest 😭
I cried atleast 3 times with this cutscene, man it was so adorable, all the saurians, everyone united to make Antu celebrate what was accomplished, I couldn't hold tears any longer when I saw Milray with Naiyan so happy holding hands, not even talking when Antu reunited with his human companion, what a beautiful event and cutscene this was
What Disney abandoned, Hoyon picked it back up for us.
0:14 very cute kachina
I come back to Genshin after a few weeks of being offline to do this event. There was 5 hours left. Glad I could experience this.
This made me tear up. Loved this event so much
Is it me or events starting 2025 are just top tier first Hu Tao ritual cut scene, Raiden finally giving goodbye to chiyo, Now this we can expect even better events down the line. Goodjob Genshin.
I wasn't able to finish the 3rd chapter of this event 😞 I'm glad they uploaded the cutscene and it was really touching. But I still feel a bit bad about not finishing the quest... I wish hoyon could make past events available as optional downloadable contents... 🙏
That little "bro" cucusaur and his "bro" owner are super cringe. Would have stopped playing if they were in the game more.
The Story, The Expressions, The music is just so perfect, cried a river in this story

I'M NOT CRYING. YOU ARE 😭😭😭
I wasn't prepared for that cutscene 😭😭😭
MY POOR HEART 😭
I finally completed this event and wow! Very touching story! ❤️
BABY SAURIAN IN SERENITEA POT PLEASE 💜👉💚💛💙👉
Please we want language Arabic 😞
❤️
Can you pls make it in english pls 😞
What a beautiful and emotional event. Had me invested from the start. Antu is the cutest saurian, wish I could keep him in my teapot. Well done Genshin team.
The fact that they make saurian so important, not just an npc, obstacle, material. They have their own characteristic. Good job on the team to make Saurian alive.
an emotional event and a profoundly moving story ❤️👉
All Natlan cast gathered..❤️
Not a single word spoken but my tears just kept fallin' my dudes 😞
Not a single word spoken but my tears just kept fallin' my dudes 😞
In one in-game cutscene, Nampole taps his chest a few times (indicating a chest pain when someone feels betrayed and is heartbroken) when he finds out his brother didn't hold the trial well, but instead contributed to the whole thing plunging into utter chaos and didn't even save some crystals for Antu. Combine that and this cutscene, I wonder whether we weep for their happiness in the end, or for the terrible things they've been through
Damn.. it's not time for sheznaya yet?
Lmao how many of these comments are bots? 14 years ago accounts only commenting on genshin trailers lol
I CRIED A LOT GENSHIN YOU DID A GOOD JOB
I played this event twice and cried at this cutscene BOTH times. Even I'm impressed.
Pls make this a ifas story quest
1:46 looks like my cat saying goodbye...
Who is cutting onion T^T?!
Genshin i got 7000rs scam pls help me im so sad 😞😞 pls help any body can help me
Genshin i got 7000rs scam pls help me im so sad 😞😞 pls help any body can help me
Genshin i got 7000rs scam pls help me im so sad 😞😞 pls help any body can help me
Genshin i got 7000rs scam pls help me im so sad 😞😞 pls help any body can help me
Is there anyone who want to use my Genshin account? I am going to stop playing because my interest is shifting towards Star Rail. I don't want it to be

left covered in dust and wasted because I have spent money on it. If there's anyone who wants to use it, please reply.
New abyss 6 floors 3 teams all characters start with 0 energy & all enemies are world bosses say it isn't so hoyo 🧑
Shout out to the Wayob for personally informing the dude that she found his saurian companion and waiting for it to finish have fun before returning
I was expecting this event to be all cute and fluffy since it involves the baby saurians. I didn't expect to cry like a baby in the end, lol.
Adorable
I love the Art and animation in Genshin impact!
This event had me ugly crying 😭
I feel like this game has sucked for a while now but after rewatching this cutscene (from playing it) and been a day 1 player since 2020 I can't help but appreciate the journey we've been carried away on. Thank you Hoyoverse for such a magical and everlasting adventure. I'll never experience a game with so many characters and world building ever in my lifetime ♥
This is so incredibly touching. Thank you Genshin, you've created something beautiful that will forever remain in my heart ♥
WE KNOW GENSHIN IMPACT for removing Morikubo showtaro ifa's Japanese voice actor due to his support for East Turkestan
Una de las mejores cinemáticas de evento y de mis favoritas 🥰♥ Ojalá sigan haciendo cinemáticas tan buenas que nos emocionen tanto y nos den en el ♥
oigan, despues del evento ingame del torneo para obtener la piedra y paralelamente los animalitos consiguiendo frutas para sacar protos de esos dos eventos, no se puede continuar la historia que no? ya termina y la conclusion seria este video?
Genshin Impact should make a moba game called HoYoverse 5vs5 so that it can expand the Genshin Impact characters universe
I love the saurians so much!! I almost cried. They're so cute <33
This! This is why I play Genshin Impact!
Hello, I wanted to ask when there will be an update that allows older cell phones like my ZTE Blade A34 to play Genshin Impact. My device is not compatible and it is one of my favorite games. Please, an update that solves the problem of many like mine and be able to play this beautiful game.♥😭
This is the first time I'm bawling soo hard 😭😭😭😭😭 When the little hero Antu flew around to cast the spell, then soo was happy celebrating with all the saurians, and then come back home to it's human in night kingdommmm 😭😭😭 I CAN'TTT 😭♥♥♥♥♥
ngl but that little tepetlisaur being sad parting ways with his little cucusaur friend literally got some tears out of me
I said it many times before and I say it again, the sound design and storytelling and high quality cutscenes will never fail to tear me up. Great job to everyone! Natlan is home!
😭😭

CRYING..
When is Alhaitham having a rerun because he held a strong part of me and my team and ever since I lost my old account I've been trying so Genshin when is Alhaitham having a rerun
i never farm saurians claws, even before i used to purchase them,, and thus citlali is still at level 80. i tried twice to farm but was unable .. and then decided to not farm it, and after seeing this, i wont be killing any enemies that include saurians. i mean yes it is a game but that action is way too heartwrenching. hoyo should stop saurian claws farming.
this was a really emotionally wrecking story. the ancestor and his baby qucusauras antu, they were not the culprit yet everyone treated them as one and tortured him in front of his sick dying qucusauras. and that scene where the one person flaunts the crystal in front of him while the ancestor was sad and hopeless just sitting alongside the sick qucusauras was too painful to watch, and the inability of the antu to comprehend whats actually going(the greed) and falsly holding the crystal as a cuprit was also saddening, this is exactly what happens with real world animals too, they most of the time are unable to comprehend why the torture against them is done by humans. i am still overwhelmed by this storyline. and at last lines of his written notes he said he went to hilltop with his antu then burried his dead friend and kept on doing his effort to let the future be free from this same mistake was also saddening. p.s. and i am gonna really miss the saurians after natlan arc will finish. i'll miss the traveller's saurian companion (little tepetlisauras) the most, and i have heard that (spoiler) we have to bid farewell to his in his quest which i havent completed yet.
Best cutscene ever!❤️
I love Ifa and I'm so sad for Antu aaahhhh best quest ever
i cried
Como me duele ver el final 😞
nice
these were supposed to be the previous regions. Natlan is simply gorgeous
i cried.. i love that animation! <33
Tears streaming down cause it reminds me of my pets... crazy right?
Anybody wanna buy my Genshin Impact Account? I haven't used my account in years ! And I dont want it 😞
me who always keep these cringe things in background while playing another game:
Guys i just want to share idea,if genshin add new elements.For now in coments i name then dark and light.I think so new elements still can work with old one's.Dark should work with only one element,but it get's buff,and light can work with multiple elements but get multile damage<many numbers around,for every element.
When you think about it, it's not that dramatic, i mean yeah the cutscene is both adorable and sad, but eventually, they'll meet again in the "fief nocturne" (sorry i don't remember the name in English

Fue un evento hermoso, llote por Antu desde la mitad del evento pero fue muy hermoso el final ♥
0:48 LOOK AT HIM 😞
I cried I crode
wow ok... the storytelling in this story was so unpredictably amazing, i didn't see it coming , WOW!
I was genuinely holding back my tears from all the cuteness but then Antu and Nampole reuniting is what caused the tears to flow 😭
Oh Natlan, no one can ever make me hate you. I cried so much ☐
This event qest is the one that made me crack i usuali dont get soo emotional but this one is so 😞😞😞
bro why did this have me crying right in front of my dad 😭
I CRIED SO HARD
This and Freminet/Thelxie's event destroyed me
I want the sound rrack for this.
Yay
made me cry all over again
invisible ninjas cutting onions momment for me :((((So bittersweet <3333333
Recast Paimon's English VA please
So cute i might die
ppls genshin add a tradding artifact i just got a good mualanii is on my alt
just like little cute animals♥♥
0:48 The most beautiful and cute little thing I've seen this year! ♥
Dude... this game is seriously amazing. One of the best games ever made!
Mihoyo please put the option to be able to exchange Lumine for Aether because I really want Aether and I chose Lumine please put this option to exchange traveler Mihoyo if I'm wrong about things sorry is that I'm using Google Translate to talk to You 😞😭
Begging y'all to add this track as a spincrystal. I know it's a remix of a couple motifs from Natlan, but I NEED this in my teapot as a standalone track. Will I be sobbing while plucking flowers from my garden? Sure. But I'm willing to take that risk.
This event really pulled together Natlan. The argument was pure gold, and it really makes you understand what a family they all are. Mauvika is a great leader that does her best to keep the peace in Natlan. I love how Natlan keeps all the characters together, even when they come from different tribes. They all contribute to Natlan over all
No !!! Made me cry so much !!! 😞😞😞😞
The event story especially the cutscene, is the most Disney like thing I've ever witnessed for a very long time.

Meanwhile, the real Disney is making things that... not feel like Disney anymore, what a pity...
Estado: Líquido 🥲
Hace tiempo una mision no me hacia llorar, el final fue demaciado bello qwq qwq qwq qwq qwq
Idk how many times i said "AWWWWW" in this one cutscene
1:39 now it is time to cry
I love the Saurians so much 🥲❤️
Such a dumb event
This quests should be permanent it is a crime to not keep that in the game ;a;
They build up the whole thing with Antu and Nampole and this cutscene finally made me cry, the music and just the little saurians enjoying their times together before Antu has to reunite with Nampole- feeling happy but sad at the same time
Genuinely enjoyed this quest sm I even teard up ☐
Cute and bestt
I loved Ifa's story quest. I mean, the event. I wish these types of events were permanent. Really giving me Freminet event vibes
Is it genshin if I don't cry my eyes out ? 🥲🍌❤️
EPICC. YOU KNOW WHAT, DON'T STOP MAKING GREAT STORY.
"magic born from guilt" vs "magic born from kindness" amazing event
This event hit me hard thank you hoyoverse
I CRIED SO MUCH its so sad the innocence the betrayal and the love... best quest!! also the medicine born out of guilt oh my heart...
Add this one to the list of event quests that shouldn't be event quests because how dare Hoyoverse rob people from this experience just because they aren't playing at this exact time.
这画质怎这么胡 🥲
Mann I dont want to leave my lil buddy 🥲🥲🥲
i have teared up in events and cienamtics from Genshin Impact but this one made me cry a lot .
I'M SO SAD
Dude I just finished this event and oh my God. It was beautiful, poetic, and emotional. People's greediness could be their own enemy. Another memorable event that will probably go down with all of the other memorable events. From the mini-games to the trail it was all so good, and don't you mention about the story. Antu die because people were greedy about power and unfortunately, nampole met the same demise. This right here reminds me of thelxie event.
THIS IS SO BITTERSWEET HUHUUHUUH
Best event quest loved it
This cutscene alone makes me love the Saurians even more! 🥲
oh Natlan, not a single word that can describe how much I love you as a region in this game

this absolutely BROKE me ☐
I wish these one was a farewell quest with traveler saurian instead npc story 😞
the detail about how iktomisaur open the night kingdom in the last scene is great 😭
Me at the beginning of the cutscene: 😞😭
Me at the end: ☐😭☐
I cried so much than I ever had
love it
saying good bye to our saurian also needed a cutscene T-T
OMG THATS SO COOL
The best event so far.♥ I cried a lot at the end , Ifa and cacucu really made me love them so much even just al little screen time.♥☐
I heard some ppl hating Natlan not showing a real country of war, but please if you are eager for violent war and fight but not peace who would play Genshin😂
Ini mode co op aku kok gak kebuka, trus katanya harus nyelesein misi padahal udah aku selesein loh misinya masih nggak ke bukaa😞
They seriously need to put this event as the gold standard for limited time events. This is what I craved more of from the Natlan cast, and the DELIVERED! I adore more than anything, seeing a nation's cast behave like family and I'm so, SO glad they did just that. Xilonen getting to air out her grievances with Mavuika, Mualani+Kinich+Kachina sibling trio, hilarious two-man comedy that is Ifa and Cacucu, Ororon and Citlali...I could keep going. I will never be able to understand why people are so quick to discard a story that uses the power of friendship, to battle a situation so dreadfully dire. Hope is infinitely as valid as despair and seeing that reflected in the stories we consume is no crime. Not to mention, the event itself was ridiculously fun. Kudos, genshin, for such a WONDERFUL patch!
Jadi terharu aku nontonnya 😊 barusan selesaikan quest eventnya, ini terbaik
This is sooooo cute 😊😍
I'm lumine main but in the event lobby it's aether 😞 we need apology primogems for this
I haven't even played the quest yet or know anything about it but I'm bawling my eyes out anyway
Ayaka rerun please!!
Finally an emotional cut scene for natlan.. Enough to make a grown man cry♥
No words needed. Absolute cinema
every single day im saving money to buy new phone to play this game, i really miss playing genshin since the day my phone can no longer handle the game(its very sad that i lost many event☐☐☐)
definitely one of the 🏆🏆 of all time
THIS WAS THE BEST EVENT EVER, I SWEAR!
I'm not crying...
You're crying..

One of the most wholesome event♥♥ it left me in tears♥♥♥♥
Honestly I was already crying in act 2 of this event. I felt Antu's pain, it's like a child getting sick and seeing his parents start bickering in front of him when struggling to cure him. A child would definitely blame themselves for getting sick and being a burden to their parents or guardians. So they role played for him to be the hero in a situation that gave him so much guilt. Idk if this would be recommended by a therapist but it works for me 😊
Great event
You can see the visible joy in his eyes when introducing Antu to the other saurians, its so cute and wholesome
😭😭
This was one of the most beautiful event ive played...
Please buff Anemo traveler I'm begging you 😭😭
something i love about Natlan, is that they all need just one word and the whole nation will join together to help one human or one saurian, you can see it clearly in this quest and in Varesa's quest. Natlan feels like a community and i absolutely love it.
Bộ phim này đã lấy đi bao nhiêu giọt nước mắt rồi 😭😭
so much focus on the lil saurians in Natlan yet its crazy bc ive killed hundreds for stupid character ascensions ToT
BR
Eu comecei essa missão agora. Amei o vídeo ♥
My dog died today after 15 years of his long life. He's been there with me through thick and thin. He saw me happy, sad, angry, drunk, scared, bored and enthusiastic. I didn't pay much attention to him since he's an outside dog. When he became paralyzed I started regretting that I didn't pay much attention to him and didn't care enough about him. He was begging for me yesterday to stay by his side as he won't stop barking when no one's with him. It was his last moments. I went to work last night. When I got home, he's gone. I buried him today. I didn't cry during those moments. But when I saw this cutscene again, I felt the guilt and regret. I'm sorry doggy. You're free now. If you're gonna be reborn, may you be reborn in a better world with a more caring and loving people.
Ifa's ancestor named the medicine 'magic born from guilt' Now Ifa finally named it the 'magic born from kindness' This just shows how far all of Natlan have come, from fighting other tribes to working together♥
Ngl, but this event felt like a farewell to Natlan!
the last time I cried in a genshin quest was Tighnari's story quest with Karkata 😭 i love this sm I had to play it since it's a limited time quest and I did not regret it
This was such a beautiful event quest, one of the best!! I'm glad Antu finally is at peace, I cried a lot 😭
I cried so hard while watching this scene

Ok this was super sweet but why was Varesa and Mualani holding around each other like that tho
😞 Moments like this remind me why i love playing Genshin Impact
This was one of the most beautiful event quests ;-;
I CRIED 😭😭😭😭
I sobbed like a baby, this event and the hutao one
WHO'S CUTTING ONIONS FOR CRYING OUT LOUD
I cried, again, friggin Genshin dude.
This quest really touched on my emotions. Will definitely go back watching this cutscene in the future
maldita sea, Genshin haciendome llorar otra vez 😞♥
PLEASE LET AETHER AND LUMINE MEET PLEASE 😞😭
I cried
After yoimiya quest 2 this is the better emotional animation ♥
oh no. more sadness.
Genshin is evil like how could u make us love these lil guys even more than we do and expect us to want to fight them for ascension materials.....😭
I love that non-Saurian characters' voices are muted and in the background with Saurian voices at the forefront. This is the story seen through the Saurians' eyes. They can't actually understand what their human and human-adjacent characters are saying. The inter-species communication is mostly through the tone and body language. It makes the cutscene much more whimsical and immersive. Praises to all the people who worked on this unforgettable cutscene!
Genshin sure knows how to put onion near my eyes as always 😭
я так плакала..😭
I have no words ☐☐
Another beautiful event, thanks.
yeah, i just finished the wuest in AR 22
I really like the title which contrast with the “ medical born out of guilt “ , 5.5 writing is so good 😭😭
Game name pls
Can we just appreciate that the entire nation from people to Saurian did so much effort for a lil war veteran fella.
Truly amazes me how many characters and saurians are involved in this cutscene. Hoyon has really amped the cutscenes since Sumeru, and now look at where we are 😞 RIP Antu and Nampole
Wow.. i did not know genshin have pet now.. i wonder how many GB already this game.. does it reach 128GB?
Natlan - Nation of Love and War 😞👊
😞😞
Beautiful cutscene
😭😭😭😭😭😭😭😭😭😭😭
asta me dieron ganas de llorar 😞

I'm crying 🥹 baby Antu ❤️😭
Natlan is not beating the MLP allegations (and I love it)
Fooooooooo demais 😊
I have actually recently lost my grandfather and one of my dear pets last week, so this quest here just really hit me super hard. I'm glad that Antu was finally able to reunite with Nampole back in the Night Kingdom and we were able to help Milray recover.
im crying
Glad I can go online here to find it. I don't know why, but for some reason, I have experienced that in every in-game cutscene, after like 1.5-2 minutes, it begins to lag, stutter, visual freezes up, audio disappearing for like 2 seconds, audio starting up again with no visuals and then just skip to the end of cinematic. I don't think it is my internet connection, or at least it shouldn't be. Is it just a video file, so it shouldn't be affected by my computers specifications either. Just some feedback, and happy you share it on this channel as well, so I can rewatch it in its entire context, same with other cinematic cutscenes, need an arcieve if this trend continues.
I cried, Antu's story was so tragic man
this cutscene and especially the end where antu waves goodbye and reunites with his best friend again in a hug made me cry ☐❤️ oh antu the world was cruel to you and nampole but I'm glad they're together again
Foi emocionante 🥹 incrível
Ngl I cried so much 🥹😭😭
<3
🥹❤️🥹❤️🥹❤️🥹❤️🥹❤️🥹❤️
Hoyo dont dare put those cute saurians in the abyss again after releasing such a amazing cinematic !
Lloré 🥹🥹 la historia de este evento fué muy linda pero también un poco triste
Just finished the quest It was so great 😭🌟 Thank you genshin
My heart got glide of the blazing suns too cute
This was just heart warming ❤️
i cry dammit !!!
This is cool an all, but you guys should Recast Paimons EN VA.
Reminder: The ones who animated this are the same that force us to farm them in the most brutal way
All of this was just genuinely so heartwarming. This is how i think Natlan should have felt since the start!
1:00 - 1:10 that part of soundtrack makes me crying so hard because its got same vibe like test drive - httyd soundtrack
i cried 🥹

Bro, no way, Bro... I almost didn't cry at Natlan story quest, just a few tears, but this... I was crying so hard, its so emotional, so warm. And this looks like a Farewell to Natlan.. All characters, all saurians. I will miss them, really 🥹
Hey everyone, I just started playing genshin today. It's really fun and I'd like to know if you guys have any tips? Thanks!
I tried to take some pictures from this scene but was too slow. I hope we can have a version of it with Lumine too. It was such a heartfelt cut-scene.
😄😄😄😄😄😄
This is my favorite cute scène in Genshin impact❤️❤️❤️!
It's so beautiful in every way, a masterclass in story telling, so touching, everything is just perfect! ❤️❤️❤️
guys am I cooked?
I was playing Genshin impact normally doing the archon questions, and I am a new player AR 29, well, after I finished the Geo one, after it Buur right? Hell no! They told me to go to fontaine and I got the cutscene of when the traveler is going to leave and get a pic with Furina and the others 🤡
I was shock and sad, what can I do so I can do these two archon questions?
So cute ❤️
i literally cried, it was so good esp when the last events are so sucked
1:35 It's really moments like this that remind me why Genshin is so good. They learned the Disney formula how to tug at your heart strings **cries** The bittersweetness of life and friendships
I really love how once in a while Genshin throws us some tearjerker of a cutscene
0:52 mihoyo please... PLEASE STOP MAKING US HAVE CUTE AGGRESSION AND THEN DEPRESSED
Es Preciosa esta cinemática 🥹❤️
What in the power of friendship ahh type title is this 🥹!!
Such a beautiful cutscene, it felt like the perfect farewell to Natlan.
This is the best event in Natlan patch so far, one of the best event ever ☐
I love this game so much
What I love about Natlan is this feeling of community. Everybody on the region know eachother, has ties, and are ready to jump the "lets do it togheter!" Only Sumeru and Mondstad has something alike. It is good when all the cast of the region participates of an event.
Te amo tanto Genshin ❤️❤️❤️
I'm just gonna leave a comment but I'm mad at this game for making me cry again Once in Act 2, twice in Act 3. Third time was cuz I kinda just wanted to rewatch the cutscene. I ain't watching this video tho. Not about to add a fourth ☐☐☐☐☐☐
The Best thing that Natlan Gave to us was The saurians

i think we can all agree that the little saurians are the best creatures to ever exist in genshin impact
Lovely ❤️❤️❤️
thank you mihoyo for reminding me again why i love this game..
I love such scenes SO MUCH! These moments, when so many beautiful creatures interact with each other while showing that their species are so different, but they are still together. This makes me cry with delight every time.☐❤️❤️❤️❤️
I was really touched by this story, it was very moving..., we will always remember your story and struggles, friend (a little Saurian from the past "Antu")
It was incredibly touching!❤️
Ifa, the latest Disney princess in Genshin! And this cutscene had me smiling so brightly!
HSR EVENTS COULD NEVER 🧡💧💧💧
Someone tell me how long this quest is please, i haven't done it yet
This is such a cute way to "close off" Natlan. I kinda hope we don't return for any big or main things back here until after 6.0
I hope we gets lumine and aether English voice actors back soon 🧡🧡🧡
I almost cried when Antu finally reunited with his Friend Nampole in the leyelines.
I never cried from playing this game but this one made me tear up
my babies are alright I'm so happy 😭😭
They healed our heart and ripped it open again 😭 , i love how no one said a word but there was so much emotion in this scene
lion king moment i'll be damned 😭
Past: Dragons killing humans Present: Humans helping dragons
When an entire nation loves you ❤️
Aww 😊 So cuteee
I cried in this scene I know how it feels to be reunited with long friend and saying goodbye to him. The way he wave his feather teared me up.
Please add Persian language to the game.
I have no idea who these characters are...but this scene made me tear up at the end there.
This entire scene was so fun and emotional enough to make me cry and not 1 word was said
THIS IS THE BEST EVENTTTTT I LOVE IT SO MUCHHHHHH
Omg it looks so sad 😭
This event was awesome, this is why Genshin is Genshin.
That's what a true emotion is called. No words yet still touched the bottom of the heart ❤️
Why am I crying 😭

I LOVE THIS ONE. It's so damn cute. I was crying during event but I'm happy with how it ended. It's good Antu find he's peace and Milray was cured.
This Scene.... It's Beautifully Heartwarming and Sad... I'm feeling many Emotions while watching this scene. The Saurians, Moments, Scenery, and the Ending...
Wow wtf I actually cried here 1:46
STOP THIS IS SO CUTE!?!?!!
Ifa is not released yet, but already has a story quest... I wish it wasn't temporary...
When Antu waved, i waved too with tears in my eyes, god this quest made me cry and i never cry.
Hoyo just loves shamelessly posting spoilers nowadays lol 😂
Im not crying, you are
The music is so beautiful
the way i almost cried.. milray's adorable excited face reminded me of toothless for a second aaah i love natlan
Its a rare sight indeed about all natlan playable characters and all saurians in one spot of cutscene 😊
So I wasn't the only one who found this cutscene amazing for just a simple side event
this scene was emotional but made me laugh sooo hard. Ajaw literally fainting just cos everyone suddenly started being nice... and when Xilonen snapped?! 🤔🤔🤔
Nation of War
Siempre logran ponerme sentimental ❤️😭❤️😊
1:46 man and i thought the GOAT retirement from the Harbingers was sad but this is next level of sad ❤️❤️❤️❤️
Don't know y m i crying
This is so freakin cute😭😭😭😭
Everyone uniting to save one Little Saurian is giving me vibes of Little Simba getting worshiped by the animals in the Lion King lol...
I love this event story😊
I really like this.. 😊
This scene is beautiful, I loved the event ☐
this made me cry 😭 peak event 10/10❤️
0:16 MUALANI AND VARESA ❤️ THEY'RE SO CUTE OMG
I don't see any dislike on this video. So sorry but I have say this but dislike.
I'm glad that hoyoverse Always use Aether as the main character
So cute. Felt like a Disney movie scene.
this make me burst into tears 😭 how can the saurians be so cute and so genuine ! the characters as well😭😭 good event !
crying to genshin cutscenes is my hobby
0:23 this little dance killed me with cuteness overload

This was truly incredible and touching and it makes me even more thrilled to have the honor of voicing Ifa ☐ 😊
Friendship is magic
People say that Natlan is supposed to be nation of war and we didn't get that. That's not true. Not only we had a full scale war against Abyss, which was quite brutal and devastating and they literally had to live through centuries fighting these abyssal creatures, but we also've seen past. Not only in this event, when different tribes fought each other, but for example we've seen howKongamato has been corrupted or how many different heroes had to die to delay inevitable. Mavuika had to give up on her family to save the nation. Plenty of saurians and Narlan people died. Not to mention, there were moments, where saurians were abused in experiments. And children too. The whole Nechca/Nepecha story and Chasca's sister for example. And we should be glad that not everything is covered in blood, instead of complaining that "it's not nation of war".
This cut scene slightly reminds me of how to train your dragon. Overall this is absolute cinema 🔥🔥
😭❤️😭❤️😭❤️😭❤️
I love this cut scene
No voiceline yet so beautiful and full of emotions Play and enjoy little moments like these ❤️
So lovely. Hope the World can see this and hope for a better future filled with love, happiness and bright sunny / starry moments!
Glad bro found his redemption at long last
All I want is gaming I did 70 pulls still not single gaming is he curse not to be in my account...Ayoo...fix it hoyo.i don't have dps right now in AR 47
😭😭😭😭😭
I am to old for dis Disney kinda of vibe i let the kids have it moment
😂😂😂😂
Welcome to Pokemon 2
I haven't finished this quest and seeing this now made me tear up of joy!! I'm so Happy of this ending and how lovely the saurian were playing with him until reaching his patron 😊
One of the best cutscenes in my opinion
I just saw this cutscene in the game! 😂❤️
Seeing the Natlan cast all together finally was so great to see! Definitely one of my favorite regions, if not my favorite 😊
They made me cry a lot. 😭😭
bro i cant get enough of these cute saurians 😭😭
😭
Justice for Antu. 😭😭😭😭😭😭
best cutscene, sadly our companion saurian didn't get cutscene like this

I cried my eyeballs out during this quest... So beautiful and meaningful, as someone who loves animals and wanted to become a vet I can tell that HoYo did amazing job ❤️❤️🩸 Also cannot wait to pull for C6 Ifa 💜
I did not just got tears by this cutscene u are..
Hermoso, se lucieron 😭❤️
A cutscene without any line but it already made me cry
This was the cutest cutscene of all ❤️
This event was good. I wish Genshin Impact could implement it as a permanent world quest, since it has Ifa's entire backstory/intro, worldbuilding and good character moments
I love how this entire event wasn't Mute Impact in English voice
this cutscene alone made me cry ;-;
😭😭😭
Yeah my heart's melted and I've ascended. □□□□
so emotional
I know hoyo messes up alot but whenever i see people who played genshin call it a bad game and cash grab i see cutscenes like that crafted beautifully with emotion and great soundtracks and i dont want to believe that everyone at hoyoverse is money hungry that there are actual developers who love to work on this game and want to convey that
Sending some love for Antu! You'll be missed. □□□❤️❤️❤️
this event quest legit brought me tears 😭
No way i have killex these cuties in spiral abyss.....
Natlan is the 2nd nation that has all playable characters knowing and treating each other as friends.. after Sumeru.
Haters said Genshin is for kids... truth is Genshin is for those who have a heart, who can feel, who can love. Definitely not for those who born and die of hatred.
0:49, this smile. I will protect this smile. I will fight you for this smile. You will not hurt this smile.
Knew what was coming, but the ending still got me. Rest in peace, Antu.
Tepetlisuar welps are extremely Adorable. I'm crying 😭
No one made me hate Natlan❤️
Sad 😭
OH GAI DAMMIT, THAT GOT ME! 😭
So glad I wasn't the only one who cried at this. ❤️😭❤️😭❤️
So that why Hoyo don't change way are not blaming Hoyo but the voice va that make sense(no it doesn't make sense)
I love natlan
the best event ever, I almost cry for that final
Itss sooo emotional... I literally cried... 😭😭❤️❤️
This looks like a Genshin crossover with Palworld
😭😭😭😭😭
That's a sad thing to release.

Nooooooooo 😞
Just wanted to say: CUTENESS OVERLOAD.
Genshin is like a dreamy land for lonely people like me <3 beautiful lands, interesting creatures and great adventure stories
Saurians are literally the best part of Natlan
i really wish he was a 5 star ☐
Its all fun and games until we need to upgrade our characters and weapons
I REALLY LOVE GENSHIN CAUSE OF THIS 🥹❤️🥹❤️ I DONT NEED TRY HARD ALL I WANT IS WARM STORY AND REFRESH MY DAILY ❤️❤️
1:44 this is where I started to.... 😞
theyve been cooking with events in natlan lately i love this so much 🥹🥹
Wheres the war?
Replace every english VA who's too lazy to work!
I got emotional damage this scene man
This event feels like a pre goodbye to Natlan because literally every single Natlan character who will appear the 5.X updates is in the cutscene along with all the Saurians.
People complain about natlan being too colourful and positive, well Nod krai and snezhnaya is gonna tear everything apart
You don't have to make me cry with this cutscene really hoyo i have enough with AQ please 🥹❤️!! HOYO PETITON TO MAKE GIANT SAURIAN PLUSHIES! I PROMISE I WILL BUY IT ❤️❤️
close enough, welcome back jurassic park
Ifa is such a handaome guy. Loved seeing all the characters, the saurians, and the reunion.
Last scene almost make me cry (his owner come to take him)
They all grieved for one sauren.
They all grieved for one sauren.
People that still not completing this event will never know how sad this is
😞
We got our own jurassic world ☐☐ 🥰
It was whole family. 😊😊
No matter what PPL says on x ... Natlan is peak ...all other regions were not that good in terms of exploration, side quests and world quests .
Rest in peace, Antu and Nampole. Ifa and Milray will remember you forever in their hearts
Ayyy 🥹, no he terminado la misión o el evento, me dañaron el final, se me apretó el corazon 🥹, parece uno de esos buenos finales q inevitablemente son tristes.
this is the first genshin event that I have cried over ☐☐ what a bittersweet goodbye
A cute moment. And sadly far too few these days.

Algún día nos volveremos a encontrar con aquellos que se fueron 🙄🐱 Aún no acabo la misión pero si me dió mucha cólera que la ambición pudiera más que la vida de alguien. La misma porquería que hay actualmente en el gobierno de mi país.
Aaaah my heart ☐ it's so cute♥
Maybe not every story hits the same for everyone, but I genuinely don't understand how people can say Genshin's writing is garbage. For a 'filler' patch event story, this actually hit pretty hard and was a compelling story to watch unfold. Amazing work Hoyo, keep it up.
Me encanto 😭😭😭💖
Haven't seen or played it yet, but I am so sick of the cutesy "nation of war". I hope it's mainly so the next regions look extra hard by contrast.
"Humanity has tried to put nature in order instead of understanding it. But we're just discovering what was here before us. If we're going to survive, we have to trust each other, depend on each other. We have to coexist. Dinosaurs and humans—together."
cute pokemon... now... can we PLEASE leave natlan behind already and treat it like a fever dream that never happened 🤪
Yeah. For people Complaining Natlan is too happy. Enjoy it because I think this is the Calm before the storm.
One of the time I love nakama power as a plot point. The fact that the entire Natlan just be okay to spend their time to help one single baby Saurian is very touching.
That is the cutest moment I've ever seen in my life, it almost makes me feel cry of happiness and joy 😊❤️💖💖😊
I like that the humans doesn't have lines
I swear.... I'm not crying.. : 'C
I love this event!! The story is really great and adds more layers to Natlan. The interactions between Natlan characters are funny. Most importantly, the challenges are pretty easy, even for new players. (Because of the trial character and buff)
genshin impact; friendship is magic
I'm getting emotional
0:19 I love ifa's disney princess moment
Best event quest this year
Man, I love Natlan.
Por qué no pareció nuestro dino :(
this made me tear up when i was playing and this again made me tear up right now...
This is no Genshin Impact this is The land before time
This is beautiful.. ☐☐☐
This actually made me cry. I'm glad Antu got his own happy ending, too! 😭~♥

I was not aware of the feelings at the end of the mission. It is enough to say that they make me cry and this is why the game is fantastic, it just touch something if you love the characters and story
I love Peaklan
This is truly a "beast journey" in Natlan, it's so emotional 🥹
the emotional rollercoaster i just experienced when this cutscene showed up was just crazy. i love it
Dont' t forget that chubby little thing got sick because he over doing it in the war. and only showing it now because he can no longer hide it 🥹
cute cute cute cute cute 😊 genshin cutie ♡♡
How does this affect my IT clears
I cried 🥹🍷♡
Felt like a Jurassic park trailer !
You didn't have to make the little dudes and gal even more darn adorable with the head accessories 🥹
Nah... Why do these saurian quests make me emotional? I just finished this after the quest of little one. 🥹
The animation quality in this cutscene is magnificent 🥹
This much happiness makes tears in my eyes ☐
Man I'm sleepy I misread the title as "Cute Scene Animation" 😊
My phone will lag with this
Espero no ser el único que soltó unas cuantas lagrimas. 🥹
when Kachina is happy, it looks so cute 🥹❤️
Best cutscene in natlan
IFAAAAAAAAAAAAA ♡
So perfect!!! 😊
This was truly our Genshin Impact
The event's story was really heartwarming. Pets and companions, reuniting with their humans always hits me close to the heart.
The interactions between the saurians are so cute, they're so cute 🥹
Happy ending 🥹
Best event cutscene for me ♡ The story is really good. I cried and my mom was worried what happen to me 😊
One of my favorite cutscenes right now 😊♡
RIP Nampole and Antu 🥹♡
This is truly one of the best event cutscenes that Genshin has ever made.
I just love Saurians, they are definitely something I hold dear to me.
I cried 🥹
BRO THE SAURANS R SO CUTE?? ISTG THEY LOOK LIKE CAKE SOMETIMES...

Hoyoverse, please stop making us hurt cute creatures for materials. I hope, no, I DEMAND that Snezhnaya doesn't have these kinds of enemies.
It feels like the end of Natlan, all the characters and saurians gathering makes the scene feels like it settles
Gotta Catch 'Em All!!! ♥
I'm gonna be honest, i literally cried tears of joy when I watched the scene. ☐ It made me feel so happy.
That was so cute! 1:58 Aww! Bye bye!
