BERITA ACARA

Ujian Mempertahankan Skripsi Sarjana Bagi Mahasiswa Program Strata-1
Fakultas Keguruan dan Ilmu Pendidikan Universitas Muhammadiyah Sumatera Utara

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

Panitia Ujian Sarjana Strata-1 Fakultas Keguruan dan Ilmu Pendidikan dalam sidangnya yang diselenggarakan pada hari Selasa, Tanggal 03 November 2020, pada pukul 08:30 WIB sampai dengan selesai. Setelah mendengar, memperhatikan dan memutuskan bahwa :

Nama : Faradilah Febriyana
NPM : 1602050067
Program Studi : Pendidikan Bahasa Inggris
Judul Skripsi : **The Analysis of Speech Act in Donald Trump's Speech "Coronavirus Task Force Briefing"**

Dengan diterimanya skripsi ini, sudah lulus dari ujian Komprehensif, berhak memakai gelar Sarjana Pendidikan (S.Pd).

Ditetapkan : (**A**) Lulus Yudisium
() Lulus Bersyarat
() Memperbaiki Skripsi
() Tidak Lulus

Ketua

Sekretaris

Dr.H.Elfrianto Nasution,S.Pd.,M.Pd

Dra.Hj. Syamsuyurnita,M.Pd

ANGGOTA PENGUJI :

1. Dr.Bambang Panca S, M.Hum 1.
2. Habib Syukri NST, S.Pd, M,Hum 2.
3. Imelda Darmayanti S.S., M.Hum 3.

LEMBAR PENGESAHAN SKRIPSI

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

Skripsi ini diajukan oleh mahasiswa di bawah ini:

Nama Lengkap : Faradilah Febriyana

NPM : 1602050067

Program Studi : Pendidikan Bahasa Inggris

Judul Skripsi : The Analysis of Speech Act in Donald Trump's Speech "Coronavirus Task Force Briefing"

sudah layak disidangkan.

Medan, 01 Oktober 2020

ABSTRACT

Febriyana, Faradilah. 1602050067. The Analysis of Speech Act in Donald Trump's Speech "Coronavirus Task Force Briefing". A Thesis. English Department of Faculty of Teacher Training and Education of University Muhammadiyah of North Sumatera (UMSU). Medan.2020

This research discussed the Speech Act President Donald Trump in White House, USA, which aimed to find out the kinds of communication functions in the illocutionary act and to identify the effects contained in the speech. This research focused on John Searle's theory about pragmatic, especially in the speech act. The data were analyzed using the descriptive qualitative method by applying note-taking as the instrument to find out the valid data. This research was conducted to find out the kinds of communication functions in the illocutionary act and perlocutionary act. The finding showed that the kinds of communication functions in the illocutionary act and perlocutionary act, there were 7 or 36.84% assertives (stating), 3 or 15.78 % directives (requesting and recommending), 3 or 15.78 % expressives (thanking), and 6 or 31.57 % commissives (promising and offering), and declarations 0% (declaration not found in this research). Then in the perlocutionary act, it is also found 3 sector effect and responses from the audience, among the sectors: in terms of agenda oil production market and the development of new treatment for healing to patient corona and subsidy. It is concluded that assertive of stating and commissive of promising were usually used by President Donald Trump. Meanwhile, in the perlocutionary act in his speech, effective and got responses from the audience after listening to the speech of President Donald Trump in the White House, USA.

Keywords : *Pragmatic, Speech Acts, Perlocutionary, Illocutionary*

ACKNOWLEDGMENTS

Assalamua'laikum Warahmatullahi Wabaratu,

Alhamdulillah, first of all the researcher would like to thanks to Almighty God, Allah SWT for His infinite and blessing so I can accomplish this proposal in order to fulfill the requirements to get a degree for Sarjana Pendidikan (S.Pd) English Education Program, University of Muhammadiyah North Sumatera. Secondly, blessing and peace be upon the Prophet Muhammad SAW who has brought from the darkness into the brightness. The researcher would like to thanks to her beloved mother Sutriyawati and the beloved father Susanto who have advised and supported me spiritually and financially with all their best throughout my study.

In writing this study entitled “The Analysis of Speech Act in Donald Trump’s Speech “Coronavirus Task Force Briefing”” there were so many troubles, without much help from the following people, it was impossible for her to complete and finish her proposal.

1. **Dr. Agus sani, M.AP**, the Rector of University of Muhammadiyah Sumatera Utara.
2. **Dr. Elfrianto Nasution, S.Pd.,M.Pd.**, the Dean of FKIP UMSU who had given the recommendation and permission to carry out the research.
3. **Mandra Saragih, S.Pd.,M.Hum.**, the Head of English Department and Pirman Ginting, S.Pd.,M.Hum., the Secretary of English Department of FKIP UMSU, who had allowed and guided the research.

4. **Dr. Hj. Dewi Kesuma Nasution, S.Pd.,M.Hum.**, her Academic Consultant
5. **Imelda Darmayanti Manurung S.S., M.Hum.**, her beloved supervisor, who given invaluable thought, advice, comments, guidance, support and suggestion for the researcher to complete this proposal.
6. **All of the lecturers** especially who those of English Department for their advice, comments, guidance, support and encouragement during her academic year at FKIP UMSU.
7. **The employees of Biro Administration FKIP**, University of Muhammadiyah Sumatera Utara who had given supporting in administrative system service of completing necessary requirements, so all of business could be resolved easily.
8. Her lovely siblings **Putri Anisantia A.Md** and **Muhammad Naufal Wirayuda** , thanks for giving support and advice her.
9. Her beloved collegous in Geranio Learning Center **Ade Lestari Dwi Putri S.Pd, Nina Baijura Berutu S.pd, Cahyani Wulandari S.Pd, Nurhasanah S.Pd** who always support,motivation, helping and suggestions.
10. Her beloved best friends “ **Lambur official” Yesi Fitriani, Chairunnisa Harahap, Ayu Lestari, Alma Alqarana Lubis, Dinda Fadila, Dewi Rahmasari and Vivi Rahmadhani** who always accompany her, always give support and spirit, advice and idea to finish her study, she really loves her . May Allah SWT Bless them all, Aamiin.
11. **All of her beloved Classmate VIII B Morning Class** English Department of FKIP UMSU 2016 academic year.

Last but not least, I realize that this proposal is still far from being perfect. Therefore, any constructive criticism and suggestion will be highly appreciated. I hope this proposal would be useful for the readers.

Medan, October 2020

The Researcher

CHAPTER I

INTRODUCTION

A. Background of the Study

Language holds an important role in human communication. It is used to communicate with others in their daily life. As human beings, people always need to relate to other human beings. It takes significant elements because they can provide what they want to say and they can show what they are expressed. They also use to express their feeling, idea, and thought through convey the language with others. Language plays a necessary part in the lives all of us and is our most characteristic of human possession. Based on Ronald Wardhaugh (1972:3), language is a system of vocal symbols used for human communication.

Communication is very essential in our life because humans can make communication to form a relationship with a person and other groups, and people can learn many things through these communications. Language is something occurring from the inside of the speaking subject manifest in the meaningful intentional purpose of the individual speaker. Human communication can likewise send information that consists of the message itself that is helpful for others. There are some ways to convey information such as newspapers, televisions, magazines, news, etc. People will deliver their information through speech. It indicates that to build a relationship with others it is not just face to face, but there are some media that can help someone to convey the message to people.

Speech is the ability to speak in front of the public to express their opinion or give an idea about something important. When expressing our speech does not only provide information but also at the same, time to take action. Action inherent when we are revealing something that is called a speech act. The audience can evaluate the message of someone's speech whether it is just a message of information or the speaker needs audience's action.

The speech act is a type of verbal communication. The words speech acts are derived from two words they are; speech and act. Speech is the utterance that occurs and act means action. The advantage of speech act for human communication is it take apart the language dimension of communication. People need to have the knowledge to use the language they obtained to communicate. The relevant use of the speech act acquired through the experiences inside the culture is really important in the embodiment of the special relationship. Austin isolates three basic senses in which saying something equals doing something. These sum to three kinds of acts that are simultaneously performed in Austin 1962 in Kaburise's book (2011:70). These three kinds of speech acts that row can be described as follows:

1. Locutionary act
2. Illocutionary act
3. Perlocutionary act

According to Searle in Rahardi (2005:35-36): classifies the illocutionary speech acts in five kinds of utterances each have a communicative function. The fifth forms of speech that showed the from functions that can be summarized as follows: (1) Assertives, (2) Directives (3) Expressives (4) Commissives (5) Declarations.

The students of the English Education Department should be able to understand the speech act used and how to practice it when they make conversation with others. If they conversed without practicing the speech act, there would be a misunderstanding between the speaker and the hearer. Applied the speech act was very crucial particularly in communication because it was an act of communication, a speech act progress if the audience identifies by the speaker's purpose, and the emotion being expressed. Usually, speech acts could be found in a conversation. The conversation in someone's speech could be an extraordinary example of speech acts because it represented the complicated case of speech of specific people did by saying something. One important that mostly occurred in someone's speech was the message of information of someone speaking. The researcher could define the message of the information.

This research was chosen to be analyzed speech act theory presented by Searle in Rahardi (2005:35-36). Based on the explanation above in this research, the researcher would analyze the kinds of communication function in illocutionary act and the effect of the perlocutionary act in the speech done by President Donald Trump in his speech about "Coronavirus Task Force Briefing".

The reason took President Donald Trump as an object of the research because he is famous and his information is very important nowadays, he discussed information relate to the coronavirus. Coronavirus is the viral virus that everyone curious to know the country developments and policies taken in dealing with this virus.

B. Identification Problem

Based on the background above, the researcher formulated research questions, they were:

1. The kinds of the illocutionary act in President Donald Trump's speech about "Coronavirus Task Force Briefing",
2. The effect of perlocutionary act in President Donald Trump's speech about "Coronavirus Task Force Briefing".

C. Scope and Limitation

The scope of this study was the speech act and the limitation of this study was analyzing the kinds of illocutionary act and perlocutionary act used by President Donald Trump in his speech. To avoid a broader discussion and made this research manageable, this research was only limited to the analysis of President Donald Trump's speech about Corona Task Force Briefing.

D. The Formulation of Problem

1. What kinds of illocutionary act are used in President Donald Trump's speech about "Corona Task Force Briefing?"
2. How are the effect contained in the President Donald Trump's speech about "Coronavirus Task Force Briefing?"

E. Objective of the Research

Based on the research questions above, the objectives of the research were:

1. To identify the kinds of illocutionary and perlocutionary act used in President Donald Trump's Speech about Coronavirus Task Force Briefing
2. To describe the used each kinds of illocutionary act by Searle's theory in President Donald Trump's Speech about Coronavirus Task Force Briefing
3. To investigate perlocutionary act as the effect contained in PresidentDonald Trump's Speech about Coronavirus Task Force Briefing

F. Significances of the Research

1. Theoretical

This research contributes both theoretical and practical in the development of analysis studies, especially on how to analyze illocutionary and perlocutionary acts in President Donald Trump's speech about the Coronavirus Task Force Briefing.

2. Practically

- a. Can be applied in some of major of study especially for people who want to improve their speaking skill.
- b. By using speech acts, someone's speech would be more interesting to hear and other people would more understanding the meaning of the speaker said.
- c. To make someone able to coordinate with expressions and movements that were easier during speaking then they must speech act.

CHAPTER II

REVIEW OF LITERATURE

A. Theoretical Framework

1. Definition of Pragmatic

Pragmatics is the study of how language is used in communication. Therefore, in pragmatics, we study about speaker's meaning that is how meaning is communicated based on its context. Pragmatics is concerned with the study of meanings as communicated by a speaker (or researcher) and interpreted by a listener (or reader). It means that more to do with the analysis of what people mean by their utterances whether the words or phrases it those utterances might mean by themselves.

Pragmatics is the study of speaker meaning stated by Yule (1996). Pragmatic encompasses speech act theory, conversational implicature, talk in interaction, and other approaches to language behavior in philosophy. Pragmatics has something to do with the fact that users use language in context and that language is restricted to culture. He also added that culture and context play roles in communication. It is because without contexts, a hearer does not understand what a speaker intends to say by his or her words. Pragmatics is viewed as the study of language use in particular communicative contexts or situations of necessity; it would take knowledge of the message being communicated or the

speech act being performed; the participants involved; their intention, knowledge of the world and the impact of these on their interaction.

Every word but also the way they perform the utterance. Pragmatics is a branch of linguistics that is a study about how context contributes to the meaning. Pragmatics consists of speech act, deixis, conversational implicature, cooperative principles, and politeness principles. Pragmatics itself explains how using language in context, and the way people produce and understanding the meanings through language. In other words, pragmatics tells about people's intended meanings, their assumptions, their purposes or goals, and the kinds of actions.

Poultridge (2006:53), pragmatics is the study of meaning in relation to the context in which a person is speaking or writing. This includes social, situational, and textual context. It also includes background knowledge context; that is, what people know about each other and about the world. Pragmatics assumes that when people communicate with each other, they normally follow some kind of cooperative principle; that is, they have a shared understanding of how they should cooperate in their communications. The pragmatic component was later extended to include several heterogeneous phenomena that exhibit a direct effect of speech act use on the form and interpretation of sentences.

2. Speech Act Theory

Mc Crthy (1991) stated that the Speech act deals with the utterance to perform a speech act. Based on Grundy (2008), he stated that there are three categories or dimensions of speech acts. Therefore, when people say something,

they can involve in the three dimensions that are locutionary acts, illocutionary acts, and perlocutionary acts. The speech act theory is a reputable pragmatic concept that has inspired research since its first appearance in 1962 until now. The historical tracers of this theory state that it has first engendered by Wittgenstein, the German philosopher, but has given some linguistic tint by Austin and Searle, later on.

Table 2.1 is a comparison of five classifications of illocutionary types

| Austin (1962) | Searle (1969) | Vendler (1972) | Bach and Harnish (1979) | Allan (1986) |
|---------------|---------------|----------------|-------------------------|----------------|
| Expositives | Assertives | Expositives | Assertives | Statements |
| Commissives | Commissives | Commissives | Commissive | |
| Behabitives | Expressives | Behabitives | Acknowledgement | Expressives |
| Exercitives | Directives | Interrogatives | Directives | Invitationals |
| | | Exercitives | | Authoritatives |
| Verdictives | Declaratives | Verdictives | Verdictives | |
| | | Operatives | Effectives | |

Although there are subtle differences in perception in the various categories, what all the outlines have attempted to do was to come up with ways of describing uses of language or constructing some kind of conceptual framework to interpret the various ways that language functions in people's lives. This was the same task that Austin (1962) and Searle (1969) engaged in when Austin wrote his book *How to Do Things with Words*, mentioned earlier, which Searle (1969) expanded in his book, *Speech Acts*.

2.1 Speech Act Theory by Austin

Speech act in the philosophy of language and linguistic is something expressed by an individual that not only presents information but performs an action well. From the history of the positivist philosophy of language, the

language was viewed primarily as a way of making a factual assertion. The work of J.L. Austin, particularly his *How to Do Things with Words*, led philosophers to pay more attention to the non-declarative uses of language. The terminology he introduced, especially the notions “locutionary act”, “illocutionary act”, and “perlocutionary act” occupied an important role in what was then to become the “study of a speech act”. All of these three acts, but especially the “illocutionary act” are nowadays commonly classified as “speech act”.

Austin (1962) realizes that viewing sentences as an act, is a novel way, as sentences have always been seen as describing world facts. More clarity, therefore, was needed in what ways a sentence or discourse might be said to be performing actions. Austin isolates three basic senses in which saying something equals doing something. This amounts to three kinds of acts that are simultaneously performed Austin 1962 in Kaburise’s book (2011:70).

- 1) Locutionary act: a complex act comprising several types of actions: phonological, syntactic and semantic, hence it is the uttering of a sentence with determinate sense and reference (the actual words uttered).
- 2) Illocutionary act: what is usually meant when we make an utterance is that we accomplish some specific social act, for example, the making of a statement, an offer, or a promise, by virtue of the conventional force associated with it.
- 3) Perlocutionary act: the bringing about of effects on the audience by means of uttering the sentence, such effect being special to the circumstance of utterance (the effect of the illocution on the hearer).

Besides, Austin also classifies an illocutionary force into the following types: Austin's classification is best seen as an attempt to give a general picture of illocutionary acts: what types of illocutionary act one can generally perform in uttering a sentence. Austin in Kaburise's book (2011:73-74) distinguishes five general functions of language: (Verdictive), exert influence or exercise power (Exercitive), assume obligation or declare intention (Commissive), adopt the attitude, or express feeling (Behabitive), and clarify reasons, argument, or communication (Expositive).

- 1) Verdictive are typified by the giving of verdicts, as the name implies, by a jury, arbitrator or umpire. But they do not have to be final as they may be an estimate, reckoning, or appraisal.
- 2) Exercitives are the exercising of powers, rights or influences. Examples are appointing, voting, ordering, advising, and so on.
- 3) Commissives are typified by promising or giving an undertaking; they commit one to do a certain action, but also include declarations, intention, and so on.
- 4) Behabitives are miscellaneous groups that have to do with attitudes and social behaviors. Examples are apologizing, congratulating, commending, cursing, and so on.
- 5) Expositives make clear how one's utterances fit into a general argument or discussion. They include phrases like, 'I reply', 'I assume', and 'I postulate'.

2.2 Speech Act Theory by Kreidler

Speech acts differ in their purposes, whether they deal with real or potential facts, prospective or retrospective, in the role of speaker or addressee in these facts, and of course infelicity conditions. According to Kreidler, there are seven kinds of speech act in Kreidler's book (1998:183).

1) Assertive utterances. In the assertive function speakers and researchers use language to tell what they know or believe; assertive language is concerned with facts. The purpose is to inform.

For example

I voted for Aaronson in the last election.

Most plastics are made from soy beans.

Cape Ann Lighthouse is amile from the beach.

This is language concerned with knowledge, with cognition. It deals with data, what exists or existed, what is happening or has happened— or not. So assertive utterances are either true or false, and generally, they can be verified or falsified—not necessarily at the time of the utterance or by those who hear them, but in a general sense, they are subject to empirical investigation. The above sentences are indirect assertives. Direct assertive utterances start with I or we and an assertive verb.

2) The performative utterance is speech acts that bring about the state of affairs they name are called performative: bids, blessings, firings, baptisms, arrests, marrying, declaring a mistrial. Performative utterances are valid if spoken by

someone right to make them is accepted and in circumstances that are accepted as appropriate. The verbs include bet, declare, baptize, name, nominate, pronounce.

For example:

I bid three no-trump.

We accept your offer.

I declare this meeting adjourned.

3) Verdictive utterances are speech acts in which the speaker makes an assessment or judgment about the acts of another, usually the addressee. These include ranking, assessing, appraising, condoning. Verdictive verbs include accuse, charge, excuse, thank in the explicit frame I ____ you of/for ____-ing.

For example :

I accuse you of putting on airs.

I congratulate you for performing so well.

4) Expressive utterance springs from the previous actions—or failure to act—of the speaker, or perhaps the present result of those actions or failures. Expressive utterances are thus retrospective and speaker-involved.

For example :

I acknowledge that I didn't do what I should have done.

We admit that we were mistaken.

I apologize for having disturbed you

5) Directive utterances are those in which the speaker tries to get the addressee to perform some act or refrain from performing an act. Thus a directive utterance has the pronoun you as an actor, whether that word is present in the utterance or not.

For example :

(You) wait here.

Turn to page 164.

Don't (any of you) miss this opportunity to save

6) Commissive utterance is speech acts that commit a speaker to a course of action. Commissive verbs are illustrated by agreeing, ask, offer, refuse, swear, all with the following infinitive.

For example :

I promise to be on time.

We volunteer to put up the decorations for the dance.

7) Phatic utterances is to establish rapport between members of the same society.

For example :

"How're you doing?"

"I'm glad to meet you"

"So nice to see you again"

2.3 Speech Act Theory by Searle

Searle is Austin's student, was unimpressed with the proposed classification on some points, among which were critical of Austin for operating with overlapping criteria (for example, the speech act of 'describing' belongs at the same time to the category of 'verdictives' and in that of 'expositives') and for having incompatible elements within the categories. Searle (1969) stated objects to the inclusion of elements in Austin's categories that do not satisfy the

definitions of the category. Searle (1975: 28) also had misgivings about Austin's practice of making speech acts dependent on verbs claiming that 'differences in illocutionary verbs are a good guide but by no means a sure guide to differences in illocutionary acts'.

According to Searle (1969:17-18), the speech act or acts in the utterances of a sentence are in general a function of the meaning of the sentence. The meaning of a sentence does not in all cases uniquely determine what speech act is performed in a given utterance of that sentence, for a speaker may mean more than what he says, but it is always in principle possible for him to say exactly what he means.

Searle in Rahardi (2005:35-36), classifies the communication function in the illocutionary act divided into five kinds. The fifth forms of speech that show the functions that can be summarized as follows:

- 1) **Assertives**, the form said that binds speakers at the truth of a proposition disclosed. Such as: Stating is something that someone says or writes officially, or an action done to express an opinion, for example: "it aims to develop students skill in the art". **Suggesting** is to mention an idea, possible plan, or action for other people to consider, for example: "Why don't you sit down and relax for a while? It must be 15 tiring days for you". **Boasting** is to speak too proudly or happily about what you have done or what you own, for example: "And I don't know if I'm going to be boasting now, but in 2006 alone, we won three international awards". **Complaining** is to say that something is wrong or not satisfactory, for example: "Tom is complaining to

the manager”. **Claiming** is to say that something is true or is a fact, although you cannot prove it and other people might not believe it, for example: “They claim that they are battling a dastardly conspiracy”.

- 2) **Directives**, namely the form of speech intended speakers to create the effect that the hearer takes action. **Ordering** is a request to make, supply, or deliver food or goods, for example: “I order you to report to the commanding officer”. **Commanding** is having the authority to give orders, for example, “Be sure you have already shopped around for the best price before you make your purchase”. **Requesting** is the act of politely or officially asking for something, for example: “Please lend me your book”. Advising is to give someone advice, for example: “Meanwhile he had been appointed physician advising on the establishment of a silk factory”. **Recommending** is to suggest that someone or something would be good or suitable for a particular job or purpose, or to suggest that a particular action should be done, for example: “We recommend that all application letters be submitted before December 2012”.

- 3) **Expressives**, a form of speech that serves to express or show the psychological attitudes of speakers towards a situation. Such as **Thanking** is to express to someone that you are pleased about or are grateful for something that they have done, for example: “After thanking his benefactor and dropping off his bike for repairs, he stopped for a quick bite to eat”. **Congratulating** is to praise someone and say that you approve of or are pleased about a special or unusual achievement, for example:

“Congratulations on the birth of your lovely baby son”. **Pardoning** is to forgive someone for something that have said or done. This word is often used in polite expressions, for example: “Pardon sir, Could you explain again?” **Blaming** is to say or think that someone or something did something wrong or is responsible for something bad happening, for example: “I think you are to blame”. **Praising** is to express admiration or approval of the achievements or characteristics of a person or thing, for example, “Your dress is beautiful”. **Condoling** is to express sympathy with a person who is suffering sorrow, misfortune, or grief, for example: “I was heartbroken by this sad news”.

- 4) **Commissives**, namely, the nature of speech serves to express promise or offer. Such **Promising** is something that is promising shows signs that it is going to be successful or enjoyable, for example: “I'm not promising any miracles. We got a lot to do to prepare the world for Hazel”. **Vowing** is to make a determined decision or promise to do something, for example, “Tom vowed to do everything within his power to protect the local wildlife”. **Offering** is something that you give or offer to someone, for example: “To be fair, his father hadn't made things any better by offering money to Alex and not his sister”.
- 5) **Declaration** is the form of speech utterances linking content with the fact. The classification of declaration are followed. **Resigning** is to give up a job or position by telling your employer that you are leaving, for example: “I would be grateful if you confirm the acceptance of my resignation”.

Dismissing is to decide that something or someone is not important and not worth considering, for example: “We’ll dismiss class early today”.

Christening is a Christian ceremony at which a baby is given a name and made a member of the Christian Church, for example: “Six weeks after her christening the princess was vaccinated, this being the first occasion on which”. Naming is the activity of saying publicly that a person, company, etc.

has behaved in a bad or illegal way, for example: “He readily backed the naming of underperforming schools”. Appointing is to choose someone officially for a job or responsibility, for example: “They appointed Mr. White as manager”.

Excommunicating is when the Christian Church, especially the Roman Catholic Church, excommunicates someone; it refuses to give that person communion and does not allow them to be involved in the Church, for example: “He was excommunicated”. **Sentencing** is a group of words, usually containing a verb that expresses a thought in the form of a statement, question, instruction, or exclamation and starts with a capital letter when written, for example: “I sentence you to ten years in prison”.

Searle in Kaburise’s book (2011:80), also classifies Speech act categories as follows. Representatives: this is assertions that represent the state of affairs, or as Mey in Kaburise (2011) claims that they present reality. Speakers’ purpose in performing representatives is to commit them to the belief that the propositional content of the utterance is true. In an attempt to describe the world the speaker says how something is, or tries to make „the words match the world“ to use Searle’s expression (1969: 3). They seem, for example, in assertions, statements,

claims and suggestions, they can be either true or false. They seen, for example, in assertions, statements, claims and suggestions, they can be either true or false.

For examples:

The simple present tense is used more often than present perfect tense.

I live in Sibasa in the Northern Province.

Potatoes are very nutritional.

There are dark clouds in the sky; it may rain tomorrow.

Commissives: These committed the speaker, at varying degrees, to some particular future course of action. Very similar to Austin's class of the same name, these acts place obligations on the speakers. They may be in the form of promises, offers, threats, and vows. For examples:

Touch the dial one more time and you will regret it.

If it is a fine day tomorrow, we will go to the beach.

Would you like to come to the film with me?

I will pass that examination, if it is the last thing I do.

Directives: These speech acts are intended to get the listener to act. These include commands, requests, invitations, dares, challenges, and so on, as in:

For examples:

Please join us for dinner on Friday.

Do not barge into my room.

May I borrow your trailer to transport the tiles I bought from CTM?

I dare you to go into the field where the bull is.

Expressives: These are Speech acts, which indicate the speaker's psychological state of mind or attitude to some prior action or state of affairs. They are seen in greetings, apologies, congratulations, condolences, and expressions of giving thanks. The following sentences are some examples:

Wow! That was a brilliant speech.

Oh dear, I am sorry about the incident.

I am so glad to meet you. John has talked a lot about you.

I really appreciate the offer you made, thanks.

Declaratives or Performatives: These utterances are those which bring about the state of affairs that they name. They take the form of blessings, christenings, weddings, firing, and so on. Declaratives are typically broadcast within society within a social group and rely on their success on a speaker being sanctioned by the community, institution, committee, or even a single person in the group to perform such acts under stipulated specialized conditions. Provide the stipulated conditions are met the act is deemed to have been successful.

For examples:

You are hired!

I pronounce this amusement park opened.

I declare this committee adjourned.

Richly bless you and your family.

3. President Donald Trump's Speech

President Donald Trump intervened in giving speeches about the coronavirus which has become a pandemic for many countries. The coronavirus certainly weakens the country's economy which is feared that in the future it will have a devastating effect on people's lives, therefore President Donald Trump discusses the policies to be carried out in the industrial sector to maintain the country's economy.

In his speech this time, he said over the weekend they would even be possible to discuss with a few airlines or all airlines. He thought it would be a very acceptable package. A very large packages and packages that are very acceptable and will be good for their country. The airline is good for many people. He spoke to President Russia, Vladimir Putin; the king of Saudi Arabia, King Salman. They have a big talk about oil production and OPEC and make it so that their industry does it better and the oil industry is better than doing this now the numbers are so low that there will be Layoffs all over the world of course layoffs in their country don't want that to happen they build extraordinary energy business in the United States of America.

B. Relevance of Study

Some previous researcher inspires this research. ZulfaTutuarima, dkk (2018), conducted the first research. The title of this study is An Analysis of Speech Act Used in London Has Fallen Movie. The study aimed to find out the kinds of speech acts used in London Has Fallen Movie and to find out the way of

speech act and the classifications of the illocutionary act used in London Has Fallen Movie. The researcher uses the theory Searle (1975) argued that the speech act defined as an action changing the universe of discourse when a speaker utters it, and a recipient grasps. Searle divides five categories for Illocutionary Act that is Assertive (Representative), directive, expressive, commissive, declaration. The researcher finds there are 76 utterances of speech act used in London Has Fallen Movie, which is the most dominant, is the illocutionary act consist of 37 utterances. There are 99 utterances of the classifications of the illocutionary act, and the most dominant categories are directive with 32 utterances and expressive with 23 utterances.

Try Fahmi Umar (2016) conducted the second research. The title of this study is The Analysis of Speech Act of President Joko Widodo at APEC Forum. This study aimed to find the kinds of communication functions in the illocutionary act and perlocutionary act and to identify the effect contained in the speech. The researcher use theory Searle in Rahardi (2005:35-36), classifies the communication function in the illocutionary act divided into five kinds. They are assertive, directive, expressive, commissive, declaration. The data were analyzed using descriptive qualitative research by using the note-taking method. The researcher found the result of communication function in the illocutionary act and perlocutionary act. There were 9 assertive (stating), 0 directive, 2 expressive (thanking), and commissive (offering and promise), and 0 declaration (declaration not found in the research). Meanwhile in the perlocutionary act in the speech is

affected got responses from the audience after listening to the speech of President JokoWidodo in APEC, Beijing.

Based on the previous findings above, this research had similarities and differences. The similarities were all of the researches, including this research, study about speech act. The difference between the previous findings with this research was the focus analysis and object of research. In the first previous finding, Zulfa focused to find out the kinds of speech act used in London Has Fallen Movie and to find out the way of speech act and the classifications of illocutionary act used in London Has Fallen Movie. And the second previous finding Try Fahmi focused on analyzing the kinds of communication function in the illocutionary act and perlocutionary act, and to identify the effect of contained in the speech of President JokoWidodo in APEC, Beijing. While this research focused on analyzing the kinds of communication function in the illocutionary act, the object of this research was President Donald Trump's Speech about Corona Task Force Briefing.

C. Conceptual of Framework

Speech acts are the study of the intended meaning of the utterances spoken and written. The importance of understanding the various aspects of speech acts is necessary so that communication can well establish. The existence of understanding between the speaker and the listener is a very important thing that will indicate that the communication is running smoothly. Moreover, the most significant things in a speech act are the message of the speaker's intention, so the

hearer understands a message from the speaker. It is a kind of verbal communication. In the use of language, there are at least three kinds of speech acts. These three kinds of speech acts are Locutionary act, Illocutionary acts, and perlocutionary acts. This study is intended to find out the communication function in illocutionary used by President Donald Trump in his speech about “Coronavirus Task Force Briefing”

Illocutionary act is an act performed in saying something, making a statement or promise, thanking, asking a question, etc. Alternatively, an illocutionary act is performed via the communicative force of an utterance such as making a statement, offer, explanation, or for some other communicative purpose. Based on Searle's theory, there are classifies the communication function in the illocutionary act divided into five kinds. They are assertives, directives, expressives, commissives, and declaration. There is a specific function part of the five classifications in the illocutionary act. In the assertive such as (stating, suggesting, boasting, complaining, and claiming), in the directive such as (ordering, commanding, advising, and recommending), in the expressive such as (thanking, congratulating, pardoning, blaming), in the commissive such as (promising, vowing, and offering), in the declaration such as (resigning, dismissing, christening, naming, appointing, excommunicating, sentencing).

The aims of the study comprise the following: a) finding out the communication in illocutionary on the speech, b) specify every functioning part in each classification in the communication function in the illocutionary act.

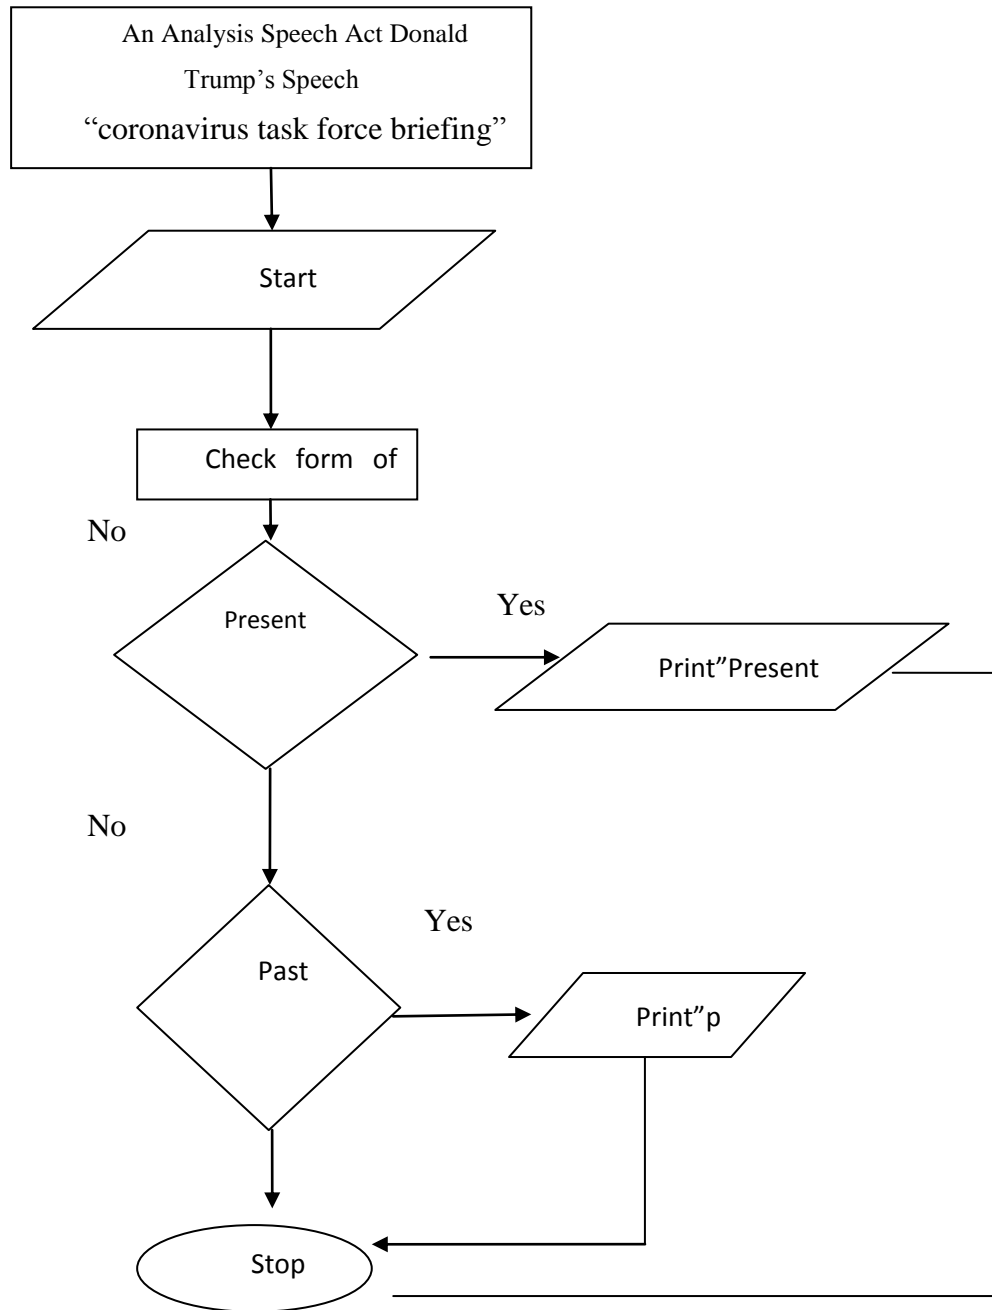

Figure 2.1. Chart of Conceptual Framework by Searle

CHAPTER III

METHODOLOGY OF RESEARCH

A. Method of The Research

This research used a descriptive qualitative research method. The qualitative approach to research was focused with the subjective assessment of attitudes, opinions, and behavior. Research in such a situation was a function of the researcher's insights and impressions. Such an approach to research that generates results either in non-quantitative form or in the form that was not subjected to rigorous quantitative analysis.

Qualitative research was a research that procedures descriptive data in the form of the written word or oral from a subject and its behavior could be observed, there for the goal, the research was an individual understanding and its background completely. This research focused to find kinds of illocutionary act that contained in President Donald Trump's speech and used qualitative research by Searle theory.

B. Data Sources

The data sources of the research used the transcript of the speech by President Donald Trump at the News Now Live submitted on 09 April 2020, in White House, United State America (USA) as the primary data and the used the article to find the

effect of contained in President's speech as the secondary data. This video was downloaded from youtube on Friday, April 10- 2020 .The video length from President Donald Trump was 22.16 minutes.

C. Instrument of The Research

This research used note-taking as an instrument of research. According to Nguyen (2006), Note-taking recognized as a critical activity enhances learning in a learning context. Notes are essential for recalling what has been heard or seen and can promote reflection afterward.

D.Procedure of Collecting Data

The steps in collecting data are:

- (1) Browsing videos selected from Youtube,
- (2) Transcribing of word,
- (3) Printing the data,
- (4) Watching the video and read the script of the speech by the President Donald Trump's speech about corona task force briefing,
- (5) Writing a note to identify the kinds of communication function in illocutionary and perlocutionary act, which used by President Donald Trump in his speech about Corona Task Force Briefing.
- (6) Classifying data choose which included in kinds of communication function illocutionary and perlocutionary act in Donald Trump's Speech.
- (7) Analyzing the speech used speech act theory

E. Technique of Analyzing Data

The data were analyzed by using the speech act theory from Searle. It could use to identify the kinds of illocutionary acts produced by President Donald Trump's Speech about the coronavirus task force briefing and to identify the effects contained in the speech. According to Miles and Huberman (1994:10), the analysis could be defined as consisting of three current flows of activity that was data reduction, data display, and conclusion drawing or verification. This research used Miles and Huberman's theory in analyzing the data, so there were three steps to do, they were: were:

1. Data Reduction

Data reduction became the first step to do in analyzing the data in this research. Data reduction refers to the process of selecting, focusing, simplifying, abstracting, and transforming the data in written up field notes or transcripts. In this step, the data was in the form of video and transcription of Presidents Donald Trump's speech about "Corona Task Force Briefing". Based on Miles' theory, the first step of analyzing the data was done by watching the video, listening carefully, and checking the data by reading the transcription to see the context. Next, selecting the sentences or utterances of President Donald Trump, this contained the speech act to be analyzed. After that, categorizing the data based on the illocutionary and perlocutionary act. Took some notes related to the theory and found in the transcription of Presidents Donald Trump's speech about "Corona Task Force Briefing" and also made summaries to make it easy in analyzing the data and continuing the next steps.

2. Data Display

The second step data display. In this step, the researcher showed or displays the data that was contained the illocutionary and perlocutionary act, not only as generally but specifically and clearly. This research showed which sentences or utterances contains speech act, what categories of the speech act in those sentence, it was the illocutionary and perlocutionary act and then extract the meaning of the of illocutionary and perlocutionary in Presidents Donald Trump's speech about "Corona Task Force Briefing" in 2020

3. Conclusion Drawing

After finished doing data reduction and data display, the last step was concluding. This step concludes the result of the research based on the research problems and speech act theory that were used.

CHAPTER IV
RESEARCH FINDING

A. The Description of Data

The data were collected and selected from the video of Donald Trump's Speech in the white house. The video duration was 22 minutes and it was about Coronavirus Task Force Briefing. The data of this study were types of speech act elements included locutionary, illocutionary, and perlocutionary, but it just focused to analyze the illocutionary and perlocutionary acts. The illocutionary included assertives, directives, expressives, commissives, and declaration.

Table. 4.1. The Percentage of Speech Act in Donald Trumps' Speech

| Types of Speech Act | Frequency | Percentage |
|----------------------------|------------------|-------------------|
| Illocutionary Act | 19 | 86.36 % |
| Locutionary Act | 0 | 0% |
| Perlocutionary Act | 3 | 13.63% |
| Total | 22 | 100 % |

B. Data Analysis

The data was taken from the transcript text in video Donald Tump's Speech.

1. Illocutionary Act

The communication function in illocutionary were devided into five kinds, they were:

a. Assertives

i) *Who begin by saying that we just completed a meeting with the Secretary of Treasury Steve minuchin and Secretary of Transportation Elaine Chao on proposals regarding the airlines and the airline business and we're very working very closely with a lot of different people will be probably putting out a proposal and giving them some of the details from some of the very powerful details.*

In minutes (00.02-00.32) it was an asserting to the audience that President Donald Trump and his staff were doing some hard work to improve the airline business by holding a meeting with the Secretary of Treasury Steve minuchin and Secretary of Transportation Elaine Chao.

ii) *We built a great great energy business in the United States so we have tens of thousands of jobs we had a very good talk we'll see what happens but as you know OPEC met today and I would say they're getting close to a deal we'll soon find out so that was a conversation*

In minutes (01.40-01.57) refers to the planning regarding energy business in the USA. It was asserting to the audience his planning about OPEC agreement regarding oil production so that he wished there would not many employees layoffs.

iii) *Temporary hospitals and care facilities adding 17,000 hospital beds and they did that all within a very short period of time it's incredible what they've done Army Corps of Engineers and FEMA has been fantastic our sweeping airlift operation to keep doctors and nurses applied with protective equipment project air bridge continues to expand with more than flights already completed.*

In minutes (03.22-03.46) refers to asserting. It could be seen that a stating to the audience that hospital and care facilities had added and the Army Corps of Engineers has done many positive things to help and protect doctors and nurses during pandemic covid19.

iv) We have stockpiled millions and millions of doses and we're distributing it some states wanted very badly Michigan we just sent a lot to Michigan and other areas reporting today that we passed 2 million tests completed in the United States first time most anywhere in the country it's a milestone for our countries it's a milestone anywhere.

In minutes (06.59-07.23) refers to asserting to the audience that they would send the stockpiles to some states especially Michigan because other states really needed it.

v) Yes we're talking about 325 million people and that's not going to happen as you can imagine and nope it would never happen with anyone else either other countries do it but they do it in a limited form will probably be the leader of the pack please what do you say to the 16 million Americans more than 60 million Americans who have lost their jobs in the last three weeks.

In minutes (12.40-13.02) refers to asserting to the audience that during corona many people who had lost their job and it was be unexpected events in their country.

vi) I think our country from an economic standpoint will end up being stronger than ever we have tremendous stimulus we have tremendous stimulus plans we have things in the works that are going to really I think far the country I think that

what's going to happen is we're going to have a Big Bounce rather than a small bounce but we will be back and I think honestly I think our country is going to be back from an economic standpoint.

In minutes (14.09-14.33) refers to economic planning. It meant that an asserting to the audience for planning to have a tremendous stimulus to be a big bounce to improve the economic standpoint in their country.

vii) *we're going to start helping other countries with ventilators we're going to end up having a lot of ventilators for future should something happen for hospitals ideally to keep and have but no I think we're in very very good shape we have calls with governor's all the time and the governor's in very good shape now we have helped we have sent billions and billions and billions of dollars between ventilators equipment protective equipment masks we have 500 million masks coming 500 million from one group five hundred.*

In minutes (20.05-20.40) refers to the asserting. It meant planning to help other countries by sending the mask and ventilators to other countries.

b. Directives

i) *Over the weekend it's moving along quickly the airline business has been hit very hard as everybody knows we are going to be in a position to do a lot to help them so that they keep their employees and they save their businesses.*

In minutes (00.32-00.48) refers to requesting. He wanted that the audiences knew the airline's business in a hard situation. It meant that ordering the audience, he wanted to all the audience would help the airline business because during the corona, airline business decreased dramatically.

ii) *I hope together our people are writing one of the most noble chapters in the proud history of our nation Americans are also encouraged to learn that Boris Johnson Prime Minister has been moved out of intensive care that's a tremendous statement and we continue to pray for him and his fast.*

In minutes (02.27-02.49) refers to requesting. He hopes the audience was praying for Johnson Prime Minister to get well soon.

iii) *Many people are recommending strongly z-pak beheaded the z-pak and also zinc and the federal government continues to build our stockpiles and distribute millions of doses for doctors to use as they see fit.*

In minutes (06.35-06.48) refers to recommending. It meant that people recommended the companies to improve the production strongly z-pak and zinc for doctors.

c.Expressives

i) *Let me begin by expressing my sincere gratitude to the American people millions of Americans are making profound and difficult sacrifices.*

In second (02.03-02.10) refers to gratitude. It meant that President Donald Trump was thanking for the American people because they have already sacrificed.

ii) *We want to thank all of the heroes or the frontlines as they fight to save American lives we're at the top of the hill pretty sure we're at the top of the hill and now we're going downward in some cases.*

In minutes (04.23-04.36) refers to thanking. It implied that President Donald Trump wants to give a thank you to all of the people in the frontline because they helped many lives in the USA.

iii) *I look forward to seeing you thank you very much everybody.*

In minutes (22.03-22.05) refers to a thankyou. It meant that President Donald Trump was thanking for the audience it took a time to attend the meeting.

d. Commisives

i) *I just spoke with the President of Russia Vladimir Putin and the king of Saudi Arabia King Salman and we had a big talk as to oil production and OPEC and making it so that our industry does well and the oil industry does better than it's doing right now it's the numbers are so low that there'll be layoffs all over the world they'll be certainly layoffs in this country we don't want that to happen.*

In minutes (01.10-01.40) refers to development planning to cooperate with other countries in the oil production industry. He wished it was going successful. It meant he was promising to discuss to other countries about the global oil market and cuts oil production. It defined an asserting for the audience to know that planning will be done in the USA.

ii) *Pfizer revealed today that it has found a promising new treatment that might prevent the virus from replicating and that hopes it hopes to begin testing in clinical trials very soon it's going to be very very soon they have great great feelings for this particular therapy and they think that a lot of good things are happening through the FDA's coronavirus treatment acceleration program 19 therapies therapies and treatments are now being tested and 26 more are in the*

active planning or clinical trials so we have 19 therapies being tested currently and 26 more are in the active planning for clinical trials that's a big statement that's a lot trials for Gilead anti rival drug remedy severe continued and the company has also expanded emergency use for new patients getting good early.

In minutes (05.22-06.22) refers to testing a new treatment. It could be seen from prizer promising to the audience that they would get to be very soon the new therapy helped the patients to resolve the healing coronavirus by clinical trials through the FDA coronavirus treatment acceleration program.

iii) *The economic relief the Federal Reserve announced this morning that it will provide up to 2.3 trillion dollars in support to businesses states and local governments six hundred billion dollars in loans will be available for mid-sized businesses with up to ten thousand employees and five hundred billion dollars.*

In minutes (07.56-08.15) refers to planning to provide funding relief. It could be seen for the audience that the economic relief the Federal Reserve to give funding relief to mid-sized businesses.

iv) *The Department of Education is also announcing the availability of more than six billion dollars in emergency grant funding to assist college students impacted by the cancellation of classes and the suspension of housing a lot of people had a lot of things suspended housing is one of them previously we waive student loan payments for six months so student loan payments have been waived for six months.*

In minutes (09.10-09.35) refers to the funding to assist college students. It could be seen that they give provide relief so that students must not pay tuition fees for 6 months.

v) *I think we're going to open up very successfully and I'd like to say even more successfully than before please would you want to see surprised if you wanted it 30 40 50 dollars a beer well I I want to see it where there's a certain market but I also don't want I don't want to see it where people have no idea you know we're opening up we'll be opening up areas for storage of oil massive areas for storage of oil because oil today is not selling.*

In minutes (15.00 -15.32) refers to the planning of storage oil. It defined that an offering for the audience to participate in the planning of market oil and storage of oil massive areas.

vi) *We want to save our energy in this country we want to make sure that our energy companies businesses and employees workers remain strong so that's how I'm involved and I think that's gonna happen so right now if you look you're probably talking 23 25 if they announced a deal we can get it up we need a minimum number so the companies don't go out of business so they're not gonna lay off all of these energy workers.*

In minutes (16.11-16.36) identified as a commisive in action promising. It meant about the planning to improve energy company businesses so that the business gets better and the companies do not lay off energy workers.

e. Declaration

In the speech delivered by President Donald Trump in White House, USA, there was no declaration found in the content of the speech.

Based on the explanation above, the percentage of the kinds the illocutionary act that has been analyzed according to Searle theory.

Table 4.2 The Porportion of Illocutionary act

| No | Illocutionary Act | Frequencies | Percentages |
|--------------|-------------------|-------------|-------------|
| 1 | Assertives | 7 | 36.84 % |
| 2 | Directives | 3 | 15.78 % |
| 3 | Expressive | 3 | 15.78 % |
| 4 | Commisives | 6 | 31.57% |
| 5 | Declarations | 0 | 0 % |
| Total | | 19 | 100 % |

2. Perlocutionary Act

The speech delivered by President Donald Trump not only declared the speech, but also the words said that there is an effect was created in it. From 19 data, the researcher got some effects or responses from the audience after hearing the speech delivered by President Donald Trump in White House, USA. , among others:

a. In term of agenda oil production market

In minutes (01.10), the effect of this speech can be seen in the article of Kontan.co.id in April 2020, OPEC and its allies, led by Russia, agreed to cut their oil production by more than a fifth. They hope that the United States and other oil producers can join forces in supporting oil prices, which are being pressured by

the coronavirus crisis. Citing Reuters, the cut in oil production by OPEC and its allies (OPEC+) reached 10 million barrels per day (bpd) or 10% of global supply. Another billion barrels per day is expected to be undertaken by other countries to help deal with the deepest oil crisis in decades.

b. The development of new treatment for healing to patient corona

In minutes (05.22), the effect in this datum can be seen in the article of Farmasetika Magazine, in June 2020, the pharmaceutical company from the United States, Pfizer, believes that the COVID-19 vaccine can be ready by the end of October 2020. This was revealed by Pfizer CEO, Albert Bourla, quoted from The Times of Israel said Bourla according to a report from CNBC-TV18 (29/5/202), "If all goes well, and the stars align, we'll have enough evidence of safety and efficacy so we can have the vaccine around the end of October". Pfizer is working with German company Biotech on several possible vaccines in Europe and the United States. Several pharmaceutical companies and medical institutions around the world have been trying to develop a vaccine for COVID-19 since the pandemic outbreak in December last year in China. On May 18, American biotechnology company Modern Inc announced that preliminary results from a phase 1 trial of their mRNA-based COVID-19 vaccine looked promising.

c. Subsiding

It could be seen in minutes (07.56) and the effect of the speech, the researcher found the article of Republika.co.id, Printed on 10 April 2020, it explained that USA declared that the central bank of United States (US) or the

Federal Reserve (The Fed) adds to the availability of loans of up 2.3 trillion US dollars to support the economy. This funding was aimed at helping households and entrepreneurs and increasing the ability of states and local governments to provide essential services during the coronavirus or covid 19 pandemic.

C. Research Finding

After analyzing the data found in the speech delivered by President Donald Trump's, there were some findings found. The first finding showed that kinds of illocutionary act according to John Searle's theory. They were assertives, directives, expressive, commissives, and declaration.

The second finding showed that the speech in the video covered all of the illocutionary acts, they are assertives, directives, expressive, commissives, and declaration but the proportion was unbalanced because the assertive and commissives are dominant while the researcher could not find the declaration utterance in the video. The highest level percentage belong to, the assertives utterance gets 7 out of 19 test or 36.84 %. The directives utterance gets 3 out of 19 or 15.78 %, The expressive utterance gets 3 out of 19 or 15.78 %, the commissives utterance gets 6 out of 19 or 31.57 and the declaration utterance gets 0 out of 19 or 0%. Therefore, this research found that dominant and not dominant speech utterances of illocutionary act and the researcher find three responses from the audience as the perlocutionary act, the effect of Donald trump's speech.

D. Discussion

In this research, the speech delivered by President Donald Trump who had an appropriate context was analyzed. According to Paltridge (2006:53), pragmatics is the study of meaning about the context in which a person is speaking or writing. Pragmatics assumes that when people communicate with each other, they normally follow some kind of cooperative principle; that is, they have a shared understanding of how they should co-operate in their communications.

In this discussion, the researcher identified the data which was taken from the speech by President Donald Trump in the White House, USA by using Searle's theory as a technique data analysis. In Searle's theory in Rahardi (2005:35-36). There are three kinds of speech act, they are; locutionary acts, illocutionary acts, and perlocutionary acts. Locutionary acts is a speech act with words, phrases, and sentences, the illocutionary act was an act of doing something with a purpose and a specific function anyway, and perlocutionary act was a follow-growing influence (effect) to the hearer. In this study the researcher only examined the 5 functions of communication in the existing act illocutionary, they were assertive, directive, commissive, expressive, and declarative. The researcher also examined the effects of an utterance that is a perlocutionary act.

This study only focused on the note-taking test. There are 22.16 minutes in this video and include public speaking. It showed an unbalanced number of the illocutionary act because the illocutionary act that consisted of the assertives utterance gets 7 out of 19 tests or 36.84%. The directives utterance gets 3 out of

19 or 15.78 %, The expressive utterance gets 3 out of 19 or 15.78 %, the commissives utterance gets 6 out of 19 or 31.57 and the declaration utterance gets 0 out of 19 or 0%.

Finally, it showed the unbalance number of the illocutionary act because the most dominant utterances are assertives and commissives. The most dominant of note-taking a test in illocutionary act, directives and expressive were balance utterance, while the researcher could not find the declaration utterances in the speech and not all of the illocutionary act in the speech got responses from the audience there was only three number of perlocutionary act.

CHAPTER V

CONCUSIONS AND SUGGESTIONS

A. Conclusion

The kinds of speech were three, they were locutionary act, illocutionary act, and perlocutionary act, but the researcher just focused analyze the illocutionary act and perlocutionary act that conclude in the video. The illocutionary act of John Searle's theory in note-taking to the President Donald Trump's speech. They were assertives, directives, expressive, commisives, declaration, and perlocutionary acts in the speech act.

Based on finding and discussion, this study just focused on analyzing speech act in speech act in kinds of communication function in illocutionary act and perlocutionary act contained in the speech of President Donald Trump's speech. The first result of this research were the assertives utterance gets 7 out of 19 tests or 36.84 %. The directives utterance gets 3 out of 19 or 15.78 %, The expressive utterance gets 3 out of 19 or 15.78 %, the commissives utterance gets 6 out of 19 or 31.57 and the declaration utterance gets 0 out of 19 or 0% in illocutionary act. There were also 19 kinds of communication function in illocutionary acts and 3 (three) perlocutionary acts in Donald Trump's speech. In conclusion, the assertive and commissives utterance was dominated by the five kinds of illocutionary, the directives, directives and expressive were balance utterance, and the researcher could not find the declaration utterances in the speech.

The second result of this research was the effect that contained in the speech by President Donald Trump. Then, the effect of perlocutionary act, the writer found 3 sectors effect or response from the audience, They were in term of agenda oil production market, the development of new treatment for healing to patient corona and subsiding. Based on the explanation above, the researcher concluded that the perlocutionary act in this speech has the effect or response from the audience after hearing a speech by President Donald Trump in the White House, USA.

B.Suggestions

Based on the finding of the research, some suggestions are given to the students and other researchers.

1. For the students' English, it is better to know and understand the illocutionary and perlocutionary act in the speech video. It is Donald Trump's speech regarding the Coronavirus Task for briefing. Not only read it but also must understand the meaning and the purpose to master the illocutionary act an understanding of the effect from the audience or hearer as the perlocutionary act in the speech. How kinds each in the illocutionary act. Moreover, it would be better if the illocutionary and perlocutionary act that must remember not only one.

2. For the other researchers who are interested in discourse, to develop for analyzing the pragmatics in the movie and other video analysis of the linguistic study, not only speech but also the other media as an object such as conversations, movie, a newspaper can also be the object of the other discourse analysis of the linguistic study.
3. Based on this research, the researcher hopes this research will be usefull for the readers and other researchers for future improvement of discourse analysis, especially the kinds of illocutionary act and the perlocutionary act as the responses from the hearer that used in the speech.

APPENDIX 1

Overall data of Donald Trump's speech

Who begin by saying that we just completed a meeting with the Secretary of Treasury Steve minuchin and Secretary of Transportation Elaine Chao on proposals regarding the airlines and the airline business and we're very working very closely with a lot of different people will be probably putting out a proposal and giving them some of the details from some of the very powerful details (minutes 00.02-00.32).

Over the weekend it's moving along quickly the airline business has been hit very hard as everybody knows we are going to be in a position to do a lot to help them so that they keep their employees and they save their businesses (minutes 00.32-00.48).

I just spoke with the President of Russia Vladimir Putin and the king of Saudi Arabia King Salman and we had a big talk as to oil production and OPEC and making it so that our industry does well and the oil industry does better than it's doing right now it's the numbers are so low that there'll be layoffs all over the world they'll be certainly layoffs in this country we don't want that to happen. (minutes 01.10-01.40)

We built a great great energy business in the United States so we have tens of thousands of jobs we had a very good talk we'll see what happens but as you know OPEC met today and I would say they're getting close to a deal we'll soon find out so that was a conversation (minutes 01.40-01.57) .

Let me begin by expressing my sincere gratitude to the American people millions of Americans are making profound and difficult sacrifices (minutes 02.03-02.10)

I hope together our people are writing one of the most noble chapters in the proud history of our nation Americans are also encouraged to learn that Boris Johnson Prime Minister has been moved out of intensive care that's a tremendous statement and we continue to pray for him and his fast recovery (minutes 02.27-02.49).

Temporary hospitals and care facilities adding 17,000 hospital beds and they did that all within a very short period of time it's incredible what they've done Army Corps of Engineers and FEMA has been fantastic our sweeping airlift operation to keep doctors and nurses applied with protective equipment project air bridge continues to expand with more than flights already completed.(minutes 03.22-03.46)

We want to thank all of the heroes or the frontlines as they fight to save American lives we're at the top of the hill pretty sure we're at the top of the hill and now we're going downward in some cases (minutes 04.23-04.36).

Pfizer revealed today that it has found a promising new treatment that might prevent the virus from replicating and that hopes it hopes to begin testing in clinical trials very soon it's going to be very very soon they have great great feelings for this particular therapy and they think that a lot of good things are happening through the FDA's coronavirus treatment acceleration program 19 therapies therapies and treatments are now being tested and 26 more are in the

active planning or clinical trials so we have 19 therapies being tested currently and 26 more are in the active planning for clinical trials that's a big statement that's a lot trials for Gilead anti rival drug remedy severe continued and the company has also expanded emergency use for new patients getting good early (minutes 05.22-06.22).

Many people are recommending strongly z-pak beheaded the z-pak and also zinc and the federal government continues to build our stockpiles and distribute millions of doses for doctors to use as they see fit (minutes 06.35-06.48)

We have stockpiled millions and millions of doses and we're distributing it some states wanted very badly Michigan we just sent a lot to Michigan and other areas reporting today that we passed 2 million tests completed in the United States first time most anywhere in the country it's a milestone for our countries it's a milestone anywhere (minutes 06.59-07.23)

The economic relief the Federal Reserve announced this morning that it will provide up to 2.3 trillion dollars in support to businesses states and local governments six hundred billion dollars in loans will be available for mid-sized businesses with up to ten thousand employees and five hundred billion dollars (minutes 07.56-08.15).

The Department of Education is also announcing the availability of more than six billion dollars in emergency grant funding to assist college students impacted by the cancellation of classes and the suspension of housing a lot of people had a lot of things suspended housing is one of them previously we waive

student loan payments for six months so student loan payments have been waived for six months (minutes 09.10-09.35).

Yes we're talking about 325 million people and that's not going to happen as you can imagine and nope it would never happen with anyone else either othercountries do it but they do it in a limited form will probably be the leader of the pack please what do you say to the 16 million Americans more than 60 million Americans who have lost their jobs in the last three weeks (minutes 12.40-13.02).

I think our country from an economic standpoint will end up being stronger than ever we have tremendous stimulus we have tremendous stimulus plans we have things in the works that are going to really I think far the country I think that what's going to happen is we're going to have a Big Bounce rather than a small bounce but we will be back and I think honestly I think our country is going to be back from an economic standpoint (minutes 14.09-14.33) .

I think we're going to open up very successfully and I'd like to say even more successfully than before please would you want to see surprised if you wanted it 30 40 50 dollars a beer well I I want to see it where there's a certain market but I also don't want I don't want to see it where people have no idea you know we're opening up we'll be opening up areas for storage of oil massive areas for storage of oil because oil today is not selling (minutes 15.00-15.32)

We want to save our energy in this country we want to make sure that our energy companies businesses and employees workers remain strong so that's how I'm involved and I think that's gonna happen so right now if you look you're

probably talking 23 25 if they announced a deal we can get it up we need a minimum number so the companies don't go out of business so they're not gonna lay off all of these energy workers. (minutes 16.11-16.36)

we're going to start helping other countries with ventilators we're going to end up having a lot of ventilators for future should something happen for hospitals ideally to keep and have but no I think we're in very very good shape we have calls with governor's all the time and the governor's in very good shape now we have helped we have sent billions and billions and billions of dollars between ventilators equipment protective equipment masks we have 500 million masks coming 500 million from one group five hundred (minutes 20.05-20.40).

I look forward to seeing you thank you very much everybody (minutes 22.03-22).

APPENDIX 2

Type of data illocutionary and perlocutionary act

A. Illocutionary Act

i) *Who begin by saying that we just completed a meeting with the Secretary of Treasury Steve minuchin and Secretary of Transportation Elaine Chao on proposals regarding the airlines and the airline business and we're very working very closely with a lot of different people will be probably putting out a proposal and giving them some of the details from some of the very powerful details (In minutes (00.02-00.32. Sentence 1 in assertives)*

ii) *We built a great great energy business in the United States so we have tens of thousands of jobs we had a very good talk we'll see what happens but as you know OPEC met today and I would say they're getting close to a deal we'll soon find out so that was a conversation (In minutes 01.40-01.57. Sentence 2 in assertives)*

iii) *Temporary hospitals and care facilities adding 17,000 hospital beds and they did that all within a very short period of time it's incredible what they've done Army Corps of Engineers and FEMA has been fantastic our sweeping airlift operation to keep doctors and nurses applied with protective equipment project air bridge continues to expand with more than flights already completed. (minutes 03:22-03.46. Sentence 3 in assertives)*

iv) *We have stockpiled millions and millions of doses and we're distributing it some states wanted very badly Michigan we just sent a lot to Michigan and other*

areas reporting today that we passed 2 million tests completed in the United States first time most anywhere in the country it's a milestone for our countries it's a milestone anywhere (In minutes 06.59-07.23. Sentence 4 in assertives)

v) Yes we're talking about 325 million people and that's not going to happen as you can imagine and nope it would never happen with anyone else either other countries do it but they do it in a limited form will probably be the leader of the pack please what do you say to the 16 million Americans more than 60 million Americans who have lost their jobs in the last three weeks.(minutes 12.40-13.02.Sentence 5 of assertive)

vi) I think our country from an economic standpoint will end up being stronger than ever we have tremendous stimulus we have tremendous stimulus plans we have things in the works that are going to really I think for the country I think that what's going to happen is we're going to have a Big Bounce rather than a small bounce but we will be back and I think honestly I think our country is going to be back from an economic standpoint. (14.09-14.33.Sentence 6 of assertives)

vii) we're going to start helping other countries with ventilators we're going to end up having a lot of ventilators for future should something happen for hospitals ideally to keep and have but no I think we're in very very good shape we have calls with governor's all the time and the governor's in very good shape now we have helped we have sent billions and billions and billions of dollars between ventilators equipment protective equipment masks we have 500 million masks coming 500 million from one group five hundred. (minutes 20.05-20.40. Sentence 7 in assertives) .

viii) *Over the weekend it's moving along quickly the airline business has been hit very hard as everybody knows we are going to be in a position to do a lot to help them so that they keep their employees and they save their businesses* (minutes 00.32-00.48.Sentence 1 in directives)

ix) *I hope together our people are writing one of the most noble chapters in the proud history of our nation Americans are also encouraged to learn that Boris Johnson Prime Minister has been moved out of intensive care that's a tremendous statement and we continue to pray for him and his fast* (minutes 02.27-02.49. Sentence 2 in directives).

x) *Many people are recommending strongly z-pak beheaded the z-pak and also zinc and the federal government continues to build our stockpiles and distribute millions of doses for doctors to use as they see fit* (minutes 06.35-06.48. Sentence 3 in directives)

xi) *Let me begin by expressing my sincere gratitude to the American people millions of Americans are making profound and difficult sacrifices.* (In minutes 02.03-02.10.Sentence I in expressives)

xii) *We want to thank all of the heroes or the frontlines as they fight to save American lives we're at the top of the hill pretty sure we're at the top of the hill and now we're going downward in some cases.*(minutes 04.23-04.36.Sentence 2 in expressives)

xiii) *I look forward to seeing you thank you very much everybody* (minutes 22.03-22.05.Sentence 3 in expressives)

xiv) i) *I just spoke with the President of Russia Vladimir Putin and the king of Saudi Arabia King Salman and we had a big talk as to oil production and OPEC and making it so that our industry does well and the oil industry does better than it's doing right now it's the numbers are so low that there'll be layoffs all over the world they'll be certainly layoffs in this country we don't want that to happen.*

(minutes 01.10-01.40. Sentence 1 in commisives)

xv) *Pfizer revealed today that it has found a promising new treatment that might prevent the virus from replicating and that hopes it hopes to begin testing in clinical trials very soon it's going to be very very soon they have great great feelings for this particular therapy and they think that a lot of good things are happening through the FDA's coronavirus treatment acceleration program 19 therapies therapies and treatments are now being tested and 26 more are in the active planning or clinical trials so we have 19 therapies being tested currently and 26 more are in the active planning for clinical trials that's a big statement that's a lot trials for Gilead anti rival drug remedy severe continued and the company has also expanded emergency use for new patients getting good early*

(minutes 05.22-06.22.Sentence 2 in commisives)

xvi) *The economic relief the Federal Reserve announced this morning that it will provide up to 2.3 trillion dollars in support to businesses states and local governments six hundred billion dollars in loans will be available for mid-sized businesses with up to ten thousand employees and five hundred billion dollars*

(minutes 07.56-08.15. Sentence 3 in commisives)

xvii) *The Department of Education is also announcing the availability of more than six billion dollars in emergency grant funding to assist college students impacted by the cancellation of classes and the suspension of housing a lot of people had a lot of things suspended housing is one of them previously we waive student loan payments for six months so student loan payments have been waived for six months.* (minutes 09.10-09.35. Sentence 4 in commisives)

xviii) *I think we're going to open up very successfully and I'd like to say even more successfully than before please would you want to see surprised if you wanted it 30 40 50 dollars a beer well I I want to see it where there's a certain market but I also don't want I don't want to see it where people have no idea you know we're opening up we'll be opening up areas for storage of oil massive areas for storage of oil because oil today is not selling.* (minutes 15.00 -15.32. Sentence 5 in commisives)

xix) *We want to save our energy in this country we want to make sure that our energy companies businesses and employees workers remain strong so that's how I'm involved and I think that's gonna happen so right now if you look you're probably talking 23 25 if they announced a deal we can get it up we need a minimum number so the companies don't go out of business so they're not gonna lay off all of these energy workers.* (minutes 16.11-16.36. Sentence 6 in commisives)

B.Perlocutionary Act

(xx)*I just spoke with the President of Russia Vladimir Putin and the king of Saudi Arabia King Salman and we had a big talk as to oil production and OPEC and making it so that our industry does well and the oil industry does better than it's doing right now it's the numbers are so low that there'll be layoffs all over the world they'll be certainly layoffs in this country we don't want that to happen.*
(minutes 01.10-01.40.Sentence 1 in perlocutionary)

(xxi)*Pfizer revealed today that it has found a promising new treatment that might prevent the virus from replicating and that hopes it hopes to begin testing in clinical trials very soon it's going to be very very soon they have great great feelings for this particular therapy and they think that a lot of good things are happening through the FDA's coronavirus treatment acceleration program 19 therapies therapies and treatments are now being tested and 26 more are in the active planning or clinical trials so we have 19 therapies being tested currently and 26 more are in the active planning for clinical trials that's a big statement that's a lot trials for Gilead anti rival drug remedy severe continued and the company has also expanded emergency use for new patients getting good early*
(minutes 05.22-06.22. Sentence 2 in perlocutionary)

(xxii)*The economic relief the Federal Reserve announced this morning that it will provide up to 2.3 trillion dollars in support to businesses states and local governments six hundred billion dollars in loans will be available for mid-sized businesses with up to ten thousand employees and five hundred billion dollars* (minutes 07.56-08.15. Sentence 3 in perlocutionary).

APPENDIX 3

Transcript of Donald Trump's speech about coronavirus task force briefing on 09 April, 2020, in White House, United State America (USA).

Who begin by saying that we just completed a meeting with the Secretary of Treasury Steve minuchin and Secretary of Transportation Elaine Chao on proposals regarding the airlines and the airline business and we're very working very closely with a lot of different people will be probably putting out a proposal and giving them some of the details from some of the very powerful details over the weekend it's moving along quickly the airline business has been hit very hard as everybody knows and we are going to be in a position to do a lot to help them so that they keep their employees and they save their businesses and that'll be taking place I think you can say over the weekend we may even have discussions with some of the airlines or all of the airlines over the weekend and I think it's going to be a very acceptable package it's a very big Package and a very acceptable package it'll be good for our country good for the airlines good for a lot of people likewise I just spoke with the President of Russia Vladimir Putin and the king of Saudi Arabia King Salman and we had a big talk as to oil production and OPEC and making it so that our industry does well and the oil industry does better than it's doing right now it's the numbers are so low that there'll be layoffs all over the world they'll be certainly layoffs in this country we don't want that to happen we built a great great energy business in the United States so we have tens of thousands of jobs we had a very good talk we'll see what happens but as you know OPEC met today and I would say they're getting close to a deal we'll soon find out

so that was a conversation we just had so we've had a busy hour and a half and let me begin by expressing my sincere gratitude to the American people millions of Americans are making profound and difficult sacrifices there lives because they know it will save the lives of countless others and that's exactly what it's doing you see what's happening and where we are where we stand and hopefully we're going to be opening up we can quote opening very very very very soon I hope together our people are writing one of the most noble chapters in the proud history of our nation Americans are also encouraged to learn that Boris Johnson Prime Minister has been moved out of intensive care that's a tremendous statement and we continue to pray for him and his fast recovery that's a very positive development as the New York metropolitan area continues its battle against the outbreak the full power of the federal government is there to support them as you know the Javits Center has now been fully converted into a 3,000 bed hospital one of the largest anywhere in the country and by the incredible professionals I have to say the the Corps of Engineers what they can do is just incredible they've done a fantastic job in their building nationwide 21 temporary hospitals and care facilities adding 17,000 hospital beds and they did that all within a very short period of time it's incredible what they've done Army Corps of Engineers and FEMA has been fantastic our sweeping airlift operation to keep doctors and nurses applied with protective equipment project air bridge continues to expand with more than 24 flights already completed and 49 additional flights now scheduled in the near future so that's been very successful in that gear and those outfits are being handed out as they arrived they're going directly to point the

American medical system continues to perform beyond our highest expectations reminding us that the United States is blessed with the most advanced health care and the most skilled health care workers anywhere in the planet other countries are looking to what we're doing and our testing operation has now become far and away the most sophisticated and the best anywhere and we want to thank all of the heroes on the frontlines as they fight to save American lives we're at the top of the hill pretty sure we're at the top of the hill and now we're going downward in some cases we've already started that process earlier today I spoke with hundreds of mental health leaders and advocates from around the country to discuss the vital work and the vital work they're doing we had the top doctors in the country some international doctors mental health a big factor not only as the virus inflicted immense physical suffering on many people but also mental and emotional suffering as well even though we're staying physically apart no American is alone and we're all in this together but the mental health doctors and experts the very great call it was a very interesting call they're working very hard we're also seeing encouraging signs in our race to develop breakthrough treatments and therapies Pfizer revealed today that it has found a promising new treatment that might prevent the virus from replicating and that hopes it hopes to begin testing in clinical trials very soon it's going to be very very soon they have great great feelings for this particular therapy and they think that a lot of good things are happening through the FDA's coronavirus treatment acceleration program 19 therapies and treatments are now being tested and 26 more are in the active planning or clinical trials so we have 19 therapies being tested currently and 26

more are in the active planning for clinical trials that's a big statement that's a lot of trials for Gilead anti-rival drug remdesivir continued and the company has also expanded emergency use for new patients getting good early results by the way the companies that manufacture hydroxychloroquine are massively ramping up production as you know many people are recommending strongly z-pak, beclomethasone, the z-pak and also zinc and the federal government continues to build our stockpiles and distribute millions of doses for doctors to use as they see fit and I'm pleased to inform you we're just having a lot of good things are happening but we'll have to see how that all works out but we have we've purchased and we have stockpiled millions and millions of doses and we're distributing it some states wanted very badly Michigan we just sent a lot to Michigan and other areas reporting today that we passed 2 million tests completed in the United States first time most anywhere in the country it's a milestone for our country it's a milestone anywhere nobody's done anywhere close are some tests are highly sophisticated and highly accurate at the same time we're making important progress on the economic front of this war and a few moments Secretary of Labor Eugene Scalia will explain new steps that we're taking to it your American workers swiftly receive unemployment and paid leave benefits and that employers protect the health and safety of all workers including essential workers on the job working very very closely with workers and with employers to provide for the economic relief the Federal Reserve announced this morning that it will provide up to 2.3 trillion dollars in support to businesses states and local governments six hundred billion dollars in loans will be available for mid-sized businesses with up to ten

thousand employees and five hundred billion dollars will be available for states counties with over two million residents and cities with a population of over 1 million my administration is also working with Congress to replenish the very successful incredibly successful the way it's going paycheck protection program which is allowing hundreds of thousands of small businesses to keep their workers on the payroll meaning it'll keep those businesses open we need both Democrats and Republicans to come together to get this legislation complete and it looks like it's on its way but we need both and it should be for people that are working for the workers and if you look and you see we have a lot of people that are affected by that and it's a very positive development so we have to get a bipartisan approval of that and hopefully that'll happen today the Department of Education is also announcing the availability of more than six billion dollars in emergency grant funding to assist college students impacted by the cancellation of classes and the suspension of housing a lot of people had a lot of things suspended housing is one of them previously we waive student loan payments for six months so student loan payments have been waived for six months and we'll discuss it after that may go further our citizens for a period of time it's also United our entire nation I think I can say like almost never before Americans are moving forward with common purpose and shared resolve determined to vanquish the virus and lift our nation we are supremely confident in the magnificent future that awaits the American people and with that before I invite our vice president and our great vice president and Jeanne Scalia to speak we'll take a few questions and then I'm going back into negotiations on oil and on Airlines yeah please compensation with President Putin

in the key you had a very good conversation did you organize that fall and do they understand the problems we causing yeah yeah you know there's a lot of there's a lot of there's so much production nobody even knows what to do with it that's how it's working and Saudi Arabia and as you know Russia it's well known that were producing a lot and they were perhaps fighting with each other over the production and the amount of oil being produced and frankly there's not enough room to even store it our storage is now full gonna be very soon our strategic national storage is I said there's a great time to fill it up load it up with oil that frankly is at pricing thatnobody's ever seen before I don't think we've seen this probably since the 1950s that was with big dollars so we'll see what happens the conversation was very good they're getting close to a deal that's OPEC and many other countries outside of OPEC and we'll see what happens very good we had a very good call I think it was a very good call we're gonna see what happens but it was a very good go they'll probably announce something either today or tomorrow one way or the other could be good could be not so good but I think one way the other go ahead to administration discuss the possibility of reopening the country when the administration does not have an adequate nationwide testing system for this virus don't you need a nationwide system for the virus before you real we have a great testing system we have the best right now the best testing system in the world but there are certain sections right now there are certain sections in the country that are in phenomenal shape already other sections are coming online other sections are going down and we in addition to that are giving out millions of tests and every day we're doing it exponentially we're picking up and what we'll

be doing in the very near future is going to certain areas of our country and do massive testing it's not necessary but it would be a good thing to have to make sure people are safe going back to work you don't want to send people back to the workplace want to have it and we're going to see if we have it did you need it no is it a nice thing to do yes we're talking about 325 million people and that's not going to happen as you can imagine and nope it would never happen with anyone else either other countries do it but they do it in a limited form will probably be the leader of the pack please what do you say to the 16 million Americans more than 60 million Americans who have lost their jobs in the last three weeks well I think the economy is going to do very well now that's just my feeling it's a strong feeling I've had good proper feelings about a lot of things over the years and I think we're going to do well we're doing very well we're at the lower end of the curb in terms of death which is a terrible word a terrible dark word that we've experienced like nobody has ever seen before in this country I mean we're we're have numbers that are terrible but when you look at the lower levels of a hundred lower prediction levels of a hundred hundred and twenty thousand to two hundred and twenty thousand or if we did nothing up to 2.2 million people we're looking at a much lower level than the level of I hope than the level of a hundred thousand so we're gonna see we're going to have to you can never look you can never do anything about the people that lost their loved ones and loved the loss their friends and I mean the great friendships and I'm not sure a lot of people will ever be the same but I think our country from an economic standpoint will end up being stronger than ever we have tremendous stimulus we have tremendous stimulus plans we

have things in the works that are going to really I think far the country I think that what's going to happen is we're going to have a Big Bounce rather than a small bounce but we will be back and I think honestly I think our country is going to be back from an economic standpoint again you can never replace the people that were lost and to their families certainly you can never do a thing like that but we will have succeeded in many ways hopefully keeping the number way below our minimum numbers and also from an economic standpoint you know we met with the mental health people today and that takes it from this is taking a tremendous toll mentally on a lot of people and I think we're going to open up strong I think we're going to open up very successfully and I'd like to say even more successfully than before please would you want to see surprised if you wanted it 30 40 50 dollars a beer well I I want to see it where there's a certain market but I also don't want I don't want to see it where people have no idea you know we're opening up we'll be opening up areas for storage of oil massive areas for storage of oil because oil today is not selling and what happened is the virus knocked out 40% of the market immediately you know that you know the number forty percent now there was a lot of oil but it was very 40 percent you look at the road you look at the car you look at what's going on there's nobody driving there's no reason for it right now that'll start coming back but we are storing millions of barrels of oil that nobody thought would even be possible frankly ships turned out to be a good business for some people because they're filling up tankers sending them out to sea and not saying where to go they're just sitting out there loaded up with oil so we want to save our energy in this country we want to make sure that our energy

companies businesses and employees workers remain strong so that's how I'm involved and I think that's gonna happen so right now if you look you're probably talking 23 25 if they announced a deal we can get it up we need a minimum number so the companies don't go out of business so they're not gonna lay off all of these energy workers who are important to our country and you know we're now energy independent we could do something well we only used our oil but I think the long-term benefit is to be able to just go with the market and it's gonna work out it's all gonna work out if you looked at three weeks ago as you know as we talked about it three weeks ago and two weeks ago this was catastrophic I think it's really hitting bottom and I think that I mean we've had a bottom but now at twenty three dollars and twenty five dollars and probably heading up at the same time we save our energy and we also produce great cheap energy and we save our jobs we're telling us their banks don't know how to access this money they're trying to apply they can't figure it out so where does the fault line is a lot of the banks I don't think there's a fault which they're doing record numbers of dollars they're dealing with many community banks they're dealing with Bank of America Citibank a lot of Wells Fargo as you know is very much involved and they're dealing with the bankers can't go that quickly but I'm hearing it's a very very successful rollout they didn't want changes in applications they want changes in loan requirements etc billions of dollars worth of loans and in the very near future the banks will be relieving the money they'll be paying out the money kept pleasing the USMC the auto industry is hurting these days are you ready to postpone the yeah the deal is with Canada with Gillis is Mexico we different from

the standpoint that production will be lower but we have a deal it's a signed deal it's a deal that say one of the worst deals that we've ever had was NAFTA one of the worst trade deals ever made by any country anywhere and we'll be terminating that and the New Deal is a great deal for our country so that's something now again we get hit by the virus and we'll see where that all goes but certainly car production is going to be down for a little while but ultimately good for our farmers great for our farmers we'll be helping our farmers by the way we have money going out to our farmers in the pretty near future having to do with you see what's happened farmers got hurt very badly by all of this people are eating less from the standpoint that there's no restaurants are open no businesses are open no hotels are open they'll start to come back but we're gonna be helping out our farmers yep Philip Wagner real Flair politics earlier you mentioned project sky bridge and we're hearing that through that project a lot of the PPE that was sent out to other countries is coming back to this country do you do you know when we'll be able to bring a majority of that back and then are you frustrated that US aid allowed a lot of that aid to go out the door in the first place I'm not because we're we're in very good shape you'll be speaking with Mike Pence about this and a little while you look at the hospitals you look at what's going on I spoke to yesterday I spoke with the governor of Louisiana I'm saying do you think we need that extra of building and we are really in good shape you're not hearing people in needing ventilators much in fact we're going to start helping other countries with ventilators we're going to end up having a lot of ventilators for future should something happen for hospitals ideally to keep and have but no I think we're in

very very good shape we have calls with governor's all the time and the governor's in very good shape now we have helped we have sent billions and billions and billions of dollars between ventilators equipment protective equipment masks we have 500 million masks coming 500 million from one group five hundred it'll be three hundred million and two hundred million over a short period of time no I think we're in very good shape please president speaking of testing some experts including Scott got we have talked about 750,000 tests per week being needed before the economy is open can you address that do you agree with those numbers if not how many per week do you think we should have because I don't think it's needed but I think we're going to try and hit a number like that that's a very high number but we're going to be trying to hit it and we probably might be able to do that please go ahead Thank You mr. president today the Democrats pushed for more rescue money for states and hospitals which are complaining that they needed to fight the corona virus pandemic do you think hospitals and states need this money will you so I do and I do support something but I support it for the next phase it's much simpler in the next phase whether that phase is infrastructure or whatever so I'm going to leave you now with Mike Pence and with Eugene Scalia and if you would I look forward to seeing you tomorrow we'll see you tomorrow we have a lot of I think a lot of very big news to report we've had a tremendous day between I believe what's happening with the energy industry and I believe what's happening with Airlines I look forward to seeing you thank you very much everybody.
